Specification of the controlled designation of origin "RÉGNIÉ"

CHAPTER I

I. – Name of the designation

Only wines meeting the specific provisions set out below may claim the controlled designation of origin "Régnié", initially recognised by the decree of 20 December 1988.

II. – Geographical denominations and complementary terms

No particular provision.

III. – Colour and types of product

The controlled designation of origin "Régnié" is reserved for still red wines.

IV. – Areas and zones in which the various operations are carried out

1° – Geographical area

The harvesting of the grapes, the vinification, the elaboration and the ageing of the wines take place within the territory of the following communes of the Rhône department, on the basis of the 2022 Official Geographic Code: Régnié-Durette and Lantignié.

The cartographic documents representing the geographical area may be consulted on the INAO website.

2° – Delimited parcel area

The wines come exclusively from vines situated within the delimited parcel production area as approved by the National Institute of Origin and Quality at the sessions of the competent national committee of 2 and 3 June 1988.

The National Institute of Origin and Quality lodges with the town halls of the communes referred to in 1° the graphic documents establishing the parcel boundaries of the production area thus approved.

3° – Immediate proximity area

The immediate proximity area, defined by derogation for the vinification, the elaboration and the ageing of the wines, is made up of the territory of the following communes, on the basis of the 2022 Official Geographic Code:

- Côte-d'Or department: Agencourt, Aloxe-Corton, Ancey, Arcenant, Argilly, Autricourt, Auxey-Duresses, Baubigny, Beaune, Belan-sur-Ource, Bévy, Bissey-la-Côte, Bligny-lès-Beaune, Boncourt-le-Bois, Bouix, Bouze-lès-Beaune, Brion-sur-Ource, Brochon, Cérilly, Chamboeuf, Chambolle-Musigny, Channay, Charrey-sur-Seine, Chassagne-Montrachet, Châtillon-sur-Seine, Chaumont-le-Bois, Chaux, Chenôve, Chevannes, Chorey-lès-Beaune, Collonges-lès-Bévy, Combertault, Comblanchien, Corcelles-les-Arts, Corcelles-les-Monts, Corgoloin, Cormot-Vauchignon, Corpeau, Couchey, Curley, Curtil-Vergy, Daix, Dijon, Ebaty, Echevronne, Epernay-sous-Gevrey, L'Etang-Vergy, Etrochey, Fixin, Flagey-Echézeaux, Flavignerot, Fleurey-sur-Ouche, Fussey, Gerland, Gevrey-Chambertin, Gilly-lès-Cîteaux, Gomméville, Grancey-sur-Ource, Griselles, Ladoix-Serrigny, Lantenay, Larrey, Levernois, Magny-lès-Villers, Mâlain, Marcenay, Marey-lès-Fussey, Marsannay-la-Côte, Massingy, Mavilly-Mandelot, Meloisey, Merceuil, Messanges, Meuilley, Meursanges, Meursault, Molesme, Montagny-lès-Beaune, Monthelie, Montliot-et-Courcelles, Morey-Saint-Denis, Mosson, Nantoux, Nicey, Noiron-sur-Seine, Nolay, Nuits-Saint-Georges, Obtrée, Pernand-Vergelesses, Perrigny-lès-Dijon, Plombières-lès-Dijon, Poinçon-lès-Larrey, Pommard, Pothières, Premeaux-Prissey, Prusly-sur-Ource, Puligny-

Montrachet, Quincey, Reulle-Vergy, La Rochepot, Ruffey-lès-Beaune, Saint-Aubin, Saint-Bernard, Saint-Philibert, Saint-Romain, Sainte-Colombe-sur-Seine, Sainte-Marie-la-Blanche, Santenay, Savigny-lès-Beaune, Segrois, Tailly, Talant, Thoires, Valforêt (only for the part corresponding to the territory of the former commune of Clémencey), Vannaire, Velars-sur-Ouche, Vertault, Vignoles, Villars-Fontaine, Villebichot, Villedieu, Villers-la-Faye, Villers-Patras, Villy-le-Moutier, Vix, Volnay, Vosne-Romanée and Vougeot;

- Rhône department: Alix, Anse, L'Arbresle, Les Ardillats, Arnas, Bagnols, Beaujeu, Belleville-en-Beaujolais, Belmont-d'Azergues, Blacé, Le Breuil, Bully, Cercié, Chambost-Allières, Chamelet, Charentay, Charnay, Chasselay, Châtillon, Chazay-d'Azergues, Chénas, Chessy, Chiroubles, Cogny, Corcelles-en-Beaujolais, Dardilly, Denicé, Deux Grosnes (only for the part corresponding to the territory of the former commune of Avenas), Dracé, Emeringes, Fleurie, Fleurieux-sur-l'Arbresle, Frontenas, Gleizé, Juliénas, Jullié, Lacenas, Lachassagne, Lancié, Légny, Létra, Limas, Lozanne, Lucenay, Marchampt, Marcy, Moiré, Montmelas-Saint-Sorlin, Morancé, Odenas, Le Perréon, Pommiers, Porte des Pierres Dorées, Quincié-en-Beaujolais, Rivolet, Sain-Bel, Saint-Clément-sur-Valsonne, Saint-Cyr-le-Chatoux, Saint-Didier-sur-Beaujeu, Saint-Etienne-des-Oullières, Saint-Etienne-la-Varenne, Saint-Georges-de-Reneins, Saint-Germain-Nuelles, Saint-Jean-des-Vignes, Saint-Julien, Saint-Just-d'Avray, Saint-Lager, Saint-Romain-de-Popey, Saint-Vérand, Sainte-Paule, Salles-Arbuissonnas-en-Beaujolais, Sarcey, Taponas, Ternand, Theizé, Val d'Oingt, Vaux-en-Beaujolais, Vauxrenard, Vernay, Villefranche-sur-Saône, Ville-sur-Jarnioux, Villié-Morgon, Vindry-sur-Turdine (only for the part corresponding to the territory of the former communes of Dareizé, Les Olmes and Saint-Loup);

- Saône-et-Loire department: Aluze, Ameugny, Azé, Barizey, Beaumont-sur-Grosne, Berzé-la-Ville, Berzé-le-Châtel, Bissey-sous-Cruchaud, Bissy-la-Mâconnaise, Bissy-sous-Uxelles, Bissy-sur-Fley, Blanot, Bonnay, Bouzeron, Boyer, Bray, Bresse-sur-Grosne, Burgy, Burnand, Bussières, Buxy, Cersot, Chagny, Chaintré, Chalon-sur-Saône, Chamilly, Champagny-sous-Uxelles, Champforgeuil, Chânes, Change, Chapaize, La Chapelle-de-Bragny, La Chapelle-de-Guinchay, La Chapelle-sous-Brancion, Charbonnières, Chardonnay, La Charmée, Charnay-lès-Mâcon, Charrecey, Chasselas, Chassey-le-Camp, Château, Châtenoy-le-Royal, Chaudenay, Cheilly-lès-Maranges, Chenôves, Chevagny-les-Chevrières, Chissey-lès-Mâcon, Clessé, Cluny, Cormatin, Cortambert, Cortevaix, Couches, Crêches-sur-Saône, Créot, Cruzille, Culles-les-Roches, Curtil-sous-Burnand, Davayé, Demigny, Dennevy, Dezize-lès-Maranges, Donzy-le-Pertuis, Dracy-le-Fort, Dracy-lès-Couches, Epertully, Etrigny, Farges-lès-Chalon, Farges-lès-Mâcon, Flagy, Fleurville, Fley, Fontaines, Fragnes-La-Loyère (only for the part corresponding to the territory of the former commune of La Loyère), Fuissé, Genouilly, Germagny, Givry, Granges, Grevilly, Hurigny, Igé, Jalogny, Jambles, Jugy, Jully-lès-Buxy, Lacrost, Laives, Laizé, Lalheue, Leynes, Lournand, Lugny, Mâcon, Malay, Mancey, Martailly-lès-Brancion, Massilly, Mellecey, Mercurey, Messey-sur-Grosne, Milly-Lamartine, Montagny-lès-Buxy, Montbellet, Montceaux-Ragny, Moroges, Nanton, Ozenay, Paris-l'Hôpital, Péronne, Pierreclos, Plottes, Préty, Prissé, Pruzilly, Remigny, La Roche-Vineuse, Romanèche-Thorins, Rosey, Royer, Rully, Saint-Albain, Saint-Ambreuil, Saint-Amour-Bellevue, Saint-Boil, Saint-Clément-sur-Guye, Saint-Denis-de-Vaux, Saint-Désert, Saint-Gengoux-de-Scissé, Saint-Gengoux-le-National, Saint-Germain-lès-Buxy, Saint-Gervais-sur-Couches, Saint-Gilles, Saint-Jean-de-Trézy, Saint-Jean-de-Vaux, Saint-Léger-sur-Dheune, Saint-Mard-de-Vaux, Saint-Martin-Belle-Roche, Saint-Martin-du-Tartre, Saint-Martin-sous-Montaigu, Saint-Maurice-de-Satonnay, Saint-Maurice-des-Champs, Saint-Maurice-lès-Couches, Saint-Pierre-de-Varennes, Saint-Rémy, Saint-Sernin-du-Plain, Saint-Symphorien-d'Ancelles, Saint-Vallerin, Saint-Vérand, Saint-Ythaire, Saisy, La Salle, Salornay-sur-Guye, Sampigny-lès-Maranges, Sancé, Santilly, Sassangy, Saules, Savigny-sur-Grosne, Sennecey-le-Grand, Senozan, Sercy, Serrières, Sigy-le-Châtel, Sologny, Solutré-Pouilly, Taizé, Tournus, Uchizy, Varennes-lès-Mâcon, Vaux-en-Pré, Vergisson, Vers, Verzé, Le Villars, La Vineuse sur Fregande (only for the part corresponding to the territory of the former communes of Donzy-le-National, Massy and La Vineuse), Vinzelles and Viré;

- Yonne department: Aigremont, Annay-sur-Serein, Arcy-sur-Cure, Asquins, Augy, Auxerre, Avallon, Bazarnes, Beine, Bernouil, Béru, Bessy-sur-Cure, Bleigny-le-Carreau, Censy, Chablis, Champlay, Champs-sur-Yonne, Chamvres, La Chapelle-Vaupelteigne, Charentenay, Châtel-Gérard, Chemilly-sur-Serein, Cheney, Chevannes, Chichée, Chitry, Collan, Coulangeron, Coulanges-la-Vineuse, Courgis, Cruzy-le-Châtel, Dannemoine, Deux Rivières, Dyé, Epineuil, Escamps, Escolives-Sainte-Camille, Fleys, Fontenay-près-Chablis, Gy-l'Evêque, Héry, Irancy, Island, Joigny, Jouancy, Junay, Jussy, Lichères-près-Aigremont, Lignorelles, Ligny-le-Châtel, Lucy-sur-Cure, Maligny, Mélisey, Merry-Sec, Migé, Môlay, Molosmes, Montigny-la-Resle, Montholon (only for the part corresponding to the territory of the former communes of Champvallon, Villiers sur Tholon and Volgré), Mouffy, Moulins-en-Tonnerrois, Nitry, Noyers, Ouanne, Paroy-sur-Tholon, Pasilly, Pierre-Perthuis, Poilly-sur-Serein, Pontigny, Préhy, Quenne, Roffey, Rouvray, Saint-Bris-le-Vineux, Saint-Cyr-les-Colons, Saint-Père, Sainte-Pallaye, Sainte-Vertu, Sarry, Senan, Serrigny, Tharoiseau, Tissey, Tonnerre, Tronchoy, Val-de-Mercy, Vallan, Venouse, Venoy, Vermenton, Vézannes, Vézelay, Vézinnes, Villeneuve-Saint-Salves, Villy, Vincelles, Vincelottes, Viviers and Yrouerre.

V. – Grape varieties

1° – Grape varieties

The wines are produced from the following varieties:

- main variety: gamay N;

- accessory varieties: aligoté B, chardonnay B and melon B.

2° – Proportion rules on the holding

The accessory varieties are authorised only as mixed plantings within the vines. Their total proportion is limited to 15 % within each parcel.

VI. – Management of the vineyard

1° – Training methods

a) – Planting density

GENERAL PROVISIONS

The vines have a minimum planting density of 6,000 plants per hectare. These vines have a spacing between rows of less than or equal to 2.10 metres and a spacing between plants within the same row of greater than or equal to 0.80 metre.

PARTICULAR PROVISIONS

Subject to compliance with the minimum density of 6,000 plants per hectare, and for the purposes of mechanisation, the vines may have inter-rows with a spacing of less than or equal to 3 metres.

These provisions do not apply to parcels planted on terraces. A vine parcel planted on terraces means a parcel benefiting from a particular development linked to the existing slope, carried out before the vines were planted, entailing a discontinuity in the usual planting spacing and making it impossible for machinery to pass between two successive levels. For vine parcels planted on terraces, the spacing between plants within the same row is greater than or equal to 0.80 metre.

b) – Pruning rules

- Pruning is completed by 15 May;

- The wines come from vines with short pruning (trained in gobelet, fan, or single, double or "charmet" Royat cordon) with a maximum of 10 free eyes per plant;

- Each plant bears 3 to 5 spurs with a maximum of 2 free eyes each; with a view to rejuvenation, each plant may also bear a spur with a maximum of 2 free eyes pruned on a water shoot growing from old wood;

- During formative pruning or a change of pruning method, the vines are pruned with a maximum of 12 free eyes per plant.

c) – Trellising and foliage height rules

- Where the average spacing between rows is greater than or equal to 1.50 metres, the vines are trained on a fixed trellis;

- The trellising is careful, solid and inert, with at least one carrying wire and one pair of lifting wires;

- The height of trellised foliage is at least equal to 0.6 times the average spacing between rows, the height of trellised foliage being measured between the lower limit of the foliage, set at least 0.30 metre above the ground, and the upper trimming limit, set at least 0.20 metre above the upper trellising wire(s);

- For untrellised vines, the height of foliage is also at least equal to 0.6 times the average spacing between rows;

- For vine parcels planted on terraces, the height of trellised foliage provides 1.4 square metres of external leaf-canopy surface for the production of one kilogram of grapes.

d) – Average maximum load per parcel

The average maximum load per parcel is set at 10,000 kilograms per hectare.

e) – Threshold of missing vines

- The percentage of dead or missing vine plants referred to in Article D. 645-4 of the Rural and Maritime Fishing Code is set at 20 %;

- For vines with an initial planting density greater than 8,000 plants per hectare, the percentage of dead or missing vine plants referred to in Article D. 645-4 of the Rural and Maritime Fishing Code is set at 30 %.

f) – Cultivation condition of the vine

The parcels are managed so as to ensure a good overall cultivation condition of the vine, in particular its sanitary condition and the upkeep of its soil.

g) – Establishment and planting of the vineyard

Before each new planting, every operator carries out a physico-chemical analysis of the soil of the parcel in order to have all the information needed to know the wine-growing situation and its potential.

2° – Other cultivation practices

a) – The addition of exogenous soil to parcels of the delimited parcel area is prohibited. Exogenous soil means soil that does not come from the delimited parcel area of the controlled designation of origin “Régnié”.

b) – In order to preserve the characteristics of the physical and biological environment, which constitutes a fundamental element of the terroir:

- Permanent grass cover of the headlands is compulsory;

- Where the spacing between rows is greater than 1.50 metres, the inter-row has a controlled plant cover, spontaneous or sown, at least during winter and early spring;

- Any substantial modification of the morphology, the subsoil, the arable layer or the elements guaranteeing the integrity and durability of the soils of a parcel intended for the production of the controlled designation of origin is prohibited, with the exception of classic deep-ploughing works; the elements guaranteeing the integrity and durability of the soils are maintained in accordance with usage.

c) – Hot-water treatment of standard plants and of plants from private nurseries is compulsory.

3° – Irrigation

Irrigation is prohibited.

VII. – Harvest, transport and ripeness of the grapes

1° – Harvest

a) – The wines come from grapes harvested at good ripeness.

b) – Particular provisions for harvesting and transport of the harvest

GENERAL PROVISIONS

Sorting of the harvest is compulsory. Sorting is carried out either in the vineyard or at the winery, in the latter case provided suitable equipment can be shown. Sorting is defined as the removal or separation of bunches of grapes or berries affected by disease (botrytis, powdery mildew, etc.) or of insufficiently ripe bunches and berries.

PROVISIONS RELATING TO MECHANICAL HARVESTING

a) – The height of the harvest in the containers used to transport it from the parcel to the vinification cellar does not exceed 0.50 metre;

b) – The containers are made of inert, food-grade material;

c) – The harvesting and harvest-transport equipment has an appropriate water-drainage or protection system.

2° – Ripeness of the grapes

The sugar content of the grapes and the natural alcoholic strength by volume of the wines meet the following characteristics:

MINIMUM SUGAR CONTENT OF THE GRAPES (grams per litre of must)	**MINIMUM NATURAL ALCOHOLIC STRENGTH BY VOLUME**
180	10.5 %

VIII. – Yields – Entry into production

1° – Yield and limit yield

a) – The yield and limit yield referred to in Article D. 645-7 of the Rural and Maritime Fishing Code are set at:

YIELD (hectolitres per hectare)	**LIMIT YIELD (hectolitres per hectare)**
56	61

b) – For vines planted on terraces, the volume that may benefit from the controlled designation of origin is the product of the area equal to the number of plants actually planted on the parcel concerned [N] multiplied by an area of 2 square metres, and the yield of the controlled designation of origin (R,

in hectolitres per hectare), i.e. the formula (N × 2) × (R / 10,000). The area equal to the number of plants actually planted on the parcel concerned multiplied by an area of 2 square metres per plant may not exceed the cadastral area of the parcel.

2° – Entry into production of young vines

The benefit of the controlled designation of origin may only be granted to wines coming from:

- parcels of young vines only from the 2nd year following that in the course of which planting was carried out in place before 31 July;

- parcels of young vines only from the 1st year following that in the course of which grafting in place was carried out before 31 July;

- parcels of vines that have been top-grafted, at the earliest in the 1st year following that in the course of which the top-grafting was carried out before 31 July, and once the parcels no longer contain any varieties other than those permitted for the appellation. By derogation, in the year following that in the course of which the top-grafting was carried out before 31 July, the varieties permitted for the appellation may represent only 80 % of the planting of each parcel concerned.

IX. – Processing, elaboration, ageing, packaging, storage

1° – General provisions

The wines are vinified in accordance with local, fair and constant usages.

a) – Blending of varieties

Wines produced from parcels planted with accessory varieties are vinified by blending the grapes concerned.

b) – Malolactic fermentation

At the packaging stage, the wines have a maximum malic acid content of 0.4 gram per litre.

c) – Analytical standards

Finished wines ready to be released for consumption within the meaning of Article D. 645-18-I of the Rural and Maritime Fishing Code meet the following analytical standards:

ANALYTICAL PARAMETER	**CONTENT**
Maximum fermentable sugar content (glucose and fructose) (grams per litre)	3
Maximum volatile acidity (milliequivalents per litre)	14.17

d) – Oenological practices and physical treatments

- The use of pieces of wood is prohibited;

- Subtractive enrichment techniques (TSE) are authorised within the limit of a concentration rate of 10 %;

- After enrichment, the wines have a total alcoholic strength by volume less than or equal to 13 %.

e) – Vat capacity

The overall vat capacity is at least equivalent to the product of the area in production under the controlled designation of origin and the yield set in 1° of point VIII.

f) – Temperature control

- The vinification cellar offers sufficient conditions for controlling the temperature of the vinification vats;

- The vats used to vinify grapes from mechanical harvesting are equipped with fermentation temperature regulation systems.

g) – Upkeep of the cellar and equipment

The cellar (floors and walls) and the vinification equipment are in a good general state of upkeep.

2° – Provisions by type of product

The wines are aged at least until 15 January of the year following that of the harvest.

3° – Provisions relating to packaging

a) – For every packaged lot, the operator keeps available for the approved control body:

- the information appearing in the register of handling operations referred to in Article D. 645-18 of the Rural and Maritime Fishing Code;

- the reports of analyses carried out before or after packaging. These analysis reports are kept for a period of 6 months from the date of packaging.

4° – Provisions relating to storage

a) – The operator provides evidence of a specific place for storing packaged products. The temperature of the storage premises is controlled by suitable insulation and is less than or equal to 25 °C. The premises are equipped with temperature-measuring equipment.

b) – The temperature of the containers during the keeping of the wines is controlled and less than or equal to 25 °C.

5° – Provisions relating to placing on the market for the consumer

At the end of the ageing period, the wines are placed on the market for the consumer from 1 February of the year following that of the harvest.

X. – Link with the geographical area

1° – Information on the geographical area

a) – Description of the natural factors contributing to the link

The geographical area extends along the eastern edge of the “Monts du Beaujolais”, below the “Fût d’Avenas”, a summit rising to 842 metres, 50 kilometres north of Lyon and 22 kilometres from Villefranche-sur-Saône. The landscape is undulating, punctuated by rounded ridges and hills covered with vines. The Ardières, a tributary of the Saône, forms its southern boundary. It thus covers the territory of the communes of Régnié-Durette and Lantignié, in the Rhône department.

The geographical area lies within the vast group of Primary-era metamorphic formations of the western edge of the Massif Central and, in particular, within the so-called “Fleurie” granite massif. This coarse-grained granite weathers into arènes, highly permeable sandy formations.

The parcels delimited for the harvesting of the grapes extend over all the slopes with a granitic substratum, at an altitude of between 250 metres and 450 metres, and have:

- shallow, sandy and very free-draining soils derived from the granitic arènes on the steep slopes in the centre and north;

- soils developed on colluvium and deep arènes of sandy-silty nature, more or less rich in clay, in the southern part, on gentler slopes;

- alluvial soils, developed on old terraces, with a clayey texture and often very stony at the surface, sometimes of compact structure.

The climate is oceanic, subject to continental and southern influences. Rainfall is evenly distributed over the year (750 millimetres per year on average) and the mean annual temperature is close to 11 °C. The "Monts du Beaujolais" play an essential role in providing protection from westerly winds, thereby attenuating the oceanic influence. The foehn effect they induce dries the moist air, increasing luminosity accordingly and reducing rainfall.

The broad Saône valley also plays a leading role in the development of the vine, offering great luminosity and carrying southern influences, marked in particular by strong summer heat.

b) – Description of the human factors contributing to the link

François MYARD, author in 1907 of the work "Le vigneronnage en Beaujolais", confirms the existence of a Gallo-Roman villa belonging to a certain REGINUS, who is said to have given his name to the commune. The organisation of the time shows the beginnings "of share-cropping of fruit, a system to which present-day vigneronnage is linked".

The abbey of Cluny seems to have owned vines near the village of Régnié. The Cluny charter records that, in 992, a man named UMFRED gave the abbey "the chapel of Sainte-Marie in the village of Dueri (Durette), situated in the country of Mâcon, and all that he owns in this parish in land, vines, meadows and mills". It is noted there that, in 1602, Durette had 15 "hearths" and that its territory was reputed "good for wine only".

The wines of "Régnié" have long been highly esteemed. From 1769, Régnié and Durette were among the 16 parishes of the Beaujolais region authorised to ship their wines to Paris. Regarding the linen industry in Rignyé (Régnié) in the 17th century, BONARDET states in his work "Histoire de Régnié" (1945): "the old (weaving) looms fell silent little by little because the Beaujolais soil was becoming covered with vines". Indeed, according to Lambert d'ANTIGNY, intendant of Police, Justice and Finance, a quarter of the territory was planted with vines.

The "Grange Charton" estate is located in Régnié. This superb 19th-century group of rural buildings, including winegrowers' dwellings, storehouses and cellars, is the seat of the "Hospices de Beaujeu" estate. Bequeathed to the Hospices by the DE MILLIERES sisters in 1809, the estate has grown over time through gifts and bequests of vines. The auction of the wines of the Hospices is the oldest known charity sale.

Previously the flagship of the controlled designation of origin "Beaujolais" wines with the mention "Villages", the wines were recognised as the controlled designation of origin "Régnié" by a decree of 20 December 1988.

The controlled designation of origin "Régnié" is characterised by the combination of traditions specific to the region and modern techniques.

The gamay N variety reigns supreme for the production of red wines. Known as a variety of low vigour but fertile and early-ripening, it is sensitive to late frost and fears sunscald. Producers seeking a quality wine have learned to control its growth, in particular through high planting density and short pruning. To ensure good ripeness of the grapes, the producer makes sure that the exposed leaf area is sufficient. The vines may thus be trained on a fixed trellis, which also facilitates mechanisation.

At the same time, and in accordance with current practice, producers have adopted a particular vinification in which traditional fermentation and semi-carbonic maceration coexist.

In 2010, 222 producers made 17,000 hectolitres from a vineyard covering an area of 400 hectares.

2° – Information on the quality and characteristics of the products

When young, the wines have a fine purplish-red colour that evolves over time towards garnet red. On the nose, they frequently show floral notes as well as red-fruit notes that take on spicy nuances as they evolve. On the palate, the wines have a clean attack, finesse and great suppleness. They are very fruity.

3° – Causal interactions

The geographical area of "Régnié" extends mainly over a granitic substratum or formations resulting from its weathering. The soils are generally sandy, acid, rather free-draining and thus of low fertility. In this natural setting the gamay N variety expresses itself fully and makes it possible to produce fruity, elegant wines, with a concentration and balance that guarantee good longevity. Variations in the nature of the soil, more or less clayey, sometimes rich in large granite or sandstone fragments, introduce nuances in the wines, which may be more structured when the grapes come from parcels with soils developed on clays or, on the contrary, more supple and fruity when the grapes come from parcels with soils developed on arènes.

The vineyard, at the heart of an undulating landscape, enjoys a favourable climate, protected from unfavourable winds by the "Fût d'Avenas", a wooded hill. Its opening onto the vast Saône plain ensures luminosity favourable to the chlorophyll activity of the vine. Its mid-slope situation allows it, most of the time, to escape spring frosts and the morning mists of the Saône plain and to benefit from optimal sunshine, while the slopes ensure rapid drainage of any excess rainwater. Enjoying a foehn effect thanks to the protection of the "Monts du Beaujolais", the east–west-oriented Ardières valley offers a general exposure favouring optimal and regular ripening of the grapes.

Producers have adopted practices, both in the vineyard and in the cellar, in order to make the most of these particular conditions. Adapting the vigour and production of the gamay N variety to the poverty of the arène soils through particular training and short pruning, together with vinification methods that preserve aromatic potential, make it possible to produce wines with a fruity expression in their youth and good keeping capacity.

Since 1967, producers have collectively offered, in the "Caveau des deux clochers", a range of carefully selected "Régnié" wines. They organise numerous events, shows and sporting meetings to make their village and their wine known. As the last communal controlled designation of origin to be recognised in the Beaujolais region, they present "Régnié" as the "Prince du Beaujolais".

XI. – Transitional measures

1° – Planting density, average maximum load per parcel and volume eligible for the right to the controlled designation of origin

a) – Up to and including the 2031 harvest, the partial grubbing-up of vine parcels in place on 28 November 2004 is authorised, which may lead, after adaptation, to a minimum planting density of 5,000 plants per hectare. These vine parcels continue to benefit, for their harvest, from the right to the controlled designation of origin until they are grubbed up and at the latest up to and including the 2034 harvest. For these vine parcels:

- The spacing between rows may not exceed 2.80 metres and the spacing between plants within the same row may not exceed 1.10 metres;

- The average maximum load per parcel is set at 9,000 kilograms per hectare;

- The volume that may benefit from the right to the controlled designation of origin is established on the basis of the yield authorised for the controlled designation of origin, for the harvest concerned, and:

– multiplied by a coefficient of 0.9 for vine parcels with a planting density of between 5,000 and 6,000 plants/ha whose partial grubbing-up took place up to and including the 2015 harvest;

– multiplied by a reduction coefficient equal to the ratio of the planting density of the parcel after partial grubbing-up, between 5,000 and 6,000 plants/ha, divided by the minimum planting density defined in 1 a) of VI of Chapter I of the present specification, for vine parcels whose partial grubbing-up takes place from the date of approval of the present specification.

b) – Vine parcels in place on 31 July 2009 with a spacing between plants within the same row of less than 0.80 metre continue to benefit, for their harvest, from the right to the controlled designation of origin until they are grubbed up.

2° – Trellising rules

The provision relating to the obligation of a carrying wire does not apply to vine parcels in place on 31 July 2009 and pruned with spurs.

XII. – Rules of presentation and labelling

1° – General provisions

Wines for which, under the terms of the present specification, the controlled designation of origin "Régnié" is claimed and which are presented under the said appellation may not be declared after the harvest, offered to the public, dispatched, put up for sale or sold unless, in the harvest declaration, in advertisements, on leaflets, labels, invoices and any containers whatsoever, the aforesaid controlled designation of origin is entered.

2° – Particular provisions

a) – The labelling of wines benefiting from the controlled designation of origin may specify the name of a smaller geographical unit, provided that:

- it is the name of a registered cadastral locality (lieu-dit cadastré);

- it appears on the harvest declaration.

The name of the registered cadastral locality is entered immediately after the name of the controlled designation of origin and printed in characters whose dimensions, both in height and in width, are not greater than those of the characters making up the name of the controlled designation of origin.

b) – The labelling of wines benefiting from the controlled designation of origin may specify the larger geographical unit "Vin du Beaujolais", "Grand Vin du Beaujolais" or "Cru du Beaujolais". The dimensions of the characters of the larger geographical unit are not greater, both in height and in width, than two-thirds of those of the characters making up the name of the controlled designation of origin.

CHAPTER II

I. – Declaration obligations

1. Claim declaration

The claim declaration is sent to the approved control body within a time limit set in the control plan, which may not be later than 31 December of the year of harvest. The approved control body transmits the information to the defence and management body without delay.

It indicates in particular:

- the controlled designation of origin under which the wine was claimed;

- the volume of the wine;

- the EVV or SIRET number;

- the name and address of the applicant;

- the place of storage of the wine.

It is accompanied by a copy of the harvest declaration and, as the case may be, a copy of the production declaration or an extract of the stock accounts for buyers of grapes and musts.

2. Declaration prior to transaction and collection

Every operator declares each bulk transaction to the approved control body within time limits set in the control plan. It specifies in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the controlled designation of origin under which the wine was claimed;

- the identification of the lot;

- the volume of the lot;

- the identification of the containers;

- the identity of the buyer;

- the number of the interprofessional purchase contract, where applicable.

Collection may only take place once the follow-up given to this declaration by the approved control body is known.

In the case of collections of volumes smaller than those set out in the transaction declaration, the operator informs the approved control body in writing.

3. Declaration of release for consumption within the meaning of Article D. 645-18-I of the Rural and Maritime Fishing Code

Each lot of wine intended for release for consumption within the meaning of Article D. 645-18-I of the Rural and Maritime Fishing Code is the subject of a declaration to the approved control body, in accordance with the procedures set in the control plan, before release for consumption or before the lots concerned are dispatched from the operator's cellars. It specifies in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the controlled designation of origin under which the wine was claimed;

- the identification of the lot;

- the volume of the lot;

- the lot number for wines already packaged;

- the identification of the containers for non-packaged wines;

- the date of packaging, where applicable.

4. Derogatory system

Operators may opt for a quarterly summary declaration of the declarations referred to in points 3 and 6. Any quarterly summary declaration must be sent to the approved control body no later than 10 working days after the end of the quarter concerned.

5. Declaration relating to the dispatch outside the national territory of a non-packaged wine

Every operator wishing to dispatch outside the national territory a non-packaged wine benefiting from the controlled designation of origin declares it to the approved control body before any dispatch, taking into account the time needed by the control body to process the declaration, which is set in the control plan. Collection may only take place once the follow-up given to this declaration by the approved control body is known.

6. Fallback declaration

Every operator carrying out a fallback of a wine benefiting from the controlled designation of origin to a more general controlled designation of origin sends the defence and management body and the approved control body a declaration:

- at the same time as the declaration prior to transaction, if the wine is the subject of a bulk transaction after the fallback;

- at the same time as the declaration of release for consumption, if the wine is released for consumption after the fallback;

- within time limits set in the control plan following the recording of the fallback in the wine register, if the wine is the subject of a fallback after the declaration of release for consumption.

This declaration indicates in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the more general controlled designation of origin of the fallback;

- the volume subject to the fallback;

- the vintage;

- the state of the lot subject to the fallback (bulk, bottle, airtight vacuum containers, …);

- the date of the fallback.

The defence and management body and the approved control body send, respectively and without delay, a copy of the declaration to the defence and management body of the more general appellation concerned and to the approved control body for the more general appellation concerned.

7. Downgrading declaration

Every operator carrying out a downgrading of wines benefiting from the controlled designation of origin sends the defence and management body and the approved control body a quarterly summary.

8. Declaration of equipment for TSE

Every operator holding a concentration apparatus declares it upon purchase to the defence and management body, specifying its specifications. The defence and management body keeps an up-to-date list of operators holding such equipment and sends it each year to the services of the National Institute of Origin and Quality at the latest on 1 September.

Every operator using a service provider declares it to the defence and management body, which draws up the list of these operators and sends it each year to the services of the National Institute of Origin and Quality at the latest on 1 September.

9. Reworking of parcels

Before any addition of soil, any development or any works liable to modify the morphology, the subsoil, the arable layer or the elements guaranteeing the integrity and durability of the soils of a parcel intended for the production of the controlled designation of origin, with the exception of classic deep-ploughing works, the operator sends a declaration to the defence and management body at least four weeks before the planned start date of the works. The defence and management body transmits, without delay, a copy of this declaration to the services of the National Institute of Origin and Quality.

10. Declaration of adaptation of vine density by partial grubbing-up

Every operator adapting the density of vines by partial grubbing-up sends a declaration to the defence and management body at the latest on 31 July of the wine-growing year in which this operation is carried out.

For the parcel(s) or parts of parcels concerned, the declaration specifies:

- the cadastral reference;

- the area;

- the new planting density.

II. – Keeping of registers

1. General plan of the storage places

Every vinifying operator keeps up to date and available for the approved control body a general plan of the storage places, allowing in particular the number, designation and capacity of the containers to be identified.

2. TSE register

Every operator carrying out partial concentration of musts keeps an up-to-date TSE register including in particular:

- the initial volume;

- the volume of water evaporated;

- the identification of the lot after concentration (volume and potential alcoholic strength).

CHAPTER III

I. – Main points to be checked and evaluation methods

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
A – STRUCTURAL RULES	
A1 – Location of operators within the immediate proximity area	Documentary check
A2 – Belonging of the planted parcels to the delimited area	– Documentary check; – Field check.

MAIN POINTS TO BE CHECKED	**EVALUATION METHODS**
A3 – Claimable production potential (grape varieties and proportion rules, monitoring of transitional measures, planting density and trellising)	– Documentary check; – Field check.
A4 – Processing, packaging and storage facilities	
Vat capacity	– Documentary check; – On-site check.
Ageing (temperature control, length of ageing)	– Documentary check; – On-site check.
State of upkeep of the cellar and equipment (hygiene)	On-site check
Storage place and storage conditions	– Documentary check; – On-site check.
B – RULES LINKED TO THE PRODUCTION CYCLE	
B1 – Management of the vineyard	
Pruning	Field check
Average maximum load per parcel	Field check
Cultivation condition of the vine and other cultivation practices	Field check
B2 – Harvest, transport and ripeness of the grapes	
Ripeness of the grapes	– Documentary check; – Field check.
Particular provision for transport of the harvest	– Documentary check; – Field check.
B3 – Processing, elaboration, ageing, packaging, storage	
Oenological practices or treatments (enrichment, prohibited practices…)	– Documentary check; – On-site check.
Stock accounts, analytical traceability	Documentary check
B4 – Harvest declaration and claim declaration	
Missing vines	– Documentary check (keeping the list up to date); – Field check.
Authorised yield	Documentary check (check of declarations, monitoring of authorisations granted by the INAO services after their investigation of the operator's individual request)
VSI, volumes harvested in excess of the authorised yield	Documentary check: monitoring of destruction certificates
Claim declaration	Documentary check and on-site check: compliance with procedures and time limits, consistency with the harvest and production declarations
C – CHECKS ON THE PRODUCTS	
Non-packaged wines (at transaction or collection)	Analytical and organoleptic examination
Packaged wines (before or after preparation for release for consumption)	Analytical and organoleptic examination
Non-packaged wines intended for dispatch outside the national territory	Analytical and organoleptic examination of all lots

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
D – PRESENTATION OF THE PRODUCTS	
Labelling	On-site check

II. – References concerning the control structure

Institut National de l'Origine et de la Qualité (INAO)

TSA 30003 – 93555 MONTREUIL Cedex

Tel.: (33) (0)1.73.30.38.00 – Fax: (33) (0)1.73.30.38.04 – Email: contact@inao.gouv.fr

Compliance with the present specification is checked on the basis of an approved control plan by a third-party body offering guarantees of competence, impartiality and independence, to which the INAO has delegated this task.
