SINGLE DOCUMENT

(Draft modification of the Single Document of the PDO "Beaujolais" — Version as at 23 October 2013. Additions appear in bold and deleted provisions in struck-through characters.)

1. Categories of grapevine products

1. Wine

2. Description of the wine(s)

Name(s) to be registered: Beaujolais (fr). Equivalent term(s): —. Traditionally used name: No. Type of amendment: Minor amendment (Article 118o(2), second sentence, of Regulation (EC) No 1234/2007). Type of geographical indication: PDO – Protected designation of origin.

Analytical characteristics

The wines are still dry red, rosé or white wines. The red and rosé wines have a minimum natural alcoholic strength by volume of 10 %. The white wines have a minimum natural alcoholic strength by volume of 10.5 %. The red and rosé wines do not exceed, after enrichment, a total alcoholic strength by volume of 12.5 %. The white wines do not exceed, after enrichment, a total alcoholic strength by volume of 13 %.

ANALYTICAL PARAMETER	**White wines**	**Red or rosé wines**
Content of fermentable sugars (glucose + fructose) and stage at which the value applies	- Less than or equal to 3 grams per litre; - or less than or equal to 4 grams per litre if the total acidity, expressed as H2SO4, is greater than or equal to 2.7 grams per litre. (finished wines ready to be released for consumption)	Less than or equal to 3 grams per litre. (finished wines ready to be released for consumption)
Volatile acidity content and stage at which the value applies	Less than or equal to 14.17 milliequivalents per litre. (finished wines ready to be released for consumption)	Less than or equal to 14.17 milliequivalents per litre. (finished wines ready to be released for consumption)

The red wines present, at the packaging stage, a maximum malic acid content of 0.4 gram per litre. The total acidity and sulphur dioxide contents are those fixed by Community regulations. The red or rosé wines liable to benefit from the term "primeur" or "nouveau" present the following analytical characteristics:

Organoleptic characteristics

The red wines present a light robe, and are known for being smooth-drinking ("gouleyant"), fruity, floral wines that are appreciated from their youngest age. The rosé wines generally have a luminous robe, aromas of fruit, are round and fresh on the palate and are drunk rather young. The wines benefiting from the term "primeur" or "nouveau", reserved for red and rosé wines, are fresh and appetising, aromatic and fruity wines. They are intended for rapid consumption, in the months following their elaboration. The white wines, more confidential, often have aromas of fresh fruit, citrus, white flowers and sometimes a vanilla touch, if they have known the cask.

3. Traditional terms

a) Point a)

Appellation d'origine contrôlée

b) Point b)

Villages; Primeur; Clos; Château.

4. Wine-making practices

a. Oenological practices

Type of oenological practice: Specific oenological practice.

Description of the practice: - Subtractive enrichment techniques (SET) are authorised for red wines within the limit of a concentration rate of 10 %; - For the elaboration of the rosé wines, the use of charcoals for oenological use, alone or in a mixture in preparations, is prohibited. - In order to preserve the "primeur" character which constitutes the specificity of the red and rosé wines liable to benefit from the term "primeur" or "nouveau": - The wines come exclusively from grapes harvested in the same year; - The vatting period of the wines is less than or equal to 10 days; - The wines come from a qualitative selection which, in order to preserve the primeur characters, may not lead to a volume declared, in harvest or in production, under the controlled designation of origin "Beaujolais" supplemented by the term "primeur" or "nouveau", or "Beaujolais" followed by the term "Villages", or followed by the name of the commune of provenance of the grapes supplemented by the term "primeur" or "nouveau", greater than 0.5 times the volume that may be declared within the limit of the yield authorised for the controlled designation of origin "Beaujolais" or "Beaujolais" followed by the term "Villages", or followed by the name of the commune of provenance of the grapes. - The red and rosé wines do not exceed, after enrichment, a total alcoholic strength by volume of 12.50 %. - The white wines do not exceed, after enrichment, a total alcoholic strength by volume of 13 %. In addition to the above provisions, the wines must comply, as regards oenological practices, with the obligations set out at Community level and in the Rural and Maritime Fishing Code.

Type of oenological practice: Cultivation practice.

Description of the practice:

a) – Planting density. GENERAL PROVISIONS: The vines present a minimum planting density of 5,000 plants per hectare. These vines present a spacing between rows less than or equal to 2.50 metres and a spacing between plants within the same row greater than or equal to 0.80 metre. PARTICULAR PROVISIONS: Subject to compliance with the minimum density of 5,000 plants per hectare, and for the purposes of mechanisation, the vines may have inter-rows presenting a spacing less than or equal to 3 metres.

b) – Pruning rules. Pruning is completed by 15 May. The wines come from vines pruned according to the following provisions:

COLOUR OF THE WINES	**PRUNING RULES**
White wines	- either by single Guyot pruning with a maximum of 8 free eyes (buds) on the long cane and a spur with a maximum of 2 free eyes; - or by the pruning known as the Mâconnais "taille à queue": each plant bears a long cane with a maximum of 12 free eyes and a spur with a maximum of 2 free eyes.
Red and rosé wines	With a maximum of 10 free eyes per plant: - either by short pruning (trained in goblet, in fan or in single, double or "charmet" Royat cordon) with 3 to 5 spurs with a maximum of 2 free eyes. With a view to rejuvenation, each plant may also bear a spur with a maximum of 2 free eyes pruned on a water-shoot arising from the old wood; - or by single Guyot pruning, with a maximum of 6 free eyes on the long cane and a spur with a maximum of 2 free eyes; - or with 2 canes with a maximum of 3 free eyes. During formation pruning or during a change of the pruning method, the vines are pruned with a maximum of 12 free eyes per plant.

- Provisions relating to the mechanical harvesting of parcels intended to produce red or rosé wines: a) – The height of the harvest in the containers ensuring the transport from the parcel to the vinification cellar does not exceed 0.50 metre; b) – The containers are of inert and food-grade material; c) – The harvesting and harvest-transport equipment presents an adapted water-drainage or protection system.

b. Maximum yields

COLOUR OF THE WINES	**YIELD (hectolitres per hectare)**	**LIMIT YIELD (hectolitres per hectare)**
White wines	68	75

Rosé and red wines	60	65

7. Link with the geographical area

Detailed information on the geographical area

a) – Description of the natural factors contributing to the link

The geographical area extends over the eastern edge of the Massif Central, above the Saône valley, at the heart of the region to which it gave its name. The vineyard extends between the towns of Lyon and Mâcon, over 55 kilometres, from north to south, and 15 to 20 kilometres, from east to west, between the plain of the Saône, a tributary of the Rhône, and the "Monts du Beaujolais", at an altitude of between 180 metres and 550 metres.

The geographical area thus covers the territory of 85 communes of the Rhône department, and 11 communes of the Saône-et-Loire department. The production zone defined for the term "Villages" is located in the northern half of the geographical area over the territory of 30 communes of the Rhône department and 8 communes of the Saône-et-Loire department.

Two great families of geological formations may be distinguished in the landscape of the viticultural Beaujolais. In the north, ancient formations of Palaeozoic age forming relief in rounded hummocks. These are rocks formed during the Hercynian uplift — granites, porphyries, schists and often metamorphosed volcano-sedimentary rocks. Through weathering, these rocks give sandy or clayey soils of acidic reaction. In the south, more recent sedimentary formations (Triassic and Jurassic, of the Secondary era) outcrop. These are mainly limestone rocks, forming more vigorous relief than in the north, organised in elongated ridges. The soils are generally more clayey and deeper. At the foot of the hillsides, Quaternary formations, represented by ancient fluvial terraces, colluvium and alluvial cones, mask the ancient substrate. Whatever the subsoil formations, the hillsides are mainly oriented to the east and south.

The region bathes in a degraded oceanic climate subject to continental influences (summer storms, freezing fogs in winter) and southern influences (summer heat, rainfall maximum in autumn and spring). The "Monts du Beaujolais" play an essential role in protecting from the western winds, thus attenuating the oceanic influence. The foehn effect they generate dries the oceanic air, reducing cloudiness and rainfall. The wide valley of the Saône also plays a preponderant role in the local climate by channelling the southern air masses, increasing the luminosity and attenuating the temperature ranges.

b) – Description of the human factors contributing to the link

"One must arrive at the 3rd century of our era to see the cultivation of the vine definitively established in the region of the Lyonnais." [Viala P. and Vermorel V., 1902]. The emperor PROBUS, in 280 AD, allows the Gauls to have vines, notably in the Monts d'Or, close to Lyon.

During the 18th century, the trade in the wines of the Beaujolais grows in scale, inducing great transformations in the vineyard. At that time, the landscape that we know in 2009 takes shape. With the expansion of the towns, industrialisation and the development of transport infrastructure, the 19th century is a pivotal period for the vineyard. The south orients itself towards the production of light and fruity, thirst-quenching wines, to supply the neighbouring Lyon market. The north, turned rather towards Mâcon and the markets of the North of France, favours the production of more concentrated wines, apt for keeping and transport. At the end of the 1920s, the first cooperative cellars appear, followed in the 1950s by a second generation of cellars which contribute to the general improvement of the quality of the wines and enable the development and rationalisation of Beaujolais winemaking. The controlled designation of origin "Beaujolais" is recognised by decree on 12 September 1937.

The producers of the communes of the north, whose powerful wines for keeping contrast with the lighter and fruitier wines of the south, wish to distinguish themselves and request the recognition of a particular controlled designation of origin. In 1943, their efforts thus result in the publication of a list of 31 communes authorised to add their name to that of "Beaujolais". On 21 April 1950 the 31 communes are grouped into a unit given concrete form by the addition of the term "Villages".

The Beaujolais is the only wine region where the proportion of new wine is so significant, thanks in particular to the aptitude of the gamay N variety to produce primeur wine. As early as the 19th century, some very professional retailers buy "under the press", remove immediately and present the "Beaujolais nouveau" in the following weeks to the distributors, café-restaurateurs of Paris and Lyon. The fermentation of the wines often finishes during transport, which protects them as well as possible from any alteration.

The history of the "Beaujolais nouveau" is marked by regulatory developments. Thus in 1951, the Union Viticole du Beaujolais requests the possibility of selling its wines "en primeur", before the date of 15 December, a request that succeeds on 13 November 1951, with the appearance of an administrative note of the indirect taxes specifying the conditions "under which certain controlled-appellation wines may be marketed straight away without waiting for the general release of the coming 15 December". Thus was officially born the "Beaujolais nouveau" phenomenon. But it is necessary to wait until the year 1985 to arrive at the placing on the market for the consumer of the "Beaujolais nouveau" on the third Thursday of the month of November.

The volumes marketed increase dazzlingly from the 1960s, reaching about 500,000 hectolitres in the mid-1980s, but without ever exceeding half of the total production of the Beaujolais. Indeed, in order for the "primeur" wines to be ready quickly, malolactic fermentation completed, and to present a fresh and smooth-drinking, aromatic and fruity character, the producers favour, according to the vintage, their earliest parcels, practise shorter macerations and select the cuvées revealing the crisp character of the grape and the particular aromas of fermentation. These technical constraints lead, on each holding, to limiting the production of "primeur" to part of the harvest.

The vineyard is dedicated to the production of red, rosé and white wines. For the red and rosé wines, the essential variety is the gamay N variety. In order to control the fertility of this variety, the vines are short-pruned, mainly according to the "goblet training", with spur pruning. The white wines come from the chardonnay B variety only. With the aim of preserving the fruity characters as well as possible, the producers are accustomed to practising a typically Beaujolais vinification inspired by "semi-carbonic maceration".

The vineyard of the "Beaujolais" is characterised by the modest size of the parcels (0.3 hectare on average), thus offering a landscape of a marquetry of vines. In 2008, it comprised about 19,000 hectares for an average annual production of nearly one million hectolitres shared between 3,500 holdings. 18 cooperative cellars vinify a third of the volumes produced. The same year, the vineyard intended for the elaboration of wines benefiting from the term "Villages" comprised 6,300 hectares for an average production of 350,000 hectolitres.

Detailed information on the product

The red wines present a light robe, and are known for being smooth-drinking, fruity, floral wines that are appreciated from their youngest age. The wines benefiting from the term "villages" present a deeper robe and are often more fleshy. They can be kept for a few years. The rosé wines generally have a luminous robe, aromas of fruit, are round and fresh on the palate and are drunk rather young. The white wines, more confidential, often have aromas of fresh fruit, citrus, white flowers and sometimes a vanilla touch, if they have known the cask. The wines benefiting from the term "primeur" or "nouveau", reserved for red and rosé wines, are fresh and appetising, aromatic and fruity wines. They are intended for rapid consumption, in the months following their elaboration.

Causal link

Extending over some fifty kilometres, from the south of Mâcon to the gates of Lyon, the "Beaujolais" is an original vineyard. While the relief of the hinterland reaches 1,000 metres of altitude, the vine, for its part, does not exceed 550 metres. It largely occupies the slopes exposed to the rising sun, benefiting from a temperate climate, regularly watered and bathing in a luminous atmosphere already recalling the South and the Rhône valley. The screen formed by the "Monts du Beaujolais", to the west, gives the geographical area conditions of luminosity and rainfall particularly favourable to the ripeness, the concentration and the good sanitary condition of the grapes.

Beneath an apparent unity, the geographical area nevertheless offers a certain diversity, both in the geology and the landscapes. This diversity is expressed in the palette of the wines. Rather powerful and coloured in the North, on acidic soils, they are generally more fruity and light, in the South, on mainly limestone substrates. The parcels delimited for the harvesting of the grapes are established on the poor and well-drained soils of the granitic and clayey-limestone hillsides. The relief and the wide opening towards the east protect the grape from the morning dews, while the altitude of the hillsides preserves the vineyard from the winter fogs that frequently flood the Saône valley. The vines intended for the production of wines benefiting from the term "Villages" are exclusively established on parcels presenting acidic soils, in the northern part of the geographical area, on the Palaeozoic substrates or the Quaternary deposits arising from them.

Over the generations, people have learned to take advantage of the characteristics of their territory and have adapted the vinification techniques of the gamay N variety. Thanks to the particular expression of the latter, the vineyard of the "Beaujolais" has individualised itself by a very affirmed orientation towards the production of wines appreciated young. These new wines are by nature juvenile wines that reveal the aromatic richness of the year and give a glimpse of the qualities of power and balance that will be revealed by a perhaps longer maceration but above all by a period of ageing. Thus, for the wines benefiting from the

term “primeur” or “nouveau”, the vinification is oriented so as to favour fruitiness, suppleness and freshness. The vatting of the wines intended for ageing is generally more pushed in order to develop aromatic complexity and tannic structure, favourable to good ageing.

The clayey soils of the geographical area of the controlled designation of origin “Beaujolais” make it possible to elaborate cuvées rich in colour and supple. The parcels intended for the production of wines benefiting from the term “Villages”, established on sandy soils arising from the crystalline rock, offer the possibility of elaborating balanced, harmonious wines presenting a long aromatic persistence.

Despite the ease of consumption of the wines represented by the Lyon conurbation, this vineyard was able, well before the railways, to direct towards Paris a significant part of its production. From the 19th to the 20th century, the wines of the “Beaujolais” take advantage of the momentum represented by their positioning in Paris and Lyon to ensure a diffusion throughout France and the whole world. The “Beaujolais” is sometimes presented as “the third river of Lyon”, after the Saône and the Rhône, to refer to its popularity. As early as the 19th century, the producers and merchants are accustomed to marketing their harvest very early. In the 1950s, the local trade organises and pushes the marketing of the primeur wines. The numerous tasting cellars and the brand-new wine route make it possible to attract the consumer and to make them discover the riches of the “Beaujolais”.

8. Additional conditions

Legal framework: In national legislation

Type of additional condition: Derogation relating to production in the delimited geographical area.

Description of the condition: The immediate proximity area, defined by derogation for the vinification, the elaboration and the ageing of the wines, is made up of the territory of the following communes:

Côte-d'Or department: Agencourt, Aloxe-Corton, Ancey, Arcenant, Argilly, Autricourt, Auxey-Duresses, Baubigny, Beaune, Belan-sur-Ource, Bévy, Bissey-la- Côte, Bligny-lès-Beaune, Boncourt-le-Bois, Bouix, Bouze-lès-Beaune, Brion-sur- Ource, Brochon, Cérilly, Chamboeuf, Chambolle-Musigny, Channay, Charrey-sur- Seine, Chassagne-Montrachet, Châtillon-sur-Seine, Chaumont-le-Bois, Chaux, Chenôve, Chevannes, Chorey-lès-Beaune, Clémencey, Collonges-lès-Bévy, Combertault, Comblanchien, Corcelles-les-Arts, Corcelles-les-Monts, Corgoloin, Cormot-le-Grand, Corpeau, Couchey, Curley, Curtil-Vergy, Daix, Dijon, Ebaty, Echevronne, Epernay-sous-Gevrey, L'Etang-Vergy, Etrochey, Fixin, Flagey-Echézeaux, Flavignerot, Fleurey-sur-Ouche, Fussey, Gerland, Gevrey- Chambertin, Gilly-lès-Cîteaux, Gomméville, Grancey-sur-Ource, Griselles, Ladoix- Serrigny, Lantenay, Larrey, Levernois, Magny-lès-Villers, Mâlain, Marcenay, Marey-lès-Fussey, Marsannay-la-Côte, Massingy, Mavilly-Mandelot, Meloisey, Merceuil, Messanges, Meuilley, Meursanges, Meursault, Molesme, Montagny-lès- Beaune, Monthelie, Montliot-et-Courcelles, Morey-Saint-Denis, Mosson, Nantoux, Nicey, Noiron-sur-Seine, Nolay, Nuits-Saint-Georges, Obtrée, Pernand- Vergelesses, Perrigny-lès-Dijon, Plombières-lès-Dijon, Poinçon-lès-Larrey, Pommard, Pothières, Premeaux-Prissey, Prusly-sur-Ource, Puligny-Montrachet, Quincey, Reulle-Vergy, La Rochepot, Ruffey-lès-Beaune, Saint-Aubin, Saint- Bernard, Saint-Philibert, Saint-Romain, Sainte-Colombe-sur-Seine, Sainte-Marie- la-Blanche, Santenay, Savigny-lès-Beaune, Segrois, Tailly, Talant, Thoires, Vannaire, Vauchignon, Velars-sur-Ouche, Vertault, Vignoles, Villars-Fontaine, Villebichot, Villedieu, Villers-la-Faye, Villers-Patras, Villy-le-Moutier, Vix, Volnay, Vosne-Romanée et Vougeot

Rhône department: Avenas, Chasselay, Dardilly, Dracé, Fleurieux-sur- l'Arbresle, Sain-Bel, Taponas, Villefranche-sur-Saône

Saône-et-Loire department: Aluze, Ameugny, Azé, Barizey, Beaumont-sur- Grosne, Berzé-la-Ville, Berzé-le-Châtel, Bissey-sous-Cruchaud, Bissy-la- Mâconnaise, Bissy-sous-Uxelles, Bissy-sur-Fley, Blanot, Bonnay, Bouzeron, Boyer, Bray, Bresse-sur-Grosne, Burgy, Burnand, Bussières, Buxy, Cersot, Chagny, Chalon-sur-Saône, Chamilly, Champagny-sous-Uxelles, Champforgeuil, Change, Chapaize, La Chapelle-de-Bragny, La Chapelle-sous-Brancion, Charbonnières, Chardonnay, La Charmée, Charnay-lès-Mâcon, Charrecey, Chassey-le-Camp, Château, Châtenoy-le-Royal, Chaudenay, Cheilly-lès- Maranges, Chenôves, Chevagny-les-Chevrières, Chissey-lès-Mâcon, Clessé, Cluny, Cormatin, Cortambert, Cortevaix, Couches, Créot, Cruzille, Culles-les- Roches, Curtil-sous-Burnand, Davayé, Demigny, Dennevy, Dezize-lès-Maranges, Donzy-le-National, Donzy-le-Pertuis, Dracy-le-Fort, Dracy-lès-Couches, Epertully, Etrigny,

Farges-lès-Chalon, Farges-lès-Mâcon, Flagy, Fleurville, Fley, Fontaines, Fuissé, Genouilly, Germagny, Givry, Granges, Grevilly, Hurigny, Igé, Jalogny, Jambles, Jugy, Jully-lès-Buxy, Lacrost, Laives, Laizé, Lalheue, Lournand, La Loyère, Lugny, Mâcon, Malay, Mancey, Martailly-lès-Brancion, Massilly, Massy, Mellecey, Mercurey, Messey-sur-Grosne, Milly-Lamartine, Montagny-lès-Buxy, Montbellet, Montceaux-Ragny, Moroges, Nanton, Ozenay, Paris-l'Hôpital, Péronne, Pierreclos, Plottes, Préty, Prissé, Remigny, La Roche-Vineuse, Rosey, Royer, Rully, Saint-Albain, Saint-Ambreuil, Saint-Boil, Saint-Clément-sur-Guye, Saint-Denis-de-Vaux, Saint-Désert, Saint-Gengoux-de-Scissé, Saint-Gengoux-le- National, Saint-Germain-lès-Buxy, Saint-Gervais-sur-Couches, Saint-Gilles, Saint- Jean-de-Trézy, Saint-Jean-de-Vaux, Saint-Léger-sur-Dheune, Saint-Mard-de- Vaux, Saint-Martin-Belle-Roche, Saint-Martin-du-Tartre, Saint-Martin-sous-Montaigu, Saint-Maurice-de-Satonnay, Saint-Maurice-des-Champs, Saint-Maurice- lès-Couches, Saint-Pierre-de-Varennes, Saint-Rémy, Saint-Sernin-du-Plain, Saint- Vallerin, Saint-Ythaire, Saisy, La Salle, Salornay-sur-Guye, Sampigny-lès- Maranges, Sancé, Santilly, Sassangy, Saules, Savigny-sur-Grosne, Sennecey-le- Grand, Senozan, Sercy, Serrières, Sigy-le-Châtel, Sologny, Solutré-Pouilly, Taizé, Tournus, Uchizy, Varennes-lès-Mâcon, Vaux-en-Pré, Vergisson, Vers, Verzé, Le Villars, La Vineuse, Vinzelles et Viré

l'Yonne department: Accolay, Aigremont, Annay-sur-Serein, Arcy-sur-Cure, Asquins, Augy, Auxerre, Avallon, Bazarnes, Beine, Bernouil, Béru, Bessy-sur- Cure, Bleigny-le-Carreau, Censy, Chablis, Champlay, Champs-sur-Yonne, Champvallon, Chamvres, La Chapelle-Vaupelteigne, Charentenay, Châtel-Gérard, Chemilly-sur-Serein, Cheney, Chevannes, Chichée, Chitry, Collan, Coulangeron, Coulanges-la-Vineuse, Courgis, Cravant, Cruzy-le-Châtel, Dannemoine, Dyé, Epineuil, Escamps, Escolives-Sainte-Camille, Fleys, Fontenay-près-Chablis, Gy- l'Evêque, Héry, Irancy, Island, Joigny, Jouancy, Junay, Jussy, Lichères-près- Aigremont, Lignorelles, Ligny-le-Châtel, Lucy-sur-Cure, Maligny, Mélisey, Merry- Sec, Migé, Molay, Molosmes, Montigny-la-Resle, Mouffy, Moulins-en-Tonnerrois, Nitry, Noyers, Ouanne, Paroy-sur-Tholon, Pasilly, Pierre-Perthuis, Poilly-sur- Serein, Pontigny, Préhy, Quenne, Roffey, Rouvray, Sacy, Saint-Bris-le-Vineux, Saint-Cyr-les-Colons, Saint-Père, Sainte-Pallaye, Sainte-Vertu, Sarry, Senan, Serrigny, Tharoiseau, Tissey , Tonnerre, Tronchoy, Val-de-Mercy, Vallan, Venouse, Venoy, Vermenton, Vézannes, Vézelay, Vézinnes, Villeneuve-Saint- Salves, Villiers-sur-Tholon, Villy, Vincelles, Vincelottes, Viviers, Volgré et Yrouerre

Legal framework: In national legislation

Type of additional condition: Additional provision relating to labelling.

Description of the condition: - The name of the controlled designation of origin may be followed by the term "supérieur" according to the provisions set in the specification. - The name of the controlled designation of origin may be followed by the term "Villages" according to the provisions set in the specification. - The name of the controlled designation of origin may be followed by the name of the commune of provenance of the grapes according to the provisions set in the specification. - The name of the controlled designation of origin, whether or not followed by the term "Villages" or by the name of the commune of provenance of the grapes, may be supplemented by the term "primeur" or "nouveau" according to the provisions set in the specification. - The wines benefiting from the term "primeur" or "nouveau" are compulsorily presented with the indication of the vintage. - The name of the commune of provenance of the grapes follows the name of the controlled designation of origin and is printed in characters whose dimensions are identical, both in height and in width, to those of the characters composing the name of the controlled designation of origin. - The labelling of the wines benefiting from the controlled designation of origin may specify the name of a smaller geographical unit, provided that: - it is a registered cadastral lieu-dit; - it appears on the harvest declaration. The name of the registered cadastral lieu-dit is entered immediately after the name of the controlled designation of origin and printed in characters whose dimensions are not greater, both in height and in width, than half those of the characters composing the name of the controlled designation of origin. - The labelling of the wines benefiting from the controlled designation of origin may specify the larger geographical unit "Vin du Beaujolais".
