SPECIFICATION OF THE CONTROLLED DESIGNATION OF ORIGIN "MORGON"

CHAPTER I

I. – Name of the designation

Only wines meeting the specific provisions set out below may claim the controlled designation of origin "Morgon", initially recognised by the decree of 11 September 1936.

II. – Geographical denominations and complementary terms

The name of the controlled designation of origin may be supplemented by the indication of the term "cru du Beaujolais".

III. – Colour and types of product

The controlled designation of origin "Morgon" is reserved for still red wines.

IV. – Areas and zones in which the various operations are carried out

1° – Geographical area

The harvesting of the grapes, the vinification and the elaboration of the wines are carried out within the territory of the following commune of the Rhône department: Villié-Morgon.

2° – Delimited parcel area

The wines come exclusively from vines situated within the delimited parcel production area as approved by the National Institute of Origin and Quality at the sessions of the competent national committee of 8 November 1962, 5 and 6 November 1985, 22 and 23 May 2003, 9 June 2010.

The National Institute of Origin and Quality lodges with the town hall of the commune referred to in IV (1°) the graphic documents establishing the parcel boundaries of the production area thus approved.

3° – Immediate proximity area

The immediate proximity area, defined by derogation for the vinification and the elaboration of the wines, is made up of the territory of the following communes:

Côte-d'Or department: Agencourt, Aloxe-Corton, Ancey, Arcenant, Argilly, Autricourt, Auxey-Duresses, Baubigny, Beaune, Belan-sur-Ource, Bévy, Bissey-la-Côte, Bligny-lès-Beaune, Boncourt-le-Bois, Bouix, Bouze-lès-Beaune, Brion-sur-Ource, Brochon, Cérilly, Chamboeuf, Chambolle-Musigny, Channay, Charrey-sur-Seine, Chassagne-Montrachet, Châtillon-sur-Seine, Chaumont-le-Bois, Chaux, Chenôve, Chevannes, Chorey-lès-Beaune, Clémencey, Collonges-lès- Bévy, Combertault, Comblanchien, Corcelles-les-Arts, Corcelles-les-Monts, Corgoloin, Cormot-le- Grand, Corpeau, Couchey, Curley, Curtil-Vergy, Daix, Dijon, Ebaty, Echevronne, Epernay-sous- Gevrey, L'Etang-Vergy, Etrochey, Fixin, Flagey-Echézeaux, Flavignerot, Fleurey-sur-Ouche, Fussey, Gerland, Gevrey-Chambertin, Gilly-lès-Cîteaux, Gomméville, Grancey-sur-Ource, Griselles, Ladoix- Serrigny, Lantenay, Larrey, Levernois, Magny-lès-Villers, Mâlain, Marcenay, Marey-lès-Fussey, Marsannay-la-Côte, Massingy, Mavilly-Mandelot, Meloisey, Merceuil, Messanges, Meuilley, Meursanges, Meursault, Molesme, Montagny-lès-Beaune, Monthelie, Montliot-et-Courcelles, Morey- Saint-Denis, Mosson, Nantoux, Nicey, Noiron-sur-Seine, Nolay, Nuits-Saint-Georges, Obtrée, Pernand-Vergelesses, Perrigny-lès-Dijon, Plombières-lès-Dijon, Poinçon-lès-Larrey, Pommard, Pothières, Premeaux-Prissey, Prusly-sur-Ource, Puligny-Montrachet, Quincey, Reulle-Vergy, La Version n° 2 du 24/06/2010 2 / 13 Procédure nationale d'opposition suite à l'avis du comité national des appellations d'origine relatives aux vins et aux boisons alcoolisées, et des eaux-de-vie du 9 juin 2010 Cahier des charges de l'appellation d'origine contrôlée « Morgon » Rochepot, Ruffey-lès-Beaune, Saint-Aubin, Saint-Bernard, Saint-Philibert, Saint-Romain, Sainte- Colombe-sur-Seine, Sainte-Marie-la-Blanche, Santenay, Savigny-lès-Beaune, Segrois, Tailly, Talant, Thoires, Vannaire, Vauchignon, Velars-sur-Ouche, Vertault, Vignoles, Villars-Fontaine, Villebichot, Villedieu, Villers-la-Faye, Villers-Patras, Villy-le-Moutier, Vix, Volnay, Vosne-Romanée, Vougeot

Rhône department: Alix, Anse, L'Arbresle, Les Ardillats, Arnas, Bagnols, Beaujeu, Belleville, Belmont-d'Azergues, Blacé, Le Bois-d'Oingt, Le Breuil, Bully, Cercié, Chambost-Allières, Chamelet, Charentay, Charnay, Châtillon, Chazay-d'Azergues, Chénas, Chessy, Chiroubles, Cogny, Corcelles- en-Beaujolais, Dareizé, Denicé, Dracé, Emeringes, Fleurie, Frontenas, Gleizé, Jarnioux, Juliénas, Jullié, Lacenas, Lachassagne, Lancié, Lantignié, Légny, Létra, Liergues, Limas, Lozanne, Lucenay, Marchampt, Marcy, Moiré, Montmelas-Saint-Sorlin, Morancé, Nuelles, Odenas, Oingt, Les Olmes, Le Perréon, Pommiers, Pouilly-le-Monial, Quincié-en-Beaujolais, Régnié-Durette, Rivolet, Saint- Clément-sur-Valsonne, Saint-Cyr-le-Chatoux, Saint-Didier-sur-Beaujeu, Saint-Etienne-des-Oullières, Saint-Etienne-la-Varenne, Saint-Georges-de-Reneins, Saint-Germain-sur-l'Arbresle, Saint-Jean- d'Ardières, Saint-Jean-des-Vignes, Saint-Julien, Saint-Just-d'Avray, Saint-Lager, Saint-Laurent- d'Oingt, Saint-Loup, Saint-Romain-de-Popey, Saint-Vérand, Sainte-Paule, Salles-Arbuissonnas-en- Beaujolais, Sarcey, Taponas, Ternand, Theizé, Vaux-en-Beaujolais, Vauxrenard, Vernay, Villefranche-sur-Saône, Ville-sur-Jarnioux,

Saône-et-Loire department: Aluze, Ameugny, Azé, Barizey, Beaumont-sur-Grosne, Berzé-la- Ville, Berzé-le-Châtel, Bissey-sous-Cruchaud, Bissy-la-Mâconnaise, Bissy-sous-Uxelles, Bissy-sur- Fley, Blanot, Bonnay, Bouzeron, Boyer, Bray, Bresse-sur-Grosne, Burgy, Burnand, Bussières, Buxy, Cersot, Chagny, Chaintré, Chalon-sur-Saône, Chamilly, Champagny-sous-Uxelles, Champforgeuil, Chânes, Change, Chapaize, La Chapelle-de-Bragny, La Chapelle-de-Guinchay, La Chapelle-sous- Brancion, Charbonnières, Chardonnay, La Charmée, Charnay-lès-Mâcon, Charrecey, Chasselas, Chassey-le-Camp, Château, Châtenoy-le-Royal, Chaudenay, Cheilly-lès-Maranges, Chenôves, Chevagny-les-Chevrières, Chissey-lès-Mâcon, Clessé, Cluny, Cormatin, Cortambert, Cortevaix, Couches, Crêches-sur-Saône, Créot, Cruzille, Culles-les-Roches, Curtil-sous-Burnand, Davayé, Demigny, Dennevy, Dezize-lès-Maranges, Donzy-le-National, Donzy-le-Pertuis, Dracy-le-Fort, Dracy-lès-Couches, Epertully, Etrigny, Farges-lès-Chalon, Farges-lès-Mâcon, Flagy, Fleurville, Fley, Fontaines, Fuissé, Genouilly, Germagny, Givry, Granges, Grevilly, Hurigny, Igé, Jalogny, Jambles, Jugy, Jully-lès-Buxy, Lacrost, Laives, Laizé, Lalheue, Leynes, Lournand, La Loyère, Lugny, Mâcon, Malay, Mancey, Martailly-lès-Brancion, Massilly, Massy, Mellecey, Mercurey, Messey-sur-Grosne, Milly-Lamartine, Montagny-lès-Buxy, Montbellet, Montceaux-Ragny, Moroges, Nanton, Ozenay, Paris-l'Hôpital, Péronne, Pierreclos, Plottes, Préty, Prissé, Pruzilly, Remigny, La Roche-Vineuse, Romanèche-Thorins, Rosey, Royer, Rully, Saint-Albain, Saint-Ambreuil, Saint-Amour-Bellevue, Saint-Boil, Saint-Clément-sur-Guye, Saint-Denis-de-Vaux, Saint-Désert, Saint-Gengoux-de-Scissé, Saint-Gengoux-le-National, Saint-Germain-lès-Buxy, Saint-Gervais-sur-Couches, Saint-Gilles, Saint- Jean-de-Trézy, Saint-Jean-de-Vaux, Saint-Léger-sur-Dheune, Saint-Mard-de-Vaux, Saint-Martin-Belle-Roche, Saint-Martin-du-Tartre, Saint-Martin-sous-Montaigu, Saint-Maurice-de-Satonnay, Saint-Maurice-des-Champs, Saint-Maurice-lès-Couches, Saint-Pierre-de-Varennes, Saint-Rémy, Saint- Sernin-du-Plain, Saint-Symphorien-d'Ancelles, Saint-Vallerin, Saint-Vérand, Saint-Ythaire, Saisy, La Salle, Salornay-sur-Guye, Sampigny-lès-Maranges, Sancé, Santilly, Sassangy, Saules, Savigny-sur- Grosne, Sennecey-le-Grand, Senozan, Sercy, Serrières, Sigy-le-Châtel, Sologny, Solutré-Pouilly, Taizé, Tournus, Uchizy, Varennes-lès-Mâcon, Vaux-en-Pré, Vergisson, Vers, Verzé, Le Villars, La Vineuse, Vinzelles, Viré

Yonne department: Accolay, Aigremont, Annay-sur-Serein, Arcy-sur-Cure, Asquins, Augy, Auxerre, Avallon, Bazarnes, Beine, Bernouil, Béru, Bessy-sur-Cure, Bleigny-le-Carreau, Censy, Chablis, Champlay, Champs-sur-Yonne, Champvallon, Chamvres, La Chapelle-Vaupelteigne, Charentenay, Châtel-Gérard, Chemilly-sur-Serein, Cheney, Chevannes, Chichée, Chitry, Collan, Coulangeron, Coulanges-la-Vineuse, Courgis, Cravant, Cruzy-le-Châtel, Dannemoine, Dyé, Epineuil, Escamps, Escolives-Sainte-Camille, Fleys, Fontenay-près-Chablis, Gy-l'Evêque, Héry, Irancy, Island, Joigny, Jouancy, Junay, Jussy, Lichères-près-Aigremont, Lignorelles, Ligny-le-Châtel, Lucy-sur-Cure, Maligny, Mélisey, Merry-Sec, Migé, Molay, Molosmes, Montigny-la-Resle, Mouffy, Moulins-en- Tonnerrois, Nitry, Noyers, Ouanne, Paroy-sur-Tholon, Pasilly, Pierre-Perthuis, Poilly-sur-Serein, Pontigny, Préhy, Quenne, Roffey, Rouvray, Sacy, Saint-Bris-le-Vineux, Saint-Cyr-les-Colons, Saint- Père, Sainte-Pallaye, Sainte-Vertu, Sarry, Senan, Serrigny, Tharoiseau, Tissey , Tonnerre, Tronchoy, Version n° 2 du 24/06/2010 3 / 13 Procédure nationale d'opposition suite à l'avis du comité national des appellations d'origine relatives aux vins et aux boisons alcoolisées, et des eaux-de-vie du 9 juin 2010 Cahier des charges de l'appellation d'origine contrôlée « Morgon » Val-de-Mercy, Vallan, Venouse, Venoy, Vermenton, Vézannes, Vézelay, Vézinnes, Villeneuve-Saint- Salves, Villiers-sur-Tholon, Villy, Vincelles, Vincelottes, Viviers, Volgré, Yrouerre

V. – Grape varieties

1° – Grape varieties

The wines come from the following varieties: - main variety: gamay N; - accessory varieties: aligoté B, chardonnay B, gamay de Bouze N, gamay de Chaudenay N and melon B.

2° – Proportion rules on the holding

- The proportion of the accessory varieties gamay de Bouze N and gamay de Chaudenay N, together or separately, is less than or equal to 10 % of the grape varieties. - The other accessory varieties are authorised only as a mixture of plants in the vines; their total proportion is limited to 15 % within each parcel.

VI. – Management of the vineyard

1° – Training methods

a) – Planting density.
The vines present a minimum planting density of 6,000 plants per hectare. The spacing between rows may not be greater than 2.10 metres and the spacing between plants within the same row may not be less than 0.80 metre. From the date of approval of the present specification, the grubbing-up of rows within a parcel may not lead to a spacing between the widest rows greater than 3 metres.

b) – Pruning rules.
- Pruning is completed by 15 May. - The wines come from vines pruned according to the following provisions: by short pruning (trained in goblet, in fan or in single, double or “charmet” Royat cordon) with a maximum of 10 free eyes (buds) per plant. Each plant bears 3 to 5 spurs with a maximum of 2 free eyes. With a view to rejuvenation, each plant may also bear a spur with a maximum of 2 free eyes pruned on a water-shoot arising from the old wood. During formation pruning or during a change of the pruning method, the vines are pruned with a maximum of 12 free eyes per plant.

c) – Trellising rules and foliage height.
- Where the average spacing between rows is greater than or equal to 1.50 metre, the vines are trained with a fixed trellising. - The trellising is carefully made, solid and inert, with at least one carrier wire and a pair of lifting wires. - The height of the trellised foliage must be at least equal to 0.6 times the average spacing between rows, the height of trellised foliage being measured between the lower limit of the foliage, established at least 0.30 metre above the ground, and the upper topping limit, established at least 0.20 metre above the upper trellising wire(s). - For non-trellised vines, the foliage height must also be at least equal to 0.6 times the average spacing between rows, the foliage height being measured from at least 0.10 metre above the ground.

d) – Average maximum load per parcel.
The average maximum load per parcel is fixed at 10,000 kilograms per hectare.

e) – Threshold for missing vines.
The percentage of dead or missing vine plants referred to in Article D. 644-22 of the Rural Code is fixed at 20 %.

f) – Overall cultivation condition of the vine.
The parcels are managed so as to ensure a good overall cultivation condition of the vine, in particular its sanitary condition and the upkeep of its soil.

g) – Establishment and planting of the vineyard.
Before each new planting, every operator must carry out a physico-chemical analysis of the soil of the parcel in order to have all the elements necessary for the knowledge of the viticultural situation and of its potentialities.

2° – Other cultivation practices

a) – In order to preserve the characteristics of the soils that constitute a fundamental element of the terroir: - The permanent grassing of the headlands is compulsory. - Where the spacing between rows is greater than 1.50 metre, the inter-row must have a controlled plant cover, spontaneous or sown, at least during the winter and early-spring seasons. - Only developments or works before the planting of vines that do not entail a substantial modification of the topography, of the subsoil, of the arable layer or of the elements structuring the landscape of a parcel of the delimited area are authorised. - Any substantial modification of the morphology of the subsoil, of the arable layer or of the elements structuring the landscape of a parcel intended for the production of the controlled designation of origin is prohibited, with the exception of classic deep-ploughing works.

b) – Vine plantings and replacements may be carried out only with healthy plant material that has been the subject of a hot-water treatment or any other method making it possible to combat flavescence dorée.

3° – Irrigation

Irrigation is prohibited.

VII. – Harvest, transport and ripeness of the grapes

1° – Harvest

a) – The wines come from grapes harvested at proper ripeness.

b) – Particular harvesting provisions. The wines come from whole harvested grapes.

c) – Particular provisions for transport of the harvest. In the event of mechanical harvesting: - the height of the harvest in the containers ensuring the transport from the parcel to the vinification cellar does not exceed 0.50 metre; - the containers are of inert and food-grade material; - the harvesting and harvest-transport equipment must present an adapted water-drainage or protection system; - the sorting of the harvest is compulsory. It may be carried out either in the vineyard or in the cellar, subject to justification of adapted equipment. Sorting is defined as the elimination or separation of the bunches of grapes or berries altered by a disease (botrytis, powdery mildew, etc.) or of insufficiently ripe bunches and berries.

2° – Ripeness of the grapes

a) – Sugar richness of the grapes. Grapes presenting a sugar content lower than 180 grams per litre of must may not be considered as being at proper ripeness.

b) – Minimum natural alcoholic strength by volume. The wines present a minimum natural alcoholic strength by volume of 10.5 %.

VIII. – Yields. – Entry into production

1° – Yield, limit yield and maximum production yield

a) – The yield and the limit yield, referred to in Article D. 644-25 of the Rural Code, as well as the maximum production yield, are fixed at:

YIELD (hectolitres per hectare)	LIMIT YIELD (hectolitres per hectare)	MAXIMUM PRODUCTION YIELD (hectolitres per hectare)
56	61	70

b) – The maximum production yield corresponds to the total production of the claimed parcels, including that destroyed by sending to industrial uses in accordance with Article D. 644-32 of the Rural Code.

2° – Entry into production of young vines

The benefit of the controlled designation of origin may be granted to wines coming from:

- parcels of young vines only from the 2nd year following that in the course of which planting was carried out in place before 31 July;

- parcels of young vines only from the 1st year following that in the course of which grafting in place was carried out before 31 July;

- parcels of vines that have been top-grafted, at the earliest in the 1st year following that in the course of which the top-grafting was carried out before 31 July, and once the parcels no longer contain any varieties other than those permitted for the appellation. By way of derogation, in the year following that in the course of which the top-grafting was carried out before 31 July, the varieties permitted for the appellation may represent only 80 % of the grape varieties of each parcel concerned.

3° – Particular provisions

No further specific provision.

IX. – Processing, elaboration, ageing, packaging, storage

1° – General provisions

The wines are vinified in accordance with local, fair and constant usages.

a) – Reception and pressing. No specific provision.

b) – Blending of the varieties. Where wines are produced from parcels co-planted with accessory varieties, the wines are vinified by blending of the grapes concerned. The proportion of the gamay de Bouze N and gamay de Chaudenay N varieties, together or separately, is less than or equal to 10 % of the blend.

c) – Malolactic fermentation. The wines present, at the packaging stage, a maximum malic acid content of 0.4 gram per litre.

d) – Analytical standards. The finished wines, ready to be released for consumption within the meaning of Article D. 644-36-I of the Rural Code, present the following analytical standards:

ANALYTICAL PARAMETER	CONTENT
Maximum content of fermentable sugars (glucose and fructose) (grams per litre)	3
Maximum content of volatile acidity (milliequivalents per litre)	14.17

e) – Oenological practices and physical treatments. - Subtractive enrichment techniques (SET) are authorised within the limit of a maximum concentration rate of 10 %. - After enrichment, the wines present a total alcoholic strength by volume less than or equal to 13 %.

f) – Prohibited equipment. No specific provision.

g) – Overall capacity of the vinification vat room. Every operator must have an overall vinification vat capacity at least equal to 80 % of the volume of wine vinified during the previous harvest, entered either on the harvest declaration in proportion to the evolution of the area in production of the holding, or on the production declaration. The overall capacity of the vinification vat room is at least equal to the product of the area in production under the controlled designation of origin by the yield fixed at point VIII (1°).

h) – Temperature control. The operator is able to control the temperature of the musts and of the wines in fermentation. - The vinification cellar must present sufficient conditions for controlling the temperatures of the vinification vats. - The vat room for the vinification of grapes from a mechanical harvest is equipped with systems for regulating the fermentation temperatures.

i) – Good overall condition of upkeep of the cellar (floors and walls) and of the equipment (hygiene). The cellar (floors and walls) and the vinification equipment present a good general condition of upkeep.

2° – Provisions by type of product

No specific provision.

3° – Provisions relating to packaging

a) – For each packaged lot, the operator keeps available for the approved control body: - the information appearing in the register of handling operations referred to in Article D. 644-36 of the Rural Code; - the analysis reports carried out before packaging. The reports are kept for a period of six months from the date of packaging.

b) – The containers for volumes less than or equal to 1.5 litre are of glass.

4° – Provisions relating to storage

a) – The operator demonstrates a specific place for the storage of the packaged products. The temperature of the storage premises is controlled by an adapted insulation and must be less than or equal to 25 °C. The premises are equipped with temperature-measuring equipment.

b) – The temperature of the containers during the wine-conservation phase must be controlled and less than or equal to 25 °C.

5° – Provisions relating to the movement of products and to placing on the market for the consumer

a) – Date of placing on the market for the consumer. The wines are placed on the market for the consumer according to the provisions of Article D. 644-35 of the Rural Code.

b) – Period during which the wines may not move between approved warehouse keepers. No specific provision.

X. – Link with the geographical area

1° – Information on the geographical area

a) – Description of the natural factors contributing to the link

b) – Description of the human factors contributing to the link

2° – Information on the quality and characteristics of the product

3° – Causal interactions

[No text in this version of the specification.]

XI. – Transitional measures

1° – Planting density

Until the 2034 harvest inclusive, the partial grubbing-up of parcels of vines in place on 28 November 2004 is authorised, which may lead, after adaptation, to a minimum plant density of 5,000 plants per hectare. These parcels of vines continue to benefit, for their harvest, from the right to the controlled designation of origin until they are grubbed up and until the 2034 harvest inclusive. The spacing between rows may not be greater than 2.80 metres and the spacing between plants within the same row may not be greater than 1.10 metre.

2° – Trellising rules

The provision relating to the obligation of a carrier wire does not apply to parcels of vines in place on the date of approval of the present specification and spur-pruned.

3° – Average maximum load per parcel

The average maximum load per parcel is fixed at 9,000 kilograms per hectare for vines presenting a plant density of between 5,000 plants per hectare and 6,000 plants per hectare after adaptation by partial grubbing-up. The volume that may benefit from the right to the controlled designation of origin is established on the basis of the yield authorised for the controlled designation of origin, for the harvest concerned, to which the coefficient of 0.9 is applied.

4° – Vat capacity

Until the 2010 harvest inclusive, every operator must have a vinification vat capacity, for the red wines, at least equal to 60 % of the volume of wine vinified during the previous harvest, entered either on the harvest declaration in proportion to the evolution of the area in production of the holding, or on the production declaration. The vinification vats for the red wines may not be used for more than two vinifications during the same harvest.

XII. – Rules of presentation and labelling

Wines for which, under the terms of the present specification, the controlled designation of origin "Morgon" is claimed and which are presented under the said appellation may not be declared after the harvest, offered to the public, dispatched, put up for sale or sold unless, in the harvest declaration, in advertisements, on leaflets, labels, invoices and any containers whatsoever, the aforesaid controlled designation of origin is entered and accompanied by the term "Appellation d'origine contrôlée", all in very conspicuous characters.

CHAPTER II

I. – Declaration obligations

1. Claim declaration

The claim declaration must be sent to the defence and management body and to the approved control body at least fifteen working days before movement between approved warehouse keepers or packaging, and at the latest on 1 December of the year of harvest. It indicates in particular: - the designation claimed; - the term "nouveau" or "primeur" or "supérieur" where applicable; - the volume of the wine; - the EVV or SIRET number; - the name and address of the applicant; - the place of storage of the wine. It is accompanied by a copy of the harvest declaration and, as the case may be, a copy of the production declaration or an extract of the stock accounts for buyers of grapes and musts.

2. Prior declaration of transaction and removal

Every operator must declare each bulk transaction to the approved control body within time limits set in the control or inspection plan, between five and fifteen working days before any removal of the product. This declaration is accompanied, where applicable, by a copy of the purchase contract. It specifies in particular: - the identity of the operator; - the EVV or SIRET number; - the identification of the lot; - the volume of the lot; - the identification of the containers for non-packaged wines; - the identity of the buyer; - the number of the inter-trade purchase contract, where applicable. In the event of removals carried out for volumes lower than those determined in the transaction declaration, the operator must inform the approved control body in writing.

3. Declaration of release for consumption within the meaning of Article D. 644-36-I of the Rural Code

Each lot of wine intended to be released for consumption within the meaning of Article D. 644-36-I of the Rural Code must be the subject of a declaration to the approved control body within minimum time limits set in the control or inspection plan, between five and fifteen working days before the release for consumption. This declaration may also be established for already-packaged lots within minimum time limits set in the control or inspection plan, between five and fifteen working days before the dispatch of the lots concerned from the operator's cellars. It specifies in particular: - the identity of the operator; - the EVV or SIRET number; - the identification of the lot; - the volume of the lot; - the lot number for already-packaged wines; - the identification of the containers for non-packaged wines; - the date of packaging or the date scheduled for packaging.

4. Declaration relating to the dispatch outside the national territory of a non-packaged wine

Every operator wishing to carry out a dispatch outside the national territory of a non-packaged wine benefiting from the controlled designation of origin must declare it to the approved control body within time limits set in the control or inspection plan, between five and fifteen working days before any dispatch.

5. Fallback (repli) declaration

Every operator marketing a wine benefiting from the designation of origin under a more general appellation must declare it to the defence and management body and to the approved control body: - concomitantly with the prior transaction declaration if the wine is the subject of a bulk transaction after the fallback; - concomitantly with the packaging declaration if the wine is the subject of a packaging after the fallback; - within time limits set in the control or inspection plan, between five and fifteen working days following the recording of the fallback on the wine register, if the wine is the subject of a fallback after packaging. The defence and management body and the approved control body inform, respectively and without delay, the defence and management body of the more general appellation concerned and the approved control body for the more general appellation concerned.

6. Downgrading declaration

Every operator carrying out a downgrading of wines benefiting from the controlled designation of origin sends to the defence and management body and to the approved control body a quarterly summary.

7. Derogatory system

Operators who carry out at least forty-two preparations for release for consumption per year, within the meaning of Article D. 644-36-I of the Rural Code, may group together their fallback and release-for-consumption declarations. In this case, they must send to the approved control body the quarterly summary of all the declarations referred to at points 3 and 5 above.

8. Declaration of apparatus for SET

Every operator holding a concentration apparatus must declare it, as soon as it is purchased, to the defence and management body, specifying the specifications. The defence and management body keeps up to date the list of operators holding an apparatus and transmits it each year to the service of the National Institute of Origin and Quality at the latest on 1 September. Every operator calling upon a service provider declares it to the defence and management body, which draws up the list of these operators and transmits it each year to the service of the National Institute of Origin and Quality at the latest on 1 September.

9. Reworking of parcels

Before any development or any works modifying the topography, the subsoil, the arable layer (including any addition of exogenous soil) or the elements structuring the landscape of a delimited parcel intended for the production of the controlled designation of origin, with the exception of classic deep-ploughing works, a declaration must be sent by the operator to the defence and management body at least 4 weeks before the date scheduled for the start of the envisaged works. The defence and management body transmits, without delay, a copy of this declaration to the services of the National Institute of Origin and Quality.

10. Declaration of adaptation of the vine density by partial grubbing-up

Every operator carrying out an adaptation of the vine density by partial grubbing-up sends a declaration to the defence and management body, at the latest on 31 July of the campaign during which this operation is carried out. The declaration specifies, for the parcel(s) or parts of parcels concerned: - the cadastral reference; - the area; - the new plant density.

II. – Keeping of registers

1. General plan of the storage premises

Every vinifying operator must keep up to date and available for the approved control body a general plan of the storage premises, allowing in particular the number, designation and capacity of the containers to be identified.

2. SET register

Every operator implementing the partial concentration of musts must keep up to date a SET register comprising in particular: - the identification of the initial lot (volume and potential alcoholic strength); - the volume of water evaporated; - the identification of the lot after concentration (volume and potential alcoholic strength).

CHAPTER III

I – Main points to be checked and evaluation methods

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
A – STRUCTURAL RULES	
A1 – Location of the operators in the immediate proximity area	Documentary check
A2 – Belonging of the planted parcels to the delimited area	Documentary check (up-to-date CVI parcel record); visit in the field
A3 – Claimable production potential (grape varieties and proportion rules, monitoring of any derogatory measures, planting density and trellising)	Documentary check; visit in the field
A4 – Processing, packaging and storage facilities	
Overall vinification vat capacity	Documentary check; on-site visit
Condition of upkeep of the cellar and equipment (hygiene)	On-site visit
Storage place and storage conditions	Documentary check; on-site visit
B – RULES LINKED TO THE PRODUCTION CYCLE	
B1 – Management of the vineyard. — Pruning	Visit in the field
Average maximum load per parcel	Visit in the field
Cultivation condition of the vine and other cultivation practices	Visit in the field
B2 – Harvest, transport and ripeness of the grapes. — Ripeness of the grapes	Documentary check; visit in the field
Particular provision for transport of the harvest	Documentary check; visit in the field
B3 – Processing, elaboration, ageing, packaging, storage. — Oenological practices or treatments (enrichment, prohibited practices…)	Documentary check; on-site visit
Stock accounts, analytical traceability	Documentary check
B4 – Harvest declaration and claim declaration	
Missing vines	Documentary check (register keeping); visit in the field
Authorised yield	Documentary check (check of declarations, monitoring of the authorisations granted by the INAO services, after enquiry by the said services upon individual request of the operator)
VSI, volumes harvested in excess of the authorised yield	Documentary check: monitoring of destruction certificates
