Published in the agricultural Official Bulletin on 26 November 2020

Specification of the controlled designation of origin “POUILLY-FUISSÉ”

approved by decree no. 2011-1818 of 7 December 2011, JORF of 8 December 2011
approved by the order of 5 November, published in the JORF of 21 November 2020

CHAPTER I

I. – Name of the designation

Only wines meeting the specific provisions set out below may claim the controlled designation of origin “Pouilly-Fuissé”, initially recognised by the decree of 11 September 1936.

II. – Geographical denominations and complementary terms

1° – The name of the controlled designation of origin may be supplemented by the term “premier cru” for wines meeting the production conditions laid down for that term in the present specification.

2° – The name of the controlled designation of origin may be supplemented by the term “premier cru” and followed by the name of one of the climats listed below, for wines meeting the production conditions laid down for the term “premier cru” in the present specification.

3° – The name of the controlled designation of origin may be followed by the name of one of the climats listed below, for wines meeting the production conditions laid down for the term “premier cru” in the present specification.

LIST OF THE CLIMATS

Commune of Chaintré:

- Le Clos de Monsieur Noly
- Les Chevrières
- Aux Quarts
- Le Clos Reyssier

Commune of Fuissé:

- Le Clos
- Les Brulés
- Les Ménétrières
- Les Reisses
- Les Vignes Blanches
- Les Perrières
- Vers Cras

Commune of Solutré-Pouilly:

- La Frérie
- Le Clos de Solutré
- Au Vignerais
- En Servy
- Aux Bouthières
- Aux Chailloux
- Pouilly
- Vers Cras

Commune of Vergisson:

- Les Crays
- La Maréchaude
- Sur la Roche
- En France

III. – Colour and types of product

The controlled designation of origin “Pouilly-Fuissé” is reserved for still white wines.

IV. – Areas and zones in which the various operations are carried out

1° – Geographical area

The harvesting of the grapes, the vinification, the elaboration and the ageing of the wines are carried out within the territory of the following communes of the Saône-et-Loire department, on the basis of the official geographic code of the year 2019: Chaintré, Fuissé, Solutré-Pouilly and Vergisson.

The cartographic documents representing the geographical area may be consulted on the website of the National Institute of Origin and Quality.

2° – Delimited parcel area

a) The wines come exclusively from vines situated within the delimited parcel production area as approved by the National Institute of Origin and Quality at the session of the competent national committee of 7 September 2016.

The National Institute of Origin and Quality lodges with the town hall of the communes referred to in 1° the graphic documents establishing the parcel boundaries of the production area thus approved.

b) Wines liable to benefit from the term “premier cru” come from grapes from parcels situated within the particular delimited parcel production area as approved by the National Institute of Origin and Quality at the session of the competent national committee of 14 November 2019.

The National Institute of Origin and Quality lodges with the town hall of the communes referred to in 1° the graphic documents establishing the parcel boundaries of the production area thus approved.

3° – Immediate proximity area

The immediate proximity area, defined by derogation for the vinification, the elaboration and the ageing of the wines, is made up of the territory of the following communes, on the basis of the official geographic code of the year 2019:

Côte-d'Or department: Agencourt, Aloxe-Corton, Ancey, Arcenant, Argilly, Autricourt, Auxey-Duresses, Baubigny, Beaune, Belan-sur-Ource, Bévy, Bissey-la-Côte, Bligny-lès-Beaune, Boncourt-le-Bois, Bouix, Bouze-lès-Beaune, Brion-sur-Ource, Brochon, Cérilly, Chambœuf, Chambolle-Musigny, Channay, Charrey-sur-Seine, Chassagne-Montrachet, Châtillon-sur-Seine, Chaumont-le-Bois, Chaux, Chenôve, Chevannes, Chorey-lès-Beaune, Clémencey, Collonges-lès- Bévy, Combertault, Comblanchien, Corcelles-les-Arts, Corcelles-les-Monts, Corgoloin, Cormot Vauchignon, Corpeau, Couchey, Curley, Curtil-Vergy, Daix, Dijon, Ebaty, Echevronne, Epernay- sous-Gevrey, L’Etang-Vergy, Etrochey, Fixin, Flagey-Echézeaux, Flavignerot, Fleurey-sur-Ouche, Fussey, Gerland, Gevrey-Chambertin, Gilly-lès-Cîteaux, Gomméville, Grancey-sur-Ource, Griselles, Ladoix-Serrigny, Lantenay, Larrey, Levernois, Magny-lès-Villers, Mâlain, Marcenay, Marey-lès- Fussey, Marsannay-la-Côte, Massingy, Mavilly-Mandelot, Meloisey, Merceuil, Messanges, Meuilley, Meursanges, Meursault, Molesme, Montagny-lès-Beaune, Monthelie, Montliot-et-Courcelles, Morey- Saint-Denis, Mosson, Nantoux, Nicey, Noiron-sur-Seine, Nolay, Nuits-Saint-Georges, Obtrée, Pernand-Vergelesses, Perrigny-lès-Dijon, Plombières-lès-Dijon, Poinçon-lès-Larrey, Pommard, Pothières, Premeaux-Prissey, Prusly-sur-Ource, Puligny-Montrachet, Quincey, Reulle-Vergy, La Rochepot, Ruffey-lès-Beaune, Saint-Aubin, Saint-Bernard, Saint-Philibert, Saint-Romain, Sainte- Colombe-sur-Seine, Sainte-Marie-la-Blanche, Santenay, Savigny-lès-Beaune, Segrois, Tailly, Talant, Thoires, Vannaire, Velars-sur-Ouche, Vertault, Vignoles, Villars-Fontaine, Villebichot, Villedieu, Villers-la-Faye, Villers-Patras, Villy-le-Moutier, Vix, Volnay, Vosne-Romanée, Vougeot

Rhône department: Alix, Anse, L’Arbresle, Les Ardillats, Arnas, Bagnols, Beaujeu, Belleville- en-Beaujolais, Belmont-d’Azergues, Blacé, Le Breuil, Bully, Cercié, Chambost-Allières, Chamelet, Charentay, Charnay, Châtillon, Chazay-d’Azergues, Chénas, Chessy, Chiroubles, Cogny, Corcelles- en-Beaujolais, Denicé, Dracé, Emeringes, Fleurie, Frontenas, Gleizé, Juliénas, Jullié, Lacenas, Lachassagne, Lancié, Lantignié, Légny, Létra, Limas, Lozanne, Lucenay, Marchampt, Marcy, Moiré, Montmelas-Saint-

Sorlin, Morancé, Odenas, Le Perréon, Pommiers, Porte des Pierres Dorées, Quincié- en-Beaujolais, Régnié-Durette, Rivolet, Saint-Clément-sur-Valsonne, Saint-Cyr-le-Chatoux, Saint- Publié au BO agri le 26/11/2020 3 Didier-sur-Beaujeu, Saint-Etienne-des-Oullières, Saint-Etienne-la-Varenne, Saint-Georges-de- Reneins, Saint-Germain-Nuelles, Saint-Jean-des-Vignes, Saint-Julien, Saint-Just-d'Avray, Saint- Lager, Saint-Romain-de-Popey, Saint-Vérand, Sainte-Paule, Salles-Arbuissonnas-en-Beaujolais, Sarcey, Taponas, Ternand, Theizé, Le Val d'Oingt, Vaux-en-Beaujolais, Vauxrenard, Vernay, Villefranche-sur-Saône, Ville-sur-Jarnioux, Villié-Morgon, Vindry-sur-Turdine for the territory of the former communes of Dareizé, Les Olmes et Saint-Loup

Saône-et-Loire department: Aluze, Ameugny, Azé, Barizey, Beaumont-sur-Grosne, Berzé-la- Ville, Berzé-le-Châtel, Bissey-sous-Cruchaud, Bissy-la-Mâconnaise, Bissy-sous-Uxelles, Bissy-sur- Fley, Blanot, Bonnay, Bouzeron, Boyer, Bray, Bresse-sur-Grosne, Burgy, Burnand, Bussières, Buxy, Cersot, Chagny, Chalon-sur-Saône, Chamilly, Champagny-sous-Uxelles, Champforgeuil, Chânes, Change, Chapaize, La Chapelle-de-Bragny, La Chapelle-de-Guinchay, La Chapelle-sous-Brancion, Charbonnières, Chardonnay, La Charmée, Charnay-lès-Mâcon, Charrecey, Chasselas, Chassey-le- Camp, Château, Châtenoy-le-Royal, Chaudenay, Cheilly-lès-Maranges, Chenôves, Chevagny-les- Chevrières, Chissey-lès-Mâcon, Clessé, Cluny, Cormatin, Cortambert, Cortevaix, Couches, Crêches- sur-Saône, Créot, Cruzille, Culles-les-Roches, Curtil-sous-Burnand, Davayé, Demigny, Dennevy, Dezize-lès-Maranges, Donzy-le-Pertuis, Dracy-le-Fort, Dracy-lès-Couches, Epertully, Etrigny, Farges- lès-Chalon, Farges-lès-Mâcon, Flagy, Fleurville, Fley, Fontaines, Fragnes-La Loyère for the territory of the former commune of La Loyère, Genouilly, Germagny, Givry, Granges, Grevilly, Hurigny, Igé, Jalogny, Jambles, Jugy, Jully-lès-Buxy, Lacrost, Laives, Laizé, Lalheue, Leynes, Lournand, Lugny, Mâcon, Malay, Mancey, Martailly-lès-Brancion, Massilly, Mellecey, Mercurey, Messey-sur-Grosne, Milly-Lamartine, Montagny-lès-Buxy, Montbellet, Montceaux-Ragny, Moroges, Nanton, Ozenay, Paris-l'Hôpital, Péronne, Pierreclos, Plottes, Préty, Prissé, Pruzilly, Remigny, La Roche-Vineuse, Romanèche-Thorins, Rosey, Royer, Rully, Saint-Albain, Saint-Ambreuil, Saint- Amour-Bellevue, Saint-Boil, Saint-Clément-sur-Guye, Saint-Denis-de-Vaux, Saint-Désert, Saint-Gengoux-de-Scissé, Saint-Gengoux-le-National, Saint-Germain-lès-Buxy, Saint-Gervais-sur-Couches, Saint-Gilles, Saint-Jean-de-Trézy, Saint-Jean-de-Vaux, Saint-Léger-sur-Dheune, Saint-Mard-de-Vaux, Saint-Martin-Belle-Roche, Saint-Martin-du-Tartre, Saint-Martin-sous-Montaigu, Saint-Maurice-de-Satonnay, Saint-Maurice-des-Champs, Saint-Maurice-lès-Couches, Saint-Pierre-de-Varennes, Saint- Rémy, Saint-Sernin-du-Plain, Saint-Symphorien-d'Ancelles, Saint-Vallerin, Saint-Vérand, Saint- Ythaire, Saisy, La Salle, Salornay-sur-Guye, Sampigny-lès-Maranges, Sancé, Santilly, Sassangy, Saules, Savigny-sur-Grosne, Sennecey-le-Grand, Senozan, Sercy, Serrières, Sigy-le-Châtel, Sologny, Taizé, Tournus, Uchizy, Varennes-lès-Mâcon, Vaux-en-Pré, Vers, Verzé, Le Villars, La Vineuse sur Fregande for the territory of the former communes of Donzy-le-National, La Vineuse et Massy, Vinzelles, Viré

Yonne department: Aigremont, Annay-sur-Serein, Arcy-sur-Cure, Asquins, Augy, Auxerre, Avallon, Bazarnes, Beine, Bernouil, Béru, Bessy-sur-Cure, Bleigny-le-Carreau, Censy, Chablis, Champlay, Champs-sur-Yonne, Chamvres, La Chapelle-Vaupelteigne, Charentenay, Châtel-Gérard, Chemilly-sur-Serein, Cheney, Chevannes, Chichée, Chitry, Collan, Coulangeron, Coulanges-la- Vineuse, Courgis, Cruzy-le-Châtel, Dannemoine, Deux Rivières, Dyé, Epineuil, Escamps, Escolives- Sainte-Camille, Fleys, Fontenay-près-Chablis, Gy-l'Evêque, Héry, Irancy, Island, Joigny, Jouancy, Junay, Jussy, Lichères-près-Aigremont, Lignorelles, Ligny-le-Châtel, Lucy-sur-Cure, Maligny, Mélisey, Merry-Sec, Migé, Molay, Molosmes, Montigny-la-Resle, Montholon for the territory of the communes of Champvallon, Villiers-sur-Tholon et Volgré, Mouffy, Moulins-en-Tonnerrois, Nitry, Noyers, Ouanne, Paroy-sur-Tholon, Pasilly, Pierre-Perthuis, Poilly-sur-Serein, Pontigny, Préhy, Quenne, Roffey, Rouvray, Saint-Bris-le-Vineux, Saint-Cyr-les-Colons, Saint-Père, Sainte-Pallaye, Sainte-Vertu, Sarry, Senan, Serrigny, Tharoiseau, Tissey, Tonnerre, Tronchoy, Val-de-Mercy, Vallan, Venouse, Venoy, Vermenton, Vézannes, Vézelay, Vézinnes, Villeneuve-Saint-Salves, Villy, Vincelles, Vincelottes, Viviers, Yrouerre.

V. – Grape varieties

The wines come from the chardonnay B variety only.

VI. – Management of the vineyard

1° – Training methods

a) – Planting density.
The vines present a minimum planting density of 8,000 plants per hectare, with a spacing between rows less than or equal to 1.40 metre and a spacing between plants within the same row greater than or equal to 0.75 metre.

b) – Pruning rules.
The wines come from vines pruned according to the following provisions:

GENERAL PROVISIONS	
PRUNING METHOD	**PRUNING RULES**
Short pruning (vines trained in Royat cordon)	- The vines are pruned with a maximum of 10 free eyes (buds) per plant; - Each plant bears a maximum of 5 spurs, each pruned to a maximum of 2 free eyes.
Long pruning (vines pruned in Guyot or the Mâconnais "taille à queue")	Vines pruned in single or double Guyot are pruned with a maximum of 10 free eyes per plant. Each plant bears: - either a single long cane bearing at most 6 free eyes and 2 spurs each pruned to a maximum of 2 free eyes; - or a single long cane bearing at most 8 free eyes and 1 spur pruned to a maximum of 2 free eyes; - or two long canes bearing at most 4 free eyes and 1 spur pruned to a maximum of 2 free eyes. Vines pruned by the Mâconnais "taille à queue" are pruned with a maximum of 14 free eyes per plant. Each plant bears one long cane bearing at most 12 free eyes and whose tip is tied to the lower trellising wire.
PARTICULAR PROVISIONS	
When rejuvenating the cordons, the vines are pruned with a maximum of 10 free eyes per plant. Long pruning may be adapted with a 2nd spur allowing the position of the cane to alternate from one year to the next. Whatever the pruning method, the vines may be pruned with additional free eyes provided that, at the phenological stage corresponding to 11 or 12 leaves, the number of fruit-bearing shoots of the year per plant is less than or equal to the number of free eyes defined for the pruning rules.	

c) – Trellising rules and foliage height.
- The vines are compulsorily trellised and the trellising is maintained; - The height of the trellised foliage is at least equal to 0.6 times the spacing between rows, the height of trellised foliage being measured between the lower limit of the foliage, established at least 0.30 metre above the ground, and the upper topping limit.

d) – Average maximum load per parcel.
The average maximum load per parcel is fixed at: - 10,500 kilograms per hectare for wines liable to benefit from the controlled designation of origin "Pouilly-Fuissé"; - 9,500 kilograms per hectare for wines liable to benefit from the term "premier cru".

e) – Threshold for missing vines.
The percentage of dead or missing vine plants, referred to in Article D. 645-4 of the Rural and Maritime Fishing Code, is fixed at 20 %.

f) – Cultivation condition of the vine.
The parcels are managed so as to ensure a good overall cultivation condition of the vine, in particular its sanitary condition and the upkeep of its soil.

2° – Other cultivation practices

a) – In order to preserve the characteristics of the physical and biological environment that constitutes a fundamental element of the terroir: - The permanent grassing of the headlands is compulsory; - In parcels producing wines liable to benefit from the term "premier cru", weeding with chemical products is prohibited, with the exception of biocontrol products approved by the public authorities in viticulture; - A period of soil rest, or a fallow, of at least three cultural years is compulsory between the grubbing-up and the replanting of a parcel situated in the delimited production area of wines liable to benefit from the term "premier cru"; - Any substantial modification of the morphology, of the subsoil, of the arable layer or of the elements ensuring the integrity and durability of the soils of a parcel intended for the production of the controlled designation of origin is prohibited, with the exception of classic deep-ploughing works; - The

destruction, in the vines, of existing “cadoles” (dry-stone huts), dry-stone walls, hedges and “murgers” (dry-stone cairns) is prohibited.

b) – Vine plantings and replacements are carried out with healthy plant material that has been the subject of a hot-water treatment or any other method making it possible to combat flavescence dorée.

3° – Irrigation

Irrigation is prohibited.

VII. – Harvest, transport and ripeness of the grapes

1° – Harvest

a) – The wines come from grapes harvested at proper ripeness.

b) – Particular provisions for transport of the harvest. The harvest is protected from the rain during its transport and at its reception. The use of double-bottomed bins is compulsory for the transport of the mechanically harvested crop for wines liable to benefit from the term “premier cru”.

2° – Ripeness of the grapes

The sugar content of the grapes and the natural alcoholic strengths by volume of the wines meet the following characteristics:

CONTROLLED DESIGNATION OF ORIGIN / TERM	**MINIMUM SUGAR CONTENT OF THE GRAPES (grams per litre of must)**	**MINIMUM NATURAL ALCOHOLIC STRENGTH BY VOLUME**
“Pouilly-Fuissé”	178	11 %
Wines liable to benefit from the term “premier cru”	195	12 %

VIII. – Yields. – Entry into production

1° – Yield and limit yield

The yield and the limit yield referred to in Article D. 645-7 of the Rural and Maritime Fishing Code are fixed at:

CONTROLLED DESIGNATION OF ORIGIN – TERM	**YIELD (hectolitres per hectare)**	**LIMIT YIELD (hectolitres per hectare)**
“Pouilly-Fuissé”	60	70
Wines liable to benefit from the term “premier cru”	56	62

2° – Entry into production of young vines

The benefit of the controlled designation of origin may be granted to wines coming from:

- parcels of young vines only from the 2nd year following that in the course of which planting was carried out in place before 31 July;

- parcels of young vines only from the 1st year following that in the course of which grafting in place was carried out in place before 31 July;

- parcels of vines that have been top-grafted, at the earliest in the 1st year following that in the course of which the top-grafting was carried out before 31 July, and once the parcels no longer contain any variety other than that permitted for the appellation. By way of derogation, in the year following that in the course of which the top-grafting was carried out before 31 July, the variety permitted for the appellation may represent only 80 % of the grape varieties of each parcel concerned.

IX. – Processing, elaboration, ageing, packaging, storage

1° – General provisions

The wines are vinified in accordance with local, fair and constant usages.

a) – Analytical standards. The finished wines, ready to be released for consumption within the meaning of Article D. 645-18-I of the Rural and Maritime Fishing Code, present a maximum content of fermentable sugars (glucose + fructose) of: - 3 grams per litre; - or 4 grams per litre, if the total acidity is greater than or equal to 55.10 milliequivalents per litre, i.e. 4.13 grams per litre expressed as tartaric acid (or 2.7 grams per litre expressed as H2SO4).

b) – Oenological practices and physical treatments. - The use of pieces of wood is prohibited; - After enrichment, the wines present a total alcoholic strength by volume less than or equal to 13.5 %.

c) – Prohibited equipment. Continuous presses are prohibited.

d) – Vat capacity. Every operator has an overall vat capacity (vinification and storage) at least equal to the volume of wine vinified for the harvest of the previous year, entered either on the harvest declaration in proportion to the evolution of the area in production of the holding, or on the production declaration.

e) – Upkeep of the cellar and equipment. The cellar and the vinification equipment are well maintained; this is reflected in particular by: - a general hygiene of the elaboration premises with a state of general cleanliness, maintained floors, an adequate drainage and a covering avoiding stagnation; - a harmlessness of the materials and products coming into contact with the wine; - a separation and a specificity of the premises: the premises not having the same functions must be separated, such as the storage zones for plant-protection products, cleaning products or hydrocarbons from the vinification, ageing and dry-materials storage premises (corks, cartons); - a management of the wine effluents: the effluents must be removed as quickly as possible from the foodstuff premises, deposited in well-maintained containers, easy to clean and having a closure; the waste storage areas must be kept clean, the waste must be eliminated in a hygienic manner and in compliance with the environment, a waste storage and evacuation zone must be provided; - an absence of risk or odorous substances in the vinification, ageing and storage premises (odour).

f) – Ageing. - Before packaging, the wines undergo ageing at least: - until 1 February of the year following that of the harvest; - until 1 July of the year following that of the harvest for wines liable to benefit from the term “premier cru”. - The temperature of the containers, during the ageing phase, is controlled and less than or equal to 25 °C.

2° – Provisions relating to packaging

For each packaged lot, the operator keeps available for the approved control body: - the information appearing in the register of handling operations referred to in Article D. 645-18 of the Rural and Maritime Fishing Code; - the analysis reports carried out before or after packaging. These analysis reports are kept for a period of 6 months from the date of packaging.

3° – Provisions relating to storage

The operator demonstrates a protected storage place for the wines packaged in bare bottles and having a temperature between 5 °C and 22 °C.

4° – Provisions relating to the movement of products and to placing on the market for the consumer

a) – At the end of the ageing period, the wines are placed on the market for the consumer from 15 February of the year following that of the harvest;

b) – At the end of the ageing period, the wines benefiting from the term “premier cru” are placed on the market for the consumer from 15 July of the year following that of the harvest.

X. – Link with the geographical area

1° – Information on the geographical area

a) – Description of the natural factors contributing to the link

The geographical area is situated in the southern part of the Burgundy region. It forms a sash, crossing diagonally the ridges of the southern extremity of the natural region of the "Mâconnais". It thus extends over four communes of the Saône-et-Loire department, about 10 kilometres to the west of Mâcon.

The emblematic limestone rocks of Vergisson and Solutré, an illustrious prehistoric site, dominate the undulating and rugged landscape. The topography is complex. The scalloped crests of the ridges, with their asymmetrical relief, divide the geographical area. The slopes facing east are generally of moderate gradient. Conversely, the slopes oriented to the west are markedly steeper. Transverse valleys cut across the crests and create small cirques whose slopes face north and south.

This complex structure brings varied substrates to the surface, principally composed of limestones and marls (clayey limestones) of the Jurassic. Locally, rhyolites, acidic volcanic rocks of the Palaeozoic, outcrop. To these various situations corresponds a great variety of soils. The most frequent soils, on the limestone and marly-limestone formations, are lean and stony, very free-draining. More clayey soils have also developed, mainly at the foot of the slopes on colluvium, together with very stony acidic soils resting on the rhyolites.

The climate is oceanic, subject to clear southern influences. Precipitation is regularly distributed over the year and does not exceed 800 millimetres. It is moderate during the vine's growing period. The excesses are limited both by the natural barrier of the Charollais hills to the west, which partly protect the vines from the humid western influences, and by the beneficial influence of the mild air currents coming from the south along the Rhône corridor from the first fine days. The mean annual temperature is 11 °C. The summers are hot and well sunlit.

b) – Description of the human factors contributing to the link

The presence of the vine in the Mâconnais is ancient. In 2002, A. PELLETIER recalls that boatmen already transported on the Saône, for the benefit of the market of Lugdunum, "the wine that comes from Burgundy where the vineyard has existed since the 1st century". The cultivation of the vine and the wine trade develop strongly from the Middle Ages. The Abbey of Cluny, close to the geographical area, owns vineyard in the Southern Mâconnais.

Until the 18th century, the vineyard of "Pouilly-Fuissé", like the whole of the Mâconnais, is above all planted with the gamay N variety. The change takes place from the beginning of the 19th century. Property deeds in 1820 mention the chardonnay B variety as the main constituent of the grape varieties. The learned ampelographer JULLIEN writes, in 1866, "… the chardonnay, which provides the good wines of Pouilly…". The final spread of the chardonnay B variety takes place during the replantings, following the phylloxera crisis, at the beginning of the 20th century. It now constitutes the whole of the grape varieties of the vineyard of "Pouilly-Fuissé". The wines of "Pouilly", a hamlet of the geographical area often cited in the literature, are then the most renowned.

Following multiple disputes concerning the use of this name, the Court of First Instance of Mâcon rules, as early as 7 December 1922, on the limits of the geographical area of the designation of origin "Pouilly-Fuissé", thereby attesting to the necessity of protecting the remarkable and singular character of the wines of the "cru".

On 13 January 1929, the "Union of Producers of Pouilly-Fuissé" is founded, on the initiative of the mayors of the four communes of the geographical area. It conducts the file for the recognition of the controlled designation of origin, made official by the decree of 11 September 1936.

Large estates are rare and family holdings dominate, with an average area of between 3 and 4 hectares and a very fragmented parcel structure. 70 % of the volume produced is vinified in private cellars.

Around thirty "climats" (the name given locally to a lieu-dit) are regularly declared by the producers and shown on the labels of the wines.

The wines from the best situations have acquired a renown that has caused them to stand out under the term "premier cru". The climats (a customary name given to a lieu-dit, or a grouping of lieux-dits) classified as "premier cru" are present in each of the communes of the appellation. They occupy the best-exposed hillsides, often on the reverse side of the rocks (Mont Pouilly, Roche de Solutré and Roche de

Vergisson), or the limestone plateaux. These climats number 22 and all possess an established renown, since the beginning of the 19th century for some such as Pouilly, or after the Second World War for most of the others. The particular balance of these wines and their ageing aptitude require a longer ageing period in order to present the consumer with a wine at its optimum.

All the wines of the appellation undergo ageing at controlled temperature. At least until 1 February of the year following that of the harvest and, at least until 1 July of the year following that of the harvest for the wines benefiting from the term “premier cru”.

The “taille à queue” in single or double arch, characteristic of the “Mâconnais”, is still widely practised. It makes it possible to protect the vine against spring frost.

The vineyard extends, in 2019, over about 800 hectares for a production of 40,000 hectolitres elaborated by more than 350 operators.

2° – Information on the quality and characteristics of the product

The “Pouilly-Fuissé”, with its generally green-gold robe in its youth, is a dry wine, all in finesse and distinction, which often expresses delicate nuances of white flowers and citrus. These frequently evolve towards notes of hazelnut, grilled almond, vanilla or gunflint in the course of ageing. The structure on the palate is full and rich, with a successful balance between power and elegance.

The wines benefiting from the term “premier cru” express more intensity. They may be more fruity, more powerful or more mineral according to the provenance of the grapes, thus declining the various pedological and meso-climatic situations of the territory. They are wines for keeping which require some years to reach their fullness. They also require a longer ageing period to fully express their balance, their length, their intensity and their complexity.

3° – Causal interactions

The oceanic climate tempered by southern influences is expressed by a mildness specific to the “Southern Mâconnais”. The wines of “Pouilly-Fuissé” assert there a particular typicity whose common denominator is the fleshiness and fruitiness on the palate, illustrating the origin “Southern Burgundy”.

The complex relief, formed of scalloped crests with slopes of various exposures, combined with varied but most often limestone substrates, forms a mosaic of environments where the chardonnay B variety has found a cradle of choice, notably in the natural cirques of Solutré-Pouilly, Fuissé and Vergisson and on the hillsides of Chaintré. This arrangement has given rise to a great richness of natural environments, each situation being characterised moreover by its own soil and mesoclimate. The recognition of this diversity has prompted the producers to mention the name of the “climat” of provenance of the grapes on the labels, thus enhancing these nuances that are fully expressed in the wines.

The efforts made by the producers are constant and the know-how has been perpetuated to respect the original character of the wines expressed by the nature of the soils, both through the viticultural usages and in the cellars. Reflecting this know-how, the precisely delimited parcels for the harvesting of the grapes are established in the position of more or less steep hillsides, facing the plain of the Saône, with variable exposures, from south-west to north-east, between 220 metres and 420 metres of altitude.

The rocks of Solutré and Vergisson, symbols of the vineyard, are omnipresent above the vines and appear on numerous labels and promotional logos. On the village square of Solutré-Pouilly, the “Union of Producers of Pouilly-Fuissé” has created “the Atrium”, a place for tasting, buying and discovering the wines of the controlled designation of origin. This exceptional natural environment of the “Pouilly-Fuissé” is recognised nationally and protected under the name of “Grand Site Solutré-Pouilly-Vergisson”. With nearly 200,000 visitors each year, the “Grand Site” is one of the most visited tourist destinations in Burgundy.

In 1995, a bequest enabled the Hospices de Beaune to become the owner of a vineyard of 4 hectares, at Chaintré. The “Pouilly-Fuissé” is thus the only “cru” not produced in the Côte-d'Or to figure among the cuvées put up for auction each year at the famous November sale. The wines of “Pouilly-Fuissé”, a flagship vineyard of the Mâconnais, are widely exported, at more than 70 % of the production, mainly to Great Britain, Asia and the United States, where they have acquired a very great renown.

XI. – Transitional measures

1° – Planting density

Parcels of vines in place on 31 July 2009 presenting a planting density of between 6,000 plants per hectare and 8,000 plants per hectare continue to benefit, for their harvest, from the right to the controlled designation of origin, until they are grubbed up.

2° – Pruning rules

Parcels of vines in place before 31 August 1975 and pruned by the pruning known as the Mâconnais "taille à queue" may be pruned in such a way that, at the phenological stage corresponding to 11 or 12 leaves, each plant bears a maximum of 28 fruit-bearing shoots of the year, of which 2 canes each bearing a maximum of 12 fruit-bearing shoots of the year.

XII. – Rules of presentation and labelling

1° – General provisions

Wines for which, under the terms of the present specification, the controlled designation of origin "Pouilly-Fuissé" is claimed and which are presented under the said appellation may not be declared after the harvest, offered to the public, dispatched, put up for sale or sold unless, in the harvest declaration, in advertisements, on leaflets, labels, invoices and any containers whatsoever, the aforesaid controlled designation of origin is entered.

2° – Particular provisions

a) – The name of a climat that may be associated with the term "premier cru" is placed immediately after the name of the controlled designation of origin and printed in characters whose dimensions are not greater, both in height and in width, than those of the characters composing the name of the controlled designation of origin.

b) – The labelling of the wines benefiting from the controlled designation of origin may specify the name of a smaller geographical unit, provided that: - it is the name of a registered cadastral lieu-dit; - this name appears on the harvest declaration; - the name of the registered cadastral lieu-dit is not identical to that of one of the climats liable to benefit from the term "premier cru", in order to avoid any problem of homonymy. The name of the registered cadastral lieu-dit is printed in characters whose dimensions are not greater, both in height and in width, than half those of the characters composing the name of the controlled designation of origin.

c) – The labelling of the wines benefiting from the controlled designation of origin may specify the larger geographical unit "Vin de Bourgogne" or "Grand Vin de Bourgogne".

d) – Where the indication of the grape variety is specified on the labelling, this indication does not appear in the same visual field as the compulsory indications, and is printed in characters whose dimensions do not exceed 2 millimetres.

CHAPTER II

I. – Declaration obligations

1. Claim declaration

The claim declaration is sent to the defence and management body at least fifteen days before movement between approved warehouse keepers, and at the latest on 10 December of the year of harvest. This declaration specifies in particular: - the designation claimed; - the volume of the wine; - the EVV or SIRET number; - the name and address of the applicant; - the place of storage of the wine. It is accompanied in particular by a copy of the harvest declaration and, as the case may be, a copy of the production declaration or an extract of the stock accounts for buyers of grapes and musts.

2. Prior declaration of transaction and removals

Every operator wishing to market in bulk a wine benefiting from the controlled designation of origin makes, to the approved control body, a transaction declaration for the lot concerned within time limits set

in the control plan, between six and fifteen working days before any removal. This declaration, accompanied where applicable by a copy of the purchase contract, specifies in particular: - the identity of the operator; - the EVV or SIRET number; - the identification of the lot; - the volume of the lot; - the identification of the containers for non-packaged wines; - the identity of the buyer. In the event of removals carried out for volumes lower than those determined in the transaction declaration, the operator informs the approved control body in writing.

3. Declaration of release for consumption

Every operator declares each lot of wine, intended to be released for consumption within the meaning of Article D. 645-18-I of the Rural and Maritime Fishing Code, to the approved control body. This declaration may also be established for already-packaged lots. It is made within time limits set in the control plan, between six and fifteen working days before the release for consumption or before the dispatch of the lots concerned from the operator's cellars. It specifies in particular: - the identity of the operator; - the EVV or SIRET number; - the identification of the lot; - the volume of the lot; - the lot number for already-packaged wines; - the identification of the containers for non-packaged wines. However, the making available, by the operator, of the register referred to in Article D. 645-18 II of the Rural and Maritime Fishing Code, to the approved control body, constitutes a declaration of release for consumption according to the arrangements set in the control plan.

4. Declaration relating to the dispatch outside the national territory of a non-packaged wine

Every operator wishing to carry out a dispatch outside the national territory of a non-packaged wine benefiting from the controlled designation of origin makes the declaration thereof, to the approved control body, within time limits set in the control plan, between six and fifteen working days before any dispatch.

5. Fallback (repli) declaration

Every operator carrying out a fallback of a wine benefiting from the controlled designation of origin into a more general controlled designation of origin sends, to the defence and management body and to the approved control body, a monthly declaration at the latest on the 1st working day following the tenth day of each month. This declaration indicates in particular: - the identity of the operator; - the EVV or SIRET number; - the more general controlled designation of origin of the fallback; - the volume that has been the subject of the fallback; - the vintage; - the state of the fallback lot (bulk, bottle, hermetic vacuum containers, etc.); - the date of the fallback. The approved control body transmits without delay a copy of the monthly declaration to the approved control body for the more general controlled designation of origin concerned. The defence and management body transmits without delay to the defence and management body of the more general controlled designation of origin concerned the list of operators having made a monthly fallback declaration as well as a summary statement indicating: - the more general controlled designation of origin of the fallback; - the volume that has been the subject of the fallback; - the vintage(s); - the state of the fallback lot(s) (bulk, bottle, hermetic vacuum containers, etc.).

6. Downgrading declaration

Every operator carrying out a downgrading of wines benefiting from the controlled designation of origin sends, to the defence and management body and to the approved control body, a monthly declaration within time limits set in the control plan. This declaration indicates in particular: - the identity of the operator; - the EVV or SIRET number; - the volume that has been the subject of the downgrading; - the vintage; - the date of the downgrading.

7. Reworking of parcels

Before any development or any works liable to modify the morphology, the subsoil, the arable layer (including any addition of exogenous soil) or the elements ensuring the integrity and durability of the soils of a parcel intended for the production of the controlled designation of origin, with the exception of classic deep-ploughing works, a declaration is sent by the operator to the defence and management body at least four weeks before the date scheduled for the start of the envisaged works. The defence and management body transmits, without delay, a copy of this declaration to the services of the National Institute of Origin and Quality.

8. Declaration of grubbing-up and planting

For parcels situated in the particular delimited parcel production area for wines liable to benefit from the term “premier cru”, each operator declares to the defence and management body, before the end of the current wine-growing campaign, the parcels grubbed up, the parcels planted and the provisional replanting plan.

II. – Keeping of registers

General plan of the storage and vinification premises

Every vinifying operator keeps up to date and available for the approved control body a general plan of the storage and vinification premises, allowing in particular the number, designation and capacity of the containers to be identified.

Monitoring of wines liable to benefit from the term “premier cru”

Every operator who produces wines liable to benefit from the term “premier cru” keeps available for the defence and management body and the control body the following information: - Any document making it possible to justify the use of the double-bottomed bin. - Weedkiller spread per parcel in production: number of the parcel, name of the product, date, quantity spread.

CHAPTER III

I. – Main points to be checked and evaluation methods

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
A – STRUCTURAL RULES	
A1 – Location of the operators in the immediate proximity area	Documentary check
A2 – Belonging of the planted parcels to the delimited area	- Documentary check (up-to-date CVI parcel record); - Check in the field.
A3 – Claimable production potential (grape varieties and proportion rules, monitoring of transitional measures, planting density, plant material)	- Documentary check; - Check in the field.
A4 – Processing, ageing, packaging and storage facilities	
Vat capacity	- Documentary check: general plan of the storage premises; - On-site check.
Ageing (temperature control and ageing duration)	- Documentary check: declaration of release for consumption or bottling register; - On-site check.
Condition of upkeep of the cellar and equipment (hygiene)	On-site check
Protected storage place and storage conditions (°C)	On-site check
B – RULES LINKED TO THE PRODUCTION CYCLE	
B1 – Management of the vineyard. — Pruning	Check in the field
Average maximum load per parcel	Check in the field
Cultivation and sanitary condition of the vine (sanitary condition of the foliage and berries, soil upkeep, trellising upkeep)	Check in the field
B2 – Harvest, transport and ripeness of the grapes. — Ripeness of the grapes	- Documentary check: recording of the ripeness monitoring; - Check in the field.
B3 – Processing, elaboration, ageing, packaging, storage. — Oenological practices or treatments	- Documentary check: enrichment, acidification, deacidification register; - On-site check.

(enrichment, prohibited practices…)	
Stock accounts, analytical traceability	Documentary check: register keeping, analysis reports.
B4 – Harvest declaration and claim declaration	
Missing vines	- Documentary check (up-to-date keeping of the list); - Check in the field.
Authorised yield	Documentary check: check of declarations, monitoring of the authorisations granted by the INAO services, after enquiry by the said services upon individual request of the operator.
VSI, volumes harvested in excess of the authorised yield	Documentary check: monitoring of destruction certificates
Claim declaration	- Documentary check and on-site check: compliance with the arrangements and deadlines, consistency with the harvest declaration, production declaration; - Control of the placing into circulation of the products.
C – CHECKS ON THE PRODUCTS	
Non-packaged wines (at transaction or removal)	Analytical and organoleptic examination
Packaged wines (before or after preparation for release for consumption)	Analytical and organoleptic examination
Non-packaged wines intended for a dispatch outside the national territory	Analytical and organoleptic examination of all the lots
D – PRESENTATION OF THE PRODUCTS	
Labelling	On-site check

II. – References concerning the control structure

SIQOCERT
132/134 route de Dijon
21207 BEAUNE CEDEX
Tel: (33) (0)3 80 25 09 50
Fax: (33) (0)3 80 24 63 23
Email: siqocert@siqocert.fr

The check of compliance with the present specification is carried out by a third-party body offering guarantees of competence, impartiality and independence, on behalf of the INAO, on the basis of an approved control plan.

The control plan sets out the self-checks carried out by the operators on their own activity and the internal checks carried out under the responsibility of the defence and management body. It indicates the external checks carried out by the third-party body as well as the analytical and organoleptic examinations. The whole of the checks is carried out by sampling. Non-packaged wines intended for a dispatch outside the national territory are the subject of a systematic analytical and organoleptic check.
