Published in the Official Bulletin (BO) of the Ministry of Agriculture (MASA) on 13 February 2025

Specification of the controlled designation of origin "CHABLIS GRAND CRU"

approved by the order of 24 October 2024 published in the JORF of 9 November 2024

CHAPTER I

I. – Name of the designation

Only wines meeting the specific provisions set out below may claim the controlled designation of origin "Chablis grand cru", initially recognised by the decree of 13 January 1938.

II. – Geographical denominations and complementary terms

The name of the controlled designation of origin may be followed by the name of one of the following climats, for wines meeting the production conditions laid down in the present specification for the indication of one of these names:

- "Blanchot";
- "Bougros";
- "Grenouilles";
- "Les Clos";
- "Preuses";
- "Valmur";
- "Vaudésir".

III. – Colour and types of product

The controlled designation of origin "Chablis grand cru" is reserved for still white wines.

IV. – Areas and zones in which the various operations are carried out

1° – Geographical area

The harvesting of the grapes, the vinification, the elaboration and the ageing of the wines are carried out within the territory of the commune of Chablis in the Yonne department.

The cartographic documents representing the geographical area may be consulted on the website of the National Institute of Origin and Quality.

2° – Delimited parcel area

a) – The wines come exclusively from vines situated within the delimited parcel production area as approved by the National Institute of Origin and Quality at the session of the competent national committee of 30 November 2023.

The National Institute of Origin and Quality lodges with the town hall of the commune referred to in 1° the graphic documents establishing the parcel boundaries of the production area thus approved.

b) – Where the name of the controlled designation of origin is followed by the name of a climat, the wines come exclusively from vines situated within the specific delimited parcel production area as approved by the National Institute of Origin and Quality at the session of the competent national committee of 30 November 2023.

The National Institute of Origin and Quality lodges with the town hall of the commune referred to in 1° the graphic documents establishing the parcel boundaries of the production area thus approved.

3° – Immediate proximity area

The immediate proximity area, defined by derogation for the vinification, the elaboration and the ageing of the wines, is made up of the territory of the following communes, on the basis of the official geographic code of the year 2023:

- Côte-d'Or department: Agencourt, Aloxe-Corton, Ancey, Arcenant, Argilly, Autricourt, Auxey-Duresses, Baubigny, Beaune, Belan-sur-Ource, Bévy, Bissey-la-Côte, Bligny-lès-Beaune, Boncourt-le-Bois, Bouix, Bouze-lès-Beaune, Brion-sur-Ource, Brochon, Cérilly, Chambœuf, Chambolle-Musigny, Channay, Charrey-sur-Seine, Chassagne-Montrachet, Châtillon-sur-Seine, Chaumont-le-Bois, Chaux, Chenôve, Chevannes, Chorey-lès-Beaune, Collonges-lès-Bévy, Combertault, Comblanchien, Corcelles-les-Arts, Corcelles-les-Monts, Corgoloin, Cormot-Vauchignon, Corpeau, Couchey, Curley, Curtil-Vergy, Daix, Dijon, Ebaty, Echevronne, Epernay-sous-Gevrey, Etrochey, Fixin, Flagey-Echézeaux, Flavignerot, Fleurey-sur-Ouche, Fussey, Gerland, Gevrey-Chambertin, Gilly-lès-Cîteaux, Gomméville, Grancey-sur-Ource, Griselles, Ladoix-Serrigny, Lantenay, Larrey, L'Etang-Vergy, Levernois, Magny-lès-Villers, Mâlain, Marcenay, Marey-lès-Fussey, Marsannay-la-Côte, Massingy, Mavilly-Mandelot, Meloisey, Merceuil, Messanges, Meuilley, Meursanges, Meursault, Molesme, Montagny-lès-Beaune, Monthelie, Montliot-et-Courcelles, Morey-Saint-Denis, Mosson, Nantoux, Nicey, Noiron-sur-Seine, Nolay, Nuits-Saint-Georges, Obtrée, Pernand-Vergelesses, Perrigny-lès-Dijon, Plombières-lès-Dijon, Poinçon-lès-Larrey, Pommard, Pothières, Premeaux-Prissey, Prusly-sur-Ource, Puligny-Montrachet, Quincey, Reulle-Vergy, La Rochepot, Ruffey-lès-Beaune, Saint-Aubin, Saint-Bernard, Sainte-Colombe-sur-Seine, Sainte-Marie-la-Blanche, Saint-Philibert, Saint-Romain, Santenay, Savigny-lès-Beaune, Segrois, Tailly, Talant, Thoires, Valforêt (for the part of the territory corresponding to the former commune of Clémencey), Vannaire, Velars-sur-Ouche, Vertault, Vignoles, Villars-Fontaine, Villebichot, Villedieu, Villers-la-Faye, Villers-Patras, Villy-le-Moutier, Vix, Volnay, Vosne-Romanée and Vougeot;

- Rhône department: Alix, Anse, Arnas, Bagnols, Beaujeu, Belleville-en-Beaujolais, Belmont d'Azergues, Blacé, Bully, Cercié, Chambost-Allières, Chamelet, Charentay, Charnay, Châtillon, Chazay-d'Azergues, Chénas, Chessy, Chiroubles, Cogny, Corcelles-en-Beaujolais, Denicé, Dracé, Emeringes, Fleurie, Frontenas, Gleizé, Juliénas, Jullié, L'Arbresle, Lacenas, Lachassagne, Lancié, Lantignié, Le Breuil, Le Perréon, Légny, Les Ardillats, Létra, Lozanne, Lucenay, Marchampt, Marcy, Moiré, Montmelas-Saint-Sorlin, Morancé, Odenas, Pommiers, Porte des Pierres Dorées, Quincié-en-Beaujolais, Régnié-Durette, Rivolet, Saint-Clément-sur-Valsonne, Saint-Cyr-le-Chatoux, Saint-Didier-sur-Beaujeu, Saint-Etienne-des-Oullières, Saint-Etienne-la-Varenne, Saint-Georges-de-Reneins, Saint-Germain-Nuelles, Saint-Jean-des-Vignes, Saint-Julien, Saint-Just-d'Avray, Saint-Lager, Sainte-Paule, Saint-Romain-de-Popey, Salles-Arbuissonnas-en-Beaujolais, Sarcey, Taponas, Ternand, Theizé, Val-d'Oingt, Vaux-en-Beaujolais, Vauxrenard, Vernay, Villefranche, Ville-sur-Jarnioux, Villié-Morgon and Vindry-sur-Turdine (for the part of the territory corresponding to the former communes of Dareizé, Les Olmes and Saint-Loup);

- Saône-et-Loire department: Aluze, Ameugny, Azé, Barizey, Beaumont-sur-Grosne, Berzé-la-Ville, Berzé-le-Châtel, Bissey-sous-Cruchaud, Bissy-la-Mâconnaise, Bissy-sous-Uxelles, Bissy-sur-Fley, Blanot, Bonnay-Saint-Ythaire, Bouzeron, Boyer, Bray, Bresse-sur-Grosne, Burgy, Burnand, Bussières, Buxy, Cersot, Chagny, Chaintré, Chalon-sur-Saône, Chamilly, Champagny-sous-Uxelles, Champforgeuil, Chânes, Change, Chapaize, La Chapelle-de-Bragny, La Chapelle-de-Guinchay, La Chapelle-sous-Brancion, Charbonnières, Chardonnay, La Charmée, Charnay-lès-Mâcon, Charrecey, Chasselas, Chassey-le-Camp, Château, Châtenoy-le-Royal, Chaudenay, Cheilly-lès-Maranges, Chenôves, Chevagny-lès-Chevrières, Chissey-lès-Mâcon, Clessé, Cluny, Cormatin, Cortambert, Cortevaix, Couches, Crêches-sur-Saône, Créot, Cruzille, Culles-les-Roches, Curtil-sous-Burnand, Davayé, Demigny, Dennevy, Dezize-lès-Maranges, Donzy-le-Pertuis, Dracy-le-Fort, Dracy-lès-

Couches, Epertully, Etrigny, Farges-lès-Chalon, Farges-lès-Mâcon, Flagy, Fleurville, Fley, Fontaines, Fragnes-la-Loyère (for the part of the territory corresponding to the former commune of La Loyère), Fuissé, Genouilly, Germagny, Givry, Granges, Grevilly, Hurigny, Igé, Jalogny, Jambles, Jugy, Jully-lès-Buxy, La Vineuse-sur-Frégande (for the part of the territory corresponding to the former communes of Donzy-le-National, La Vineuse and Massy), Lacrost, Laives, Laizé, Lalheue, Leynes, Lournand, Lugny, Mâcon, Malay, Mancey, Martailly-lès-Brancion, Massilly, Mellecey, Mercurey, Messey-sur-Grosne, Milly-Lamartine, Montagny-lès-Buxy, Montbellet, Montceaux-Ragny, Moroges, Nanton, Ozenay, Paris-l'Hôpital, Péronne, Pierreclos, Plottes, Préty, Prissé, Pruzilly, Remigny, La Roche-Vineuse, Romanèche-Thorins, Rosey, Royer, Rully, Saint-Albain, Saint-Ambreuil, Saint-Amour-Bellevue, Saint-Boil, Saint-Clément-sur-Guye, Saint-Denis-de-Vaux, Saint-Désert, Saint-Gengoux-de-Scissé, Saint-Gengoux-le-National, Saint-Germain-lès-Buxy, Saint-Gervais-sur-Couches, Saint-Gilles, Saint-Jean-de-Trézy, Saint-Jean-de-Vaux, Saint-Léger-sur-Dheune, Saint-Mard-de-Vaux, Saint-Martin-Belle-Roche, Saint-Martin-du-Tartre, Saint-Martin-sous-Montaigu, Saint-Maurice-de-Satonnay, Saint-Maurice-des-Champs, Saint-Maurice-lès-Couches, Saint-Pierre-de-Varennes, Saint-Rémy, Saint-Sernin-du-Plain, Saint-Symphorien-d'Ancelles, Saint-Vallerin, Saint-Vérand, Saisy, La Salle, Salornay-sur-Guye, Sampigny-lès-Maranges, Sancé, Santilly, Sassangy, Saules, Savigny-sur-Grosne, Sennecey-le-Grand, Senozan, Sercy, Serrières, Sigy-le-Châtel, Sologny, Solutré-Pouilly, Taizé, Tournus, Uchizy, Varennes-lès-Mâcon, Vaux-en-Pré, Vergisson, Vers, Verzé, Le Villars, Vinzelles and Viré;

- Yonne department: Aigremont, Annay-sur-Serin, Arcy-sur-Cure, Asquins, Augy, Auxerre, Avallon, Bazarnes, Beine, Bernouil, Béru, Bessy-sur-Cure, Bleigny-le-Carreau, Censy, Champlay, Champs-sur-Yonne, Chamvres, Charentenay, Châtel-Gérard, Chemilly-sur-Serein, Cheney, Chevannes, Chichée, Chitry, Collan, Coulangeron, Coulanges-la-Vineuse, Courgis, Cruzy-le-Châtel, Dannemoine, Deux-Rivières, Dyé, Epineuil, Escamps, Escolives-Sainte-Camille, Fleys, Fontenay-près-Chablis, Gy-l'Evêque, Héry, Irancy, Island, Joigny, Jouancy, Junay, Jussy, La Chapelle-Vaupelteigne, Lichères-près-Aigremont, Lignorelles, Ligny-le-Châtel, Lucy-sur-Cure, Maligny, Mélisey, Merry-Sec, Migé, Molay, Molosmes, Montholon (for the part of the territory corresponding to the former communes of Champvallon, Villiers-sur-Tholon and Volgré), Montigny-la-Resle, Mouffy, Moulins-en-Tonnerois, Nitry, Noyers, Ouanne, Paroy-sur-Tholon, Pasilly, Pierre-Perthuis, Poilly-sur-Serein, Pontigny, Préhy, Quenne, Roffey, Rouvray, Sacy, Saint-Bris-le-Vineux, Saint-Cyr-les-Colons, Sainte-Pallaye, Saint-Père, Sainte-Vertu, Sarry, Senan, Serrigny, Tharoiseau, Tissey, Tonnerre, Tronchoy, Val-de-Mercy, Vallan, Venouse, Venoy, Vermenton, Vézannes, Vézelay, Vézinnes, Villeneuve-Saint-Salves, Villy, Vincelles, Vincelottes, Viviers and Yrouerre.

V. – Grape varieties

The wines come exclusively from the chardonnay B variety.

VI. – Management of the vineyard

1° – Training methods

a) – Planting density

- The vines have a minimum planting density of 5,500 plants per hectare, with a spacing between rows less than or equal to 1.20 metres, except for vines planted on slopes of 40 % or more, for which this spacing is less than or equal to 1.60 metres;

- The vines have a spacing between plants within the same row greater than or equal to 0.80 metre.

b) – Pruning rules

The wines come from vines pruned according to the following provisions:

GENERAL PROVISIONS
The vines are pruned with a maximum of 14 free eyes per plant and a maximum of 10 free eyes per square metre: – either short pruning (vines trained as Royat cordon); – or long pruning (single and double Guyot pruning, and Chablis pruning).
PARTICULAR PROVISION
Whatever the pruning method, the vines may be pruned with additional free eyes provided that, at the phenological stage corresponding to 11 or 12 leaves, the number of fruit-bearing shoots of the year per plant is less than or equal to the number of free eyes defined in the pruning rules.

c) – Trellising and foliage height rules

- The height of trellised foliage is at least equal to 0.6 times the spacing between rows, the height of trellised foliage being measured between the lower limit of the foliage, set at least 0.30 metre above the ground, and the upper trimming limit;

- The vines must be trellised and the trellising is maintained.

d) – Average maximum load per parcel

The average maximum load per parcel is set at 9,500 kilograms per hectare.

e) – Threshold of missing vines

The percentage of dead or missing vine plants referred to in Article D. 645-4 of the Rural and Maritime Fishing Code is set at 20 %.

f) – Cultivation condition of the vine

The parcels are managed so as to ensure a good overall cultivation condition of the vine, reflected in particular by:

- control of a good sanitary condition, making it possible to obtain healthy foliage and healthy berries;

- upkeep of the soil, namely control of grass cover by a grass height of less than half the trellising height (height between the ground and the upper trellising wire), and control of erosion through the absence of visible roots.

2° – Other cultivation practices

a) – In order to preserve the characteristics of the physical and biological environment, which constitutes a fundamental element of the terroir:

- Permanent grass cover of the headlands and banks is compulsory; destruction of the plant cover is tolerated occasionally during works to bring soil back up the slope;

- Any substantial modification of the morphology, the subsoil, the arable layer or the elements that guarantee the integrity and sustainability of the soils of a parcel intended for the production of the controlled designation of origin is prohibited, with the exception of classic deep-ploughing works.

b) – Vine plantings and replacements are carried out with healthy plant material that has undergone hot-water treatment or any other method making it possible to combat flavescence dorée.

3° – Irrigation

Irrigation is prohibited.

VII. – Harvest, transport and ripeness of the grapes

1° – Harvest

a) – The wines come from grapes harvested at good ripeness.

b) – Particular provisions for transport of the harvest

The harvest is protected from rain during its transport and on its reception.

2° – Ripeness of the grapes

The sugar content of the grapes and the natural alcoholic strengths by volume of the wines meet the following characteristics:

MINIMUM SUGAR CONTENT OF THE GRAPES (grams per litre of must)	**MINIMUM NATURAL ALCOHOLIC STRENGTH BY VOLUME**
178	11 %

VIII. – Yields – Entry into production

1° – Yield and limit yield

The yield and limit yield referred to in Article D. 645-7 of the Rural and Maritime Fishing Code are set at:

YIELD (hectolitres per hectare)	**LIMIT YIELD (hectolitres per hectare)**
54	64

2° – Entry into production of young vines

The benefit of the controlled designation of origin may only be granted to wines coming from:

- parcels of young vines only from the 2nd year following that in the course of which planting was carried out in place before 31 July;

- parcels of young vines only from the 1st year following that in the course of which grafting in place was carried out before 31 July;

- parcels of vines that have been top-grafted, at the earliest in the 1st year following that in the course of which the top-grafting was carried out before 31 July, and once the parcels no longer contain any variety other than that permitted for the appellation.

IX. – Processing, elaboration, ageing, packaging, storage

1° – General provisions

The wines are vinified in accordance with local, fair and constant usages.

a) – Analytical standards

Finished wines, ready to be released for consumption within the meaning of Article D. 645-18-I of the Rural and Maritime Fishing Code, have a maximum fermentable sugar content (glucose + fructose) of:

- 3 grams per litre;

- or 4 grams per litre if the total acidity is greater than or equal to 55.10 milliequivalents per litre, i.e. 4.13 grams per litre expressed as tartaric acid (or 2.7 grams per litre expressed as H2SO4).

b) – Oenological practices and physical treatments

- The use of pieces of wood is prohibited;

- After enrichment, the wines do not exceed a total alcoholic strength by volume of 13.5 %.

c) – Prohibited equipment

Continuous presses are prohibited.

d) – Vat capacity

Every operator has an overall vat capacity (vinification and storage) equivalent to at least the volume of wine vinified for the previous year's harvest, as entered either on the harvest declaration, pro rata to the change in the holding's area in production, or on the production declaration.

e) – Upkeep of the cellar and equipment

The cellar and the equipment are well maintained; this is reflected in particular by:

- general hygiene of the elaboration premises, with general cleanliness, well-maintained floors, adequate drainage and a surface avoiding stagnation;

- separation and specificity of the premises: premises without the same functions must be separated, such as storage areas for plant-protection products, cleaning products or hydrocarbons, from the premises for vinification, ageing and storage of dry goods (corks, cartons);

- absence of hazardous or odorous substances in the vinification, ageing and storage premises (odour).

f) – Ageing

- The wines are aged at least until 15 March of the year following that of the harvest;

- The temperature of the containers during the ageing phase is controlled and less than or equal to 25 °C.

2° – Provisions relating to packaging

For every packaged lot, the operator keeps available for the approved control body:

- the information appearing in the register of handling operations referred to in Article D. 645-18 of the Rural and Maritime Fishing Code;

- the reports of analyses carried out before or after packaging.

These reports are kept for a period of 6 months from the date of packaging.

3° – Provisions relating to storage

The operator provides evidence of a protected storage place for wines packaged in bottles.

4° – Provisions relating to the circulation of products and placing on the market for the consumer

At the end of the ageing period, the wines are placed on the market for the consumer from 31 March of the year following that of the harvest.

X. – Link with the geographical area

1° – Information on the geographical area

a) – Description of the natural factors contributing to the link

The geographical area is situated at the heart of the plateaux of the "Auxerrois", in the Paris Basin. It extends over the commune of Chablis in the Yonne department, east of Auxerre. The small town of

Chablis is crossed by the Serein, a tributary of the Yonne, on its course through the heart of the "Côte des Bars".

The cuesta of the "Côte des Bars" is a relief formed of hard limestone, the "Calcaire du Barrois", forming a cornice above a long slope whose subsoil consists of compact and impermeable marls (clayey limestones), the "Marnes à exogyra virgula", rich in small comma-shaped oysters that have given their name to the formation. Below the marls, a limestone level forms a small topographic step near the valley floor ("Calcaire à Astartes"). The marls making up the slope are most often masked by a mantle of scree mixing fine materials and coarser limestone elements. The difference in height of the front of the "Côte" reaches 120 metres to 130 metres.

The parcels precisely delimited for the harvesting of the grapes are grouped on a hillside on the right bank of the Serein valley, in the immediate vicinity of the town of Chablis. The complex topography of the hillside, with a general south-westerly orientation, divides it into small slopes whose exposures range from south-east to west. The vine parcels mainly occupy the marly slope with well-drained soils, but locally reach down to the cornice of the "calcaires à astartes". Altitudes range from 135 metres to 215 metres.

The soils are always calcareous. Lean, very stony and well drained on the limestones at the foot of the slope, they are richer in clay on the marly slope. The mantle of scree covering the impermeable marl, through its variable thickness, brings nuances. It forms a draining layer that warms up well, improving the agronomic conditions.

The "Chablisien" enjoys an oceanic climate slightly modified by continental influences. This climate is characterised by a moderate and regular rainfall regime (only 650 millimetres per year at Auxerre), with no marked summer drought, and rather cool temperatures, with an annual average of 10.8 °C. The climate is characterised by a fairly high risk of winter and spring frosts, which can be catastrophic for the vine.

b) – Description of the human factors contributing to the link

The cultivation of the vine is attested in the "Chablisien" from the early Middle Ages. A monastery was founded in Chablis in 510, then ceded in 867 to the monks of Saint-Martin de Tours fleeing the Viking invasion of the Loire country. It seems that they developed a vineyard close to the village.

In 1114, the Cistercians founded the Abbey of Pontigny near Chablis and gradually developed a vineyard, then set up in the town of Chablis a cellar, the "Petit Pontigny", whose buildings still exist. Cohabitation between the two abbeys was not without difficulties, but an agreement was finally reached.

The Cistercian wine estate occupied in particular the slope closest to the village, facing south-west, on the right bank of the Serein. This ensemble constitutes the historic core of the vineyard and was to give rise to the "grands crus".

During the French Revolution, the ecclesiastical vineyards were confiscated and sold at auction. They were then shared among the notables of Chablis, who continued the tradition of quality inherited from past centuries.

Throughout its history, the wine of "Chablis" has remained remarkably stable in its type of dry white wine. In 1186, a gift to the abbey of Pontigny concerned a vine located near Chablis, giving a wine that was "white, and long-keeping". Nineteenth-century authors also noted this particularity, which made "Chablis" an exception in a wine world dominated by red and "clairet" wines.

Phylloxera, downy mildew and powdery mildew seriously affected the "Chablisien", which took several decades to recover. Only in the 1950s and 1960s, supported by progress in viticulture, mechanisation and frost protection, was the reconstitution of the vineyard truly relaunched.

The "climats" (customary name, most often the name of a lieu-dit) now recognised under the controlled designation of origin "Chablis grand cru" were cited from the 19th century in wine literature on a par with the best "crus de Bourgogne". From the beginning of the 20th century they were designated by the producers of the region by the expression "grands crus classés".

The controlled designation of origin "Chablis grand cru" was recognised by decree in 1938. The grape harvesting area rests precisely on 7 historic lieux-dits situated at the gates of Chablis, whose names were then associated with the name of the controlled designation of origin: "Blanchot", "Bougros", "Les Clos", "Grenouilles", "Preuses", "Valmur", "Vaudésir".

"Chablis grand cru" comes from a single variety, chardonnay B, known locally as "beaunois", renowned for producing the great white wines of "Burgundy". In "Chablis" it reigns unchallenged over the whole vineyard.

The vine is traditionally trained with long pruning. The traditional pruning known as "Chablis pruning" is well suited to the difficult climatic conditions while ensuring regular and moderate production. Single or double Guyot pruning, which became widespread throughout the Burgundian vineyards in the 19th century, is also practised. The development of high-performing plant material through clonal selection favours the development of short pruning allowing good regulation of the vegetation.

The vines are trellised and generally planted along the slope. While this arrangement helps the clay soils to drain, it also causes erosion problems, offset by a return to soil cultivation and grass cover.

Faced with the risk of frost, greater here than in most vineyards, winegrowers have invented methods of protection such as sprinkling and heating the parcels, which require collective organisation and an alert system when the temperature falls dangerously.

The producers of Chablis created their first syndicate in 1908 in order to fight effectively against usurpations of the name "Chablis". In 2000, some of the producers of wines benefiting from the controlled designation of origin "Chablis grand cru" joined together in an association, the "Union des Grands crus de Chablis". In 1923, a cooperative cellar, "La Chablisienne", was created in Chablis. It still brings together 25 % of the producers of the Chablisien.

In 2010 the vineyard covered an area of 104 hectares, for an average annual production of about 5,000 hectolitres.

2° – Information on the quality and characteristics of the products

"Chablis grand cru" is a dry, lively and fruity white wine, characterised by a notable minerality balanced by a fleshy character. Firm in its youth, it gains in aromatic complexity and finesse with age, its acidity and minerality giving it a character of freshness. Its expression across seven "climats" displays a palette of nuances. It is a wine for keeping, reaching its peak at around 10 years.

3° – Causal interactions

The controlled designation of origin "Chablis grand cru" owes the lively and mineral character of its exclusively white wines in particular to its cool oceanic climate. This situation is reflected in a strong effect of the mesoclimate and of vintage conditions on the characteristics of the wines.

The geographical area of "Chablis grand cru" enjoys a particularly favourable situation, the exposure and the slopes ensuring optimal sunshine and protection from cold north winds. The site gives the wines great concentration supported by a particular minerality, ensuring their longevity and balance.

The relative diversity of soil and exposure conditions is well reflected in the wines. Fruity and expressive when they come from parcels with the lightest soils, they can be austere in their youth when

they come from parcels with the heaviest soils. The expression across 7 "climats" highlights these nuances.

The natural aptitudes of the site have been confirmed over the course of history. Shared between two abbeys from the Middle Ages, then worked by families of Chablis producers, the "climats" have kept over time their image of wines of high quality and great expression. In 1816, Jullien, in his "Topographie de tous les vignobles connus", cited them in the first class.

Producers have developed specific know-how enabling them to get the best out of the chardonnay B variety in this environment: a pruning system that best regulates the yield and thus ensures optimal ripeness, and protection against frost.

The wines of the controlled designation of origin "Chablis grand cru" are sought after throughout the world. Exports account for 60 % of sales.

XI. – Transitional measures

1° – Training methods

Vine parcels in place before 28 March 2003 which do not comply with the provisions relating to planting density and the spacing between rows set out in the present specification continue to benefit, for their harvest, from the right to the controlled designation of origin until they are completely grubbed up.

XII. – Rules of presentation and labelling

1° – General provisions

Wines for which, under the terms of the present specification, the controlled designation of origin "Chablis grand cru" is claimed and which are presented under the said appellation may not be declared after the harvest, offered to the public, dispatched, put up for sale or sold unless, in the harvest declaration, in advertisements, on leaflets, labels, invoices and any containers whatsoever, the aforesaid controlled designation of origin is entered.

2° – Particular provisions

a) – The name of a climat that may be associated with the controlled designation of origin is placed immediately after the name of the controlled designation of origin and printed in characters whose dimensions, both in height and in width, are not larger than those of the characters making up the name of the controlled designation of origin.

b) – The labelling of wines benefiting from the controlled designation of origin may specify the larger geographical unit "Vin de Bourgogne" or "Grand Vin de Bourgogne".

c) – Where the grape variety is indicated on the labelling, this indication does not appear in the same field of vision as the compulsory particulars and is printed in characters whose dimensions do not exceed 2 millimetres.

CHAPTER II

I. – Declaration obligations

1. Claim declaration

The claim declaration is sent to the defence and management body at least fifteen days before circulation between authorised warehousekeepers and at the latest on 10 December of the year of harvest.

It indicates in particular:

- the designation claimed;

- the volume of the wine;

- the EVV or SIRET number;

- the name and address of the applicant;

- the place of storage of the wine.

It is accompanied in particular by a copy of the harvest declaration and, as the case may be, a copy of the production declaration or an extract of the stock accounts for buyers of grapes and musts.

2. Declaration prior to transaction and collections

Every operator wishing to sell in bulk a wine benefiting from the controlled designation of origin makes a transaction declaration for the lot concerned to the approved control body within time limits set in the control plan of between six and fifteen working days before any collection.

This declaration, accompanied where applicable by a copy of the purchase contract, specifies in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the identification of the lot;

- the volume of the lot;

- the identification of the containers;

- the identity of the buyer.

If collections are made for volumes smaller than those set out in the transaction declaration, the operator informs the approved control body in writing.

3. Declaration of release for consumption

Every operator declares to the approved control body each lot of wine intended to be released for consumption within the meaning of Article D. 645-18-I of the Rural and Maritime Fishing Code.

This declaration may also be drawn up for lots already packaged. It is made within time limits set in the control plan of between six and fifteen working days before release for consumption or before the lots concerned are dispatched from the operator's cellars.

It specifies in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the identification of the lot;

- the volume of the lot;

- the lot number for wines already packaged;

- the identification of the containers for non-packaged wines.

However, making available to the approved control body the register referred to in Article D. 645-18 II of the Rural and Maritime Fishing Code serves as the declaration of release for consumption, under the conditions set out in the control plan.

4. Declaration relating to the dispatch outside the national territory of a non-packaged wine

Every operator wishing to dispatch outside the national territory a non-packaged wine benefiting from the controlled designation of origin declares it to the approved control body within time limits set in the control plan of between six and fifteen working days before any dispatch.

5. Fallback declaration

Every operator carrying out a fallback of a wine benefiting from the controlled designation of origin into a more general controlled designation of origin sends the defence and management body and the approved control body a monthly declaration at the latest on the 1st working day following the tenth day of each month.

This declaration indicates in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the more general controlled designation of origin of the fallback;

- the volume concerned by the fallback;

- the vintage;

- the state of the lot concerned (bulk, bottle, hermetically sealed vacuum containers…).

The approved control body transmits without delay a copy of the monthly declaration to the approved control body for the more general controlled designation of origin concerned.

The defence and management body transmits without delay to the defence and management body of the more general controlled designation of origin concerned the list of operators who have made a monthly fallback declaration, together with a summary statement indicating:

- the more general controlled designation of origin of the fallback;

- the volume concerned by the fallback;

- the vintage(s);

- the state of the lot(s) concerned (bulk, bottle, hermetically sealed vacuum containers…).

6. Downgrading declaration

Every operator carrying out a downgrading of wines benefiting from the controlled designation of origin sends the defence and management body and the approved control body a monthly declaration within time limits set in the control plan. This declaration indicates in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the volume downgraded;

- the vintage;

- the date of the downgrading.

7. Reworking of parcels

Before any development or any works liable to modify the morphology, the subsoil, the arable layer (including any addition of exogenous soil) or the elements that guarantee the integrity and sustainability of the soils of a parcel intended for the production of the controlled designation of

origin, with the exception of classic deep-ploughing works, the operator sends a declaration to the defence and management body at least four weeks before the planned start date of the works.

The defence and management body transmits, without delay, a copy of this declaration to the services of the National Institute of Origin and Quality.

II. – Keeping of registers

General plan of the storage and vinification places

Every vinifying operator keeps up to date and available for the approved control body a general plan of the storage and vinification places, allowing in particular the number, designation and capacity of the containers to be identified.

CHAPTER III

I. – Main points to be checked and evaluation methods

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
A – STRUCTURAL RULES	
A1 – Location of operators within the immediate proximity area	Documentary check
A2 – Belonging of the planted parcels to the delimited area	– Documentary check: up-to-date CVI parcel record; – Check in the field
A3 – Claimable production potential (grape variety, monitoring of transitional measures, planting density, plant material)	– Documentary check; – Check in the field
A4 – Processing, ageing, packaging and storage facilities	
Vat capacity	– Documentary check: general plan of the storage places; – On-site check
Ageing (temperature control and length of ageing)	– Documentary check: declaration of release for consumption or bottling register; – On-site check
State of upkeep of the cellar and equipment (hygiene)	On-site check
Protected storage place	On-site check
B – RULES LINKED TO THE PRODUCTION CYCLE	
B1 – Management of the vineyard	
Pruning	Check in the field
Average maximum load per parcel	Check in the field
Cultivation and sanitary condition of the vine (sanitary condition of foliage and berries, upkeep of the soil, upkeep of the trellising)	Check in the field
B2 – Harvest, transport and ripeness of the grapes	
Ripeness of the grapes	– Documentary check: records of ripeness monitoring; – Check in the field
B3 – Processing, elaboration, ageing, packaging, storage	

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
Oenological practices or treatments (enrichment, prohibited practices…)	– Documentary check: enrichment, acidification and de-acidification register; – On-site check
Stock accounts, analytical traceability	Documentary check: keeping of registers, analysis reports
B4 – Harvest declaration and claim declaration	
Missing vines	– Documentary check (keeping the list up to date); – Check in the field
Authorised yield	Documentary check: check of declarations, monitoring of authorisations granted by the INAO services after their investigation of the operator's individual request
VSI, volumes harvested in excess of the authorised yield	Documentary check: monitoring of destruction certificates
Individual complementary volume (VCI)	Documentary check: harvest declaration, VCI register
Claim declaration	– Documentary and on-site check: compliance with procedures and time limits, consistency with the harvest and production declarations; – Check of the release of products into circulation
C – CHECKS ON THE PRODUCTS	
Non-packaged wines (at transaction or collection)	Analytical and organoleptic examination
Packaged wines (before or after preparation for release for consumption)	Analytical and organoleptic examination
Non-packaged wines intended for dispatch outside the national territory	Analytical and organoleptic examination of all lots
D – PRESENTATION OF THE PRODUCTS	
Labelling	On-site check

II. – References concerning the control structure

Institut National de l'Origine et de la Qualité (INAO)

TSA 30003, 93555 MONTREUIL Cedex

Tel.: (33) (0)1.73.30.38.00 – Fax: (33) (0)1.73.30.38.04 – Email: contact@inao.gouv.fr

Compliance with the present specification is checked on the basis of an approved control plan, by a third-party body offering guarantees of competence, impartiality and independence that has received delegation from the INAO.
