Specification of the controlled designation of origin "LATRICIÈRES-CHAMBERTIN"

approved by decree no. 2011-1452 of 4 November 2011, JORF of 8 November 2011

CHAPTER I

I. – Name of the designation

Only wines meeting the specific provisions set out below may claim the controlled designation of origin "Latricières-Chambertin", initially recognised by the decree of 31 July 1937.

II. – Geographical denominations and complementary terms

The name of the controlled designation of origin may be followed by the term "grand cru".

III. – Colour and types of product

The controlled designation of origin "Latricières-Chambertin" is reserved for still red wines.

IV. – Areas and zones in which the various operations are carried out

1° – Geographical area

The harvesting of the grapes, the vinification, the elaboration and the ageing of the wines are carried out within the territory of the commune of Gevrey-Chambertin in the Côte-d'Or department, on the basis of the official geographic code of the year 2026.

The cartographic documents representing the geographical area may be consulted on the website of the National Institute of Origin and Quality.

2° – Delimited parcel area

The wines come exclusively from vines situated within the delimited parcel production area as approved by the National Institute of Origin and Quality at the session of the competent national committee of 17 and 18 May 1984.

The cartographic documents representing the delimited parcel area may be consulted on the website of the National Institute of Origin and Quality.

3° – Immediate proximity area

The immediate proximity area, defined by derogation for the vinification, the elaboration and the ageing of the wines, is made up of the territory of the following communes, on the basis of the official geographic code of the year 2026:

- Côte-d'Or department: Agencourt, Aloxe-Corton, Ancey, Arcenant, Argilly, Autricourt, Auxey-Duresses, Baubigny, Beaune, Belan-sur-Ource, Bévy, Bissey-la-Côte, Bligny-lès-Beaune, Boncourt-le-Bois, Bouix, Bouze-lès-Beaune, Brion-sur-Ource, Brochon, Cérilly, Chamboeuf, Chambolle-Musigny, Channay, Charrey-sur-Seine, Chassagne-Montrachet, Châtillon-sur-Seine, Chaumont-le-Bois, Chaux, Chenôve, Chevannes, Chorey-lès-Beaune, Collonges-lès-Bevy, Combertault, Comblanchien, Corcelles-les-Arts, Corcelles-les-Monts, Corgoloin, Cormot-Vauchignon, Corpeau, Couchey, Curley, Curtil-Vergy, Daix, Dijon, Ebaty, Echevronne, Epernay-sous-Gevrey, Etrochey, Fixin, Flagey-Echézeaux, Flavignerot, Fleurey-sur-Ouche, Fussey, Gerland, Gilly-lès-Cîteaux, Gomméville, Grancey-sur-Ource, Griselles, La Rochepot, Ladoix-Serrigny, Lantenay, Larrey, L'Etang-Vergy, Levernois, Magny-lès-Villers, Mâlain, Marcenay, Marey-lès-Fussey, Marsannay-la-Côte, Massingy, Mavilly-Mandelot, Meloisey, Merceuil, Messanges, Meuilley, Meursanges, Meursault, Molesme, Montagny-lès-Beaune, Monthelie, Montliot-et-Courcelles, Morey-Saint-Denis, Mosson, Nantoux, Nicey, Noiron-sur-Seine, Nolay, Nuits-Saint-Georges, Obtrée, Pernand-Vergelesses, Perrigny-lès-

Dijon, Plombières-lès-Dijon, Poinçon-lès-Larrey, Pommard, Pothières, Premeaux-Prissey, Prusly-sur-Ource, Puligny-Montrachet, Quincey, Reulle-Vergy, Ruffey-lès-Beaune, Saint-Aubin, Saint-Bernard, Sainte-Colombe-sur-Seine, Sainte-Marie-la-Blanche, Saint-Philibert, Saint-Romain, Santenay, Savigny-lès-Beaune, Segrois, Tailly, Talant, Thoires, Valforêt (for the part of the territory corresponding to the former commune of Clémencey), Vannaire, Velars-sur-Ouche, Vertault, Vignoles, Villars-Fontaine, Villebichot, Villedieu, Villers-la-Faye, Villers-Patras, Villy-le-Moutier, Vix, Volnay, Vosne-Romanée, Vougeot;

- Rhône department: Alix, Anse, Arnas, Bagnols, Beaujeu, Belleville-en-Beaujolais, Belmont-d'Azergues, Blacé, Bully, Cercié, Chambost-Allières, Chamelet, Charentay, Charnay, Châtillon, Chazay-d'Azergues, Chénas, Chessy, Chiroubles, Cogny, Corcelles-en-Beaujolais, Denicé, Dracé, Emeringes, Fleurie, Frontenas, Gleizé, Juliénas, Jullié, L'Arbresle, Lacenas, Lachassagne, Lancié, Lantignié, Le Breuil, Le Perréon, Légny, Létra, Les Ardillats, Limas, Lozanne, Lucenay, Marchampt, Marcy, Moiré, Montmelas-Saint-Sorlin, Morancé, Odenas, Pommiers, Porte des Pierres Dorées, Quincié-en-Beaujolais, Régnié-Durette, Rivolet, Saint-Clément-sur-Valsonne, Saint-Cyr-le-Chatoux, Saint-Didier-sur-Beaujeu, Saint-Etienne-des-Oullières, Saint-Etienne-la-Varenne, Saint-Georges-de-Reneins, Saint-Germain-Nuelles, Saint-Jean-des-Vignes, Saint-Julien, Saint-Just-d'Avray, Saint-Lager, Saint-Romain-de-Popey, Saint-Vérand, Sainte-Paule, Salles-Arbuissonnas-en-Beaujolais, Sarcey, Taponas, Ternand, Theizé, Val d'Oingt, Vaux-en-Beaujolais, Vauxrenard, Vernay, Villefranche-sur-Saône, Ville-sur-Jarnioux and Villié-Morgon, Vindry-sur-Turdine (for the part of the territory corresponding to the former communes of Dareizé, Les Olmes and Saint-Loup);

- Saône-et-Loire department: Aluze, Ameugny, Azé, Barizey, Beaumont-sur-Grosne, Berzé-la-Ville, Berzé-le-Châtel, Bissey-sous-Cruchaud, Bissy-la-Mâconnaise, Bissy-sous-Uxelles, Bissy-sur-Fley, Blanot, Bonnay-Saint-Ythaire, Bouzeron, Boyer, Bray, Bresse-sur-Grosne, Burgy, Burnand, Bussières, Buxy, Cersot, Chagny, Chaintré, Chalon-sur-Saône, Chamilly, Champagny-sous-Uxelles, Champforgeuil, Châtenoy-le-Royal, Chaudenay, Cheilly-lès-Maranges, Chenôves, Chevagny-les-Chevrières, Chissey-lès-Mâcon, Clessé, Cluny, Cormatin, Cortambert, Cortevaix, Couches, Crêches-sur-Saône, Créot, Cruzille, Culles-les-Roches, Curtil-sous-Burnand, Davayé, Demigny, Dennevy, Dezize-lès-Maranges, Donzy-le-Pertuis, Dracy-lès-Couches, Dracy-le-Fort, Epertully, Etrigny, Farges-lès-Chalon, Farges-lès-Mâcon, Flagy, Fleurville, Fley, Fontaines, Fragnes-La Loyère (for the part of the territory corresponding to the former commune of La Loyère), Fuissé, Genouilly, Germagny, Givry, Granges, Grévilly, Hurigny, Igé, Jalogny, Jambles, Jugy, Jully-lès-Buxy, La Vineuse-sur-Fregande (for the part of the territory corresponding to the former communes of Donzy-le-National, La Vineuse and Massy), Lacrost, Laives, Laizé, Lalheue, Leynes, Lournand, Lugny, Mâcon, Malay, Mancey, Martailly-lès-Brancion, Massilly, Mellecey, Mercurey, Messey-sur-Grosne, Milly-Lamartine, Montagny-lès-Buxy, Montbellet, Montceaux-Ragny, Moroges, Nanton, Ozenay, Paris-l'Hôpital, Péronne, Pierreclos, Plottes, Préty, Prissé, Pruzilly, Remigny, La Roche-Vineuse, Romanèche-Thorins, Rosey, Royer, Rully, Saint-Jean-de-Trézy, Saint-Albain, Saint-Ambreuil, Saint-Amour-Bellevue, Saint-Boil, Saint-Clément-sur-Guye, Saint-Denis-de-Vaux, Saint-Désert, Saint-Gengoux-de-Scissé, Saint-Gengoux-le-National, Saint-Germain-lès-Buxy, Saint-Gervais-sur-Couches, Saint-Gilles, Saint-Jean-de-Vaux, Saint-Léger-sur-Dheune, Saint-Mard-de-Vaux, Saint-Martin-Belle-Roche, Saint-Martin-du-Tartre, Saint-Martin-sous-Montaigu, Saint-Maurice-de-Satonnay, Saint-Maurice-des-Champs, Saint-Rémy, Saint-Sernin-du-Plain, Saint-Vallerin, Saint-Vérand, Saisy, La Salle, Salornay-sur-Guye, Sampigny-lès-Maranges, Sancé, Santilly, Sassangy, Saules, Savigny-sur-Grosne, Sennecey-le-Grand, Senozan, Sercy, Serrières, Sigy-le-Châtel, Sologny, Solutré-Pouilly, Saint-Maurice-lès-Couches, Saint-Pierre-de-Varennes, Saint-Symphorien-d'Ancelles, Taizé, Tournus, Uchizy, Varennes-lès-Mâcon, Vaux-en-Pré, Vergisson, Vers, Verzé, Le Villars, Vinzelles, Viré;

- Yonne department: Aigremont, Annay-sur-Serein, Arcy-sur-Cure, Asquins, Augy, Auxerre, Avallon, Bazarnes, Beine, Bernouil, Béru, Bessy-sur-Cure, Bleigny-le-Carreau, Censy, Chablis, Champlay, Champs-sur-Yonne, Chamvres, Charentenay, Châtel-Gérard, Chemilly-sur-Serein, Cheney, Chevannes, Chichée, Chitry, Collan, Coulangeron, Coulanges-la-Vineuse, Courgis, Cruzy-le-Châtel, Dannemoine, Deux-Rivières, Dyé, Epineuil, Escamps, Escolives-Sainte-Camille, Fleys, Fontenay-près-Chablis, Gy-l'Evêque, Héry, Irancy, Island, Joigny, Jouancy, Junay, Jussy, La Chapelle-Vaupelteigne, Lichères-près-Aigremont, Lignorelles, Ligny-le-Châtel, Lucy-sur-Cure, Maligny, Mélisey, Merry-Sec, Migé, Molay, Molosmes, Montholon (for the part of the territory corresponding to the former communes of Champvallon, Villiers-sur-Tholon and Volgré), Montigny-la-Resle, Mouffy, Moulins-en-Tonnerrois, Nitry, Noyers, Ouanne, Paroy-sur-Tholon, Pasilly, Pierre-Perthuis, Poilly-sur-Serein, Pontigny, Préhy, Quenne, Roffey, Rouvray, Saint-Père, Sainte-Pallaye, Sarry, Senan, Serrigny, Saint-Bris-le-Vineux, Saint-Cyr-les-Colons, Sainte-Vertu, Tharoiseau, Tissey, Tonnerre, Tronchoy, Val-de-Mercy, Vallan, Venouse, Venoy, Vermenton, Vézannes, Vézelay, Vézinnes, Villeneuve-Saint-Salves, Villy, Vincelles, Vincelottes, Viviers and Yrouerre.

V. – Grape varieties

1° – Grape varieties

The wines come from the following varieties:

- main variety: pinot noir N;

- accessory varieties: chardonnay B, pinot blanc B, pinot gris G.

2° – Proportion rules on the holding

The accessory varieties are authorised only as mixed plantings within the vines. Their total proportion is limited to 15 % within each parcel.

VI. – Management of the vineyard

1° – Training methods

a) – Planting density

- The vines have a minimum planting density of 9,000 plants per hectare, with a spacing between rows less than or equal to 1.25 metres and a spacing between plants within the same row greater than or equal to 0.50 metre;

- The vines may be planted "en foule" (randomly, without rows), provided that the minimum planting density is respected and the spacing between plants is greater than 0.50 metre.

b) – Pruning rules

The wines come from vines pruned according to the following provisions:

GENERAL PROVISIONS
The vines are pruned with a maximum of 8 free eyes per plant: – either short pruning (vines trained as Royat cordon, bilateral cordon, gobelet and fan); – or single Guyot long pruning.
PARTICULAR PROVISIONS

GENERAL PROVISIONS
The period for establishing the cordon is limited to 2 years. During this period, double Guyot pruning, with a maximum of 5 free eyes on each cane, is authorised. Single Guyot pruning may be adapted: – with a 2nd spur allowing the position of the cane to be alternated from one year to the next; – with a cane shortened to a maximum of 3 free eyes and a spur limited to 2 free eyes. Whatever the pruning method, the vines may be pruned with additional free eyes provided that, at the phenological stage corresponding to 11 or 12 leaves, the number of fruit-bearing shoots of the year per plant is less than or equal to the number of free eyes defined in the pruning rules.

c) – Trellising and foliage height rules

- The height of trellised foliage is at least equal to 0.6 times the spacing between rows, the height of trellised foliage being measured between the lower limit of the foliage, set at least 0.30 metre above the ground, and the upper trimming limit;

- When the vines are not trained in gobelet, they must be raised on a stake or trellised; the trellising is maintained;

- When the vines are planted “en foule”, they are trained on stakes.

d) – Average maximum load per parcel

The average maximum load per parcel is set at 8,000 kilograms per hectare.

e) – Threshold of missing vines

The percentage of dead or missing vine plants referred to in Article D. 645-4 of the Rural and Maritime Fishing Code is set at 20 %.

f) – Cultivation condition of the vine

The parcels are managed so as to ensure a good overall cultivation condition of the vine, in particular its sanitary condition and the upkeep of its soil.

2° – Other cultivation practices

a) – In order to preserve the characteristics of the physical and biological environment, which constitutes a fundamental element of the terroir, any substantial modification of the morphology, the subsoil, the arable layer or the elements that guarantee the integrity and sustainability of the soils of a parcel intended for the production of the controlled designation of origin is prohibited, with the exception of classic deep-ploughing works.

b) – Vine plantings and replacements are carried out with healthy plant material that has undergone hot-water treatment.

c) – Headlands

Chemical or mechanical weeding of the headlands is prohibited, except for one plough width along the row ends, for mechanical weeding only.

3° – Irrigation

Irrigation is prohibited.

4° – Weeding

Weeding with chemical products is prohibited, including with biocontrol products.

5° – Preservation of the landscape

Equipment foreign to the parcel, installed permanently and having a negative impact on the landscape, is prohibited.

VII. – Harvest, transport and ripeness of the grapes

1° – Harvest

a) – The wines come from grapes harvested at good ripeness.

b) – The wines come from grapes harvested by hand.

2° – Ripeness of the grapes

a) – Sugar content of the grapes

Grapes with a sugar content of less than 198 grams per litre of must may not be considered to be at good ripeness.

b) – Minimum natural alcoholic strength by volume

The wines have a minimum natural alcoholic strength by volume of 11.5 %.

VIII. – Yields – Entry into production

1° – Yield

The yield referred to in Article D. 645-7 of the Rural and Maritime Fishing Code is set at 45 hectolitres per hectare.

2° – Limit yield

The limit yield referred to in Article D. 645-7 of the Rural and Maritime Fishing Code is set at 53 hectolitres per hectare.

3° – Entry into production of young vines

The benefit of the controlled designation of origin may only be granted to wines coming from:

- parcels of young vines only from the 2nd year following that in the course of which planting was carried out in place before 31 July;

- parcels of young vines only from the 1st year following that in the course of which grafting in place was carried out before 31 July;

- parcels of vines that have been top-grafted, at the earliest in the 1st year following that in the course of which the top-grafting was carried out before 31 July, and once the parcels no longer contain any varieties other than those permitted for the appellation. By derogation, in the year following that in the course of which the top-grafting was carried out before 31 July, the varieties permitted for the appellation may represent only 80 % of the planting of each parcel concerned.

IX. – Processing, elaboration, ageing, packaging, storage

1° – General provisions

The wines are vinified in accordance with local, fair and constant usages.

a) – Blending of varieties

Wines produced from parcels with mixed plantings are vinified by blending the grapes.

b) – Malolactic fermentation

At the packaging stage, the wines have a maximum malic acid content of 0.4 gram per litre.

c) – Analytical standards

Finished wines, ready to be released for consumption within the meaning of Article D. 645-18-I of the Rural and Maritime Fishing Code, have a maximum fermentable sugar content (glucose + fructose) of 2 grams per litre.

d) – Oenological practices and physical treatments

- Subtractive enrichment techniques (TSE) are authorised within the limit of a concentration rate of 10 %;

- The use of pieces of wood is prohibited;

- After enrichment, the wines do not exceed a total alcoholic strength by volume of 14.5 %.

e) – Prohibited equipment

Continuous presses are prohibited.

f) – Vat capacity

Every operator has an overall vat capacity (vinification and storage) equivalent to at least 150 % of the volume of wine vinified for the previous year's harvest, as entered either on the harvest declaration, pro rata to the change in the holding's area in production, or on the production declaration.

g) – Upkeep of the cellar and equipment

The cellar and the equipment are well maintained; this is reflected in particular by:

- general hygiene of the elaboration premises, with general cleanliness, well-maintained floors, adequate drainage and a surface avoiding stagnation;

- harmlessness of the equipment and products coming into contact with the wine;

- separation and specificity of the premises: premises without the same functions must be separated, such as storage areas for plant-protection products, cleaning products or hydrocarbons, from the premises for vinification, ageing and storage of dry goods (corks, cartons);

- management of wine effluents: effluents must be removed as quickly as possible from foodstuff premises and deposited in well-maintained containers that are easy to clean and can be closed; waste storage areas must be kept clean; waste must be disposed of hygienically and in an environmentally friendly manner; a waste storage and removal area must be provided;

- absence of hazardous or odorous substances in the vinification, ageing and storage premises (odour).

h) – Ageing

- The wines are aged at least until 15 June of the year following that of the harvest;

- The temperature of the containers during the ageing phase is controlled and less than or equal to 25 °C.

2° – Provisions relating to packaging

For every packaged lot, the operator keeps available for the approved control body:

- the information appearing in the register of handling operations referred to in Article D. 645-18 of the Rural and Maritime Fishing Code;

- the reports of analyses carried out before or after packaging.

These reports are kept for a period of 6 months from the date of packaging.

3° – Provisions relating to storage

The operator provides evidence of a protected storage place for wines packaged in unlabelled bottles, with a temperature of between 5 °C and 22 °C.

4° – Provisions relating to the circulation of products and placing on the market for the consumer

At the end of the ageing period, the wines are placed on the market for the consumer from 30 June of the year following that of the harvest.

X. – Link with the geographical area

1° – Information on the geographical area

a) – Description of the natural factors contributing to the link

The geographical area is situated in the "Côte de Nuits" vineyard, a linear relief stretching for about 25 kilometres in a general north–south direction. This relief of tectonic origin separates the limestone plateaux of the "Hautes Côtes" to the west, at an altitude of between 400 metres and 500 metres, from the Bresse plain to the east, a Tertiary rift valley whose altitude, level with the "Côte", is around 250 metres.

The geographical area is thus limited to the territory of the single commune of Gevrey-Chambertin, situated south of the town of Dijon, in the Côte-d'Or department, in the Burgundy region. "The Côte" forms a fairly simple relief, made up of a well-marked hillside facing the rising sun.

The parcels delimited for the harvesting of the grapes are situated on the piedmont, where they occupy a slight shelf, at the outlet of a small, deep and wooded dry valley, the "Combe Grisard".

The geological substratum consists of hard limestones overlain by a level of marl (clayey limestone). The whole is dated to the Bajocian (Middle Jurassic). The vines are mainly established on the parcels resting on the limestone level and reaching the base of the marls.

The marl-limestone substratum is masked by a thin layer (a few decimetres) of spreads mixing scree from the "combe" with red clays and silts resulting from the weathering of the subsoil and the overlying reliefs.

The soils are little developed, generally carbonated and thin, and free-draining despite a high clay content, particularly on the limestone substratum. The marl level probably gives rise to temporary water inflows, compensating for the low water reserves of the soil.

The climate is cool oceanic, attenuated by continental or southern influences channelled along the Rhône–Saône axis. The regional oceanic character shows in a moderate and regular rainfall regime (about 750 millimetres per year), with no marked summer drought. Temperatures show a certain coolness, with an annual average of 10.5 °C. The "Côte", east of the Morvan massif and the Burgundian plateaux, benefits from climatic shelter giving it a thermal advantage as well as a rainfall deficit that is notable for the region.

The topographic situation of the vine parcels protects them from the risks of frost and from morning mists, while ensuring an exposure to the rising sun that is very favourable to rapid warming of the soil.

b) – Description of the human factors contributing to the link

The parcels delimited for the harvesting of the grapes are situated solely at the heart of the lieu-dit "Latricières", extending the famous "Chambertin" to the south. Cited for the first time in the 16th century, this lieu-dit acquired its reputation during the 18th century. The wines sold at high prices and

were often likened to the neighbouring “Chambertin”. In 1855, Jules LAVALLE ranked the wines from the lieu-dit “Latricières” as “seconde cuvée”.

At the beginning of the 20th century, the wines from the “Latricières” were commonly sold under the name “Latricières-Chambertin”, as shown by the judgment of the Dijon court of 1931. This judgment recognised the wines from the “Latricières” as a designation of origin and set its geographical limits. The controlled designation of origin “Latricières-Chambertin”, for its part, was recognised by decree in 1937.

Within the Burgundy vineyard, “climats” (customary names, most often the name of a lieu-dit) regularly producing exceptional wines, such as “Latricières-Chambertin”, have emerged over time. They extend over privileged situations where the soil and climate conditions are optimal. Identified and named for centuries, they receive the greatest care from producers, both in the vineyard and in the cellar. They produce, year after year, the most perfect wines and have, for several centuries, been placed at the top of the classification of the great wines of Burgundy. The term “grand cru” associated with them appeared at the beginning of the 20th century, and its indication on the label is a well-established usage.

The vines are trained according to the usages in force throughout the “Côte de Nuits”, with planting densities above 9,000 plants per hectare and a planting based on the pinot noir N variety. Aware of the value of the heritage that the soils constitute, producers take particular care to preserve their integrity. It is customary to age the wines for several months, which gives them a great aptitude for keeping.

In 2009 the vineyard covered an area of a little over 7 hectares, for an average annual production of 270 hectolitres.

2° – Information on the quality and characteristics of the products

The wines, with a deep ruby robe, have a dense tannic structure, balanced by an acidity bringing finesse and elegance. The aromas are complex, generally dominated by a fruity and floral bouquet, evolving with age towards a minerality sometimes accompanied by notes of undergrowth. They are characterised by considerable longevity and benefit from a few years of keeping to express their full potential.

3° – Causal interactions

Situated at the heart of the vineyard of the commune of Gevrey-Chambertin, in the “Côte de Nuits”, the “Latricières-Chambertin” vineyard enjoys a particularly favourable topographic situation, ensuring on the one hand optimal sunshine, with an exposure to the rising sun, and on the other protection from morning mists owing to its position above the piedmont.

Its location at the outlet of the small “Combe Grisard” induces certain particular features. The parcels have lean, stony soils and the mesoclimate is relatively cool, given the circulation of cold forest air channelled by the “combe”. The wines reflect these natural conditions through less richness and sometimes greater austerity compared with the wines benefiting from the term “grand cru” from the neighbouring vineyards. A few years of keeping soften these youthful characters and reveal remarkable finesse and length.

Environmental conditions contribute to the optimal development of the pinot noir N variety, an indigenous Burgundian variety. Over the generations, producers have adapted their practices, both in the vineyard and in the cellar, to get the best out of it, with control of yields, adaptation of the vegetation to the limited fertility and water reserve of the site, and long ageing reinforcing the keeping qualities of the wines.

From the 19th century, the exceptional merits of the site were recognised, and the wines of “Latricières-Chambertin” now occupy the top of the hierarchy of the wines of Burgundy. The

judgment of 1931, by officially adding the name “Chambertin” to the name of the lieu-dit, confirms the prestigious kinship with the archetype of the great red wines of Burgundy.

XI. – Transitional measures

No particular provision.

XII. – Rules of presentation and labelling

1° – General provisions

Wines for which, under the terms of the present specification, the controlled designation of origin “Latricières-Chambertin” is claimed and which are presented under the said appellation may not be declared after the harvest, offered to the public, dispatched, put up for sale or sold unless, in the harvest declaration, in advertisements, on leaflets, labels, invoices and any containers whatsoever, the aforesaid controlled designation of origin is entered.

2° – Particular provisions

a) – The labelling of wines benefiting from the controlled designation of origin may specify the larger geographical unit “Vin de Bourgogne” or “Grand Vin de Bourgogne”.

b) – The indication of the grape variety is prohibited on the labelling of wines benefiting from the controlled designation of origin.

CHAPTER II

I. – Declaration obligations

1. Claim declaration

The claim declaration is sent to the defence and management body at least fifteen days before circulation between authorised warehousekeepers and at the latest on 10 December of the year of harvest.

It indicates in particular:

- the designation claimed;

- the volume of the wine;

- the EVV or SIRET number;

- the name and address of the applicant;

- the place of storage of the wine.

It is accompanied in particular by a copy of the harvest declaration and, as the case may be, a copy of the production declaration or an extract of the stock accounts for buyers of grapes and musts.

2. Declaration prior to transaction and collections

Every operator wishing to sell in bulk a wine benefiting from the controlled designation of origin makes a transaction declaration for the lot concerned to the approved control body within time limits set in the control plan of between six and fifteen working days before any collection.

This declaration, accompanied where applicable by a copy of the purchase contract, specifies in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the identification of the lot;

- the volume of the lot;

- the identification of the containers;

- the identity of the buyer.

If collections are made for volumes smaller than those set out in the transaction declaration, the operator informs the approved control body in writing.

3. Declaration of release for consumption

Every operator declares to the approved control body each lot of wine intended to be released for consumption within the meaning of Article D. 645-18-I of the Rural and Maritime Fishing Code.

This declaration may also be drawn up for lots already packaged. It is made within time limits set in the control plan of between six and fifteen working days before release for consumption or before the lots concerned are dispatched from the operator's cellars.

It specifies in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the identification of the lot;

- the volume of the lot;

- the lot number for wines already packaged;

- the identification of the containers for non-packaged wines.

However, making available to the approved control body the register referred to in Article D. 645-18 II of the Rural and Maritime Fishing Code serves as the declaration of release for consumption, under the conditions set out in the control plan.

4. Declaration relating to the dispatch outside the national territory of a non-packaged wine

Every operator wishing to dispatch outside the national territory a non-packaged wine benefiting from the controlled designation of origin declares it to the approved control body within time limits set in the control plan of between six and fifteen working days before any dispatch.

5. Fallback declaration

Every operator carrying out a fallback of a wine benefiting from the controlled designation of origin into a more general controlled designation of origin sends the defence and management body and the approved control body a monthly declaration at the latest on the 1st working day following the tenth day of each month.

This declaration indicates in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the more general controlled designation of origin of the fallback;

- the volume concerned by the fallback;

- the vintage;

- the state of the lot concerned (bulk, bottle, hermetically sealed vacuum containers…);

- the date of the fallback.

The approved control body transmits without delay a copy of the monthly declaration to the approved control body for the more general controlled designation of origin concerned.

The defence and management body transmits without delay to the defence and management body of the more general controlled designation of origin concerned the list of operators who have made a monthly fallback declaration, together with a summary statement indicating:

- the more general controlled designation of origin of the fallback;

- the volume concerned by the fallback;

- the vintage(s);

- the state of the lot(s) concerned (bulk, bottle, hermetically sealed vacuum containers…).

6. Downgrading declaration

Every operator carrying out a downgrading of wines benefiting from the controlled designation of origin sends the defence and management body and the approved control body a monthly declaration within time limits set in the control plan. This declaration indicates in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the volume downgraded;

- the vintage;

- the date of the downgrading.

7. Declaration of equipment for TSE

Every operator holding a concentration apparatus declares it upon purchase to the defence and management body, specifying its specifications. The defence and management body keeps an up-to-date list of operators holding such equipment and sends it each year to the services of the National Institute of Origin and Quality at the latest on 1 September.

Every operator using a service provider declares it to the defence and management body, which draws up the list of these operators and sends it each year to the services of the National Institute of Origin and Quality at the latest on 1 September.

8. Reworking of parcels

Before any development or any works liable to modify the morphology, the subsoil, the arable layer (including any addition of exogenous soil) or the elements that guarantee the integrity and sustainability of the soils of a parcel intended for the production of the controlled designation of origin, with the exception of classic deep-ploughing works, the operator sends a declaration to the defence and management body at least four weeks before the planned start date of the works.

The defence and management body transmits, without delay, a copy of this declaration to the services of the National Institute of Origin and Quality.

9. Equipment liable to have an impact on the landscape

Every operator wishing to install, permanently, equipment foreign to the parcel that is liable to have a negative impact on the landscape sends a declaration to the defence and management body at least two months before the planned date of installation.

II. – Keeping of registers

1. General plan of the storage and vinification places

Every vinifying operator keeps up to date and available for the approved control body a general plan of the storage and vinification places, allowing in particular the number, designation and capacity of the containers to be identified.

2. TSE register

Every operator carrying out partial concentration of musts keeps an up-to-date TSE register including in particular:

- the initial volume;

- the volume of water evaporated;

- the identification of the lot after concentration (volume and potential alcoholic strength).

CHAPTER III

I. – Main points to be checked and evaluation methods

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
A – STRUCTURAL RULES	
A1 – Location of operators within the immediate proximity area	Documentary check
A2 – Belonging of the planted parcels to the delimited area	– Documentary check: up-to-date CVI parcel record; – Check in the field
A3 – Claimable production potential (grape varieties and proportion rules, planting density, plant material)	– Documentary check; – Check in the field
A4 – Processing, ageing, packaging and storage facilities	
Vat capacity	– Documentary check: general plan of the storage places; – On-site check
Ageing (temperature control and length of ageing)	– Documentary check: declaration of release for consumption or bottling register; – On-site check
State of upkeep of the cellar and equipment (hygiene)	On-site check
Protected storage place and storage conditions (T °C)	On-site check
B – RULES LINKED TO THE PRODUCTION CYCLE	
B1 – Management of the vineyard	
Pruning	Check in the field
Average maximum load per parcel	Check in the field
Cultivation and sanitary condition of the vine (sanitary condition of foliage and berries, upkeep of the soil, upkeep of the trellising)	Check in the field
B2 – Harvest, transport and ripeness of the grapes	

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
Ripeness of the grapes	– Documentary check: records of ripeness monitoring; – Check in the field
B3 – Processing, elaboration, ageing, packaging, storage	
Oenological practices or treatments (enrichment, prohibited practices…)	– Documentary check: declaration of equipment and TSE register, enrichment, acidification and de-acidification register; – On-site check
Stock accounts, analytical traceability	Documentary check: keeping of registers, analysis reports
B4 – Harvest declaration and claim declaration	
Missing vines	– Documentary check (keeping the list up to date); – Check in the field
Authorised yield	Documentary check: check of declarations, monitoring of authorisations granted by the INAO services after their investigation of the operator's individual request
VSI, volumes harvested in excess of the authorised yield	Documentary check: monitoring of destruction certificates
Claim declaration	– Documentary and on-site check: compliance with procedures and time limits, consistency with the harvest and production declarations; – Check of the release of products into circulation
C – CHECKS ON THE PRODUCTS	
Non-packaged wines (at transaction or collection)	Analytical and organoleptic examination
Packaged wines (before or after preparation for release for consumption)	Analytical and organoleptic examination
Non-packaged wines intended for dispatch outside the national territory	Analytical and organoleptic examination of all lots
D – PRESENTATION OF THE PRODUCTS	
Labelling	On-site check

II. – References concerning the control structure

Institut National de l'Origine et de la Qualité (INAO)

TSA 30003, 93555 MONTREUIL Cedex

Tel.: (33) (0)1.73.30.38.00 – Fax: (33) (0)1.73.30.38.04 – Email: contact@inao.gouv.fr

Compliance with the present specification is checked on the basis of an approved control plan, by a third-party body offering guarantees of competence, impartiality and independence that has received delegation from the INAO.
