**Specification of the protected designation of origin "POUILLY-VINZELLES"**

approved by decree no. 2011-1798 of 6 December 2011, JORF of … December 2011

## CHAPTER I

### I. – Name of the designation

Only wines meeting the specific provisions set out below may claim the protected designation of origin "Pouilly-Vinzelles", initially recognised by the decree of 27 April 1940.

### II. – Geographical denominations and complementary terms

1. The name of the protected designation of origin may be supplemented by the term "premier cru" for wines meeting the production conditions laid down for this term in the present specification.

2. The name of the protected designation of origin may be supplemented by the term "premier cru" and followed by the name of the climats named below, for wines meeting the production conditions laid down for this term in the present specification.

3. The name of the protected designation of origin may be followed by the name of the climats listed below, for wines meeting the production conditions laid down for the term "premier cru" in the present specification:

| **LIST OF CLIMATS** |
|---|
| – Les Longeays; – Les Pétaux; – Les Quarts |

### III. – Colour and types of product

The protected designation of origin "Pouilly-Vinzelles" is reserved for still white wines.

### IV. – Areas and zones in which the various operations are carried out

*1° – Geographical area*

The harvesting of the grapes, the vinification, the elaboration and the ageing of the wines are carried out within the territory of the commune of Vinzelles in the Saône-et-Loire department, on the basis of the official geographic code of the year 2023.

The cartographic documents representing the geographical area may be consulted on the website of the National Institute of Origin and Quality.

*2° – Delimited parcel area*

a) The wines come exclusively from vines situated within the delimited parcel production area as approved by the competent national committee of the National Institute of Origin and Quality at its session of 6 September 2018. The National Institute of Origin and Quality lodges with the town hall of the commune referred to in 1° the graphic documents establishing the parcel boundaries of the production area thus approved.

b) Wines eligible for the term "premier cru" come from grapes from parcels situated within the specific delimited parcel production area as approved by the competent national committee of the National Institute of Origin and Quality at the session of 6 February 2024. The National Institute of Origin and Quality lodges with the town hall of the commune referred to in 1° the graphic documents establishing the parcel boundaries of the production area thus approved.

*3° – Immediate proximity area*

The immediate proximity area, defined by derogation for the vinification, the elaboration and the ageing of the wines, is made up of the territory of the following communes, on the basis of the official geographic code of the year 2023:

- Côte-d'Or department: Agencourt, Aloxe-Corton, Ancey, Arcenant, Argilly, Autricourt, Auxey-Duresses, Baubigny, Beaune, Belan-sur-Ource, Bévy, Bissey-la-Côte, Bligny-lès-Beaune, Boncourt-le-Bois, Bouix, Bouze-lès-Beaune, Brion-sur-Ource, Brochon, Cérilly, Chambœuf, Chambolle-Musigny, Channay, Charrey-sur-Seine, Chassagne-Montrachet, Châtillon-sur-Seine, Chaumont-le-Bois, Chaux, Chenôve, Chevannes, Chorey-lès-Beaune, Collonges-lès-Bévy, Combertault, Comblanchien, Corcelles-les-Arts, Corcelles-les-Monts, Corgoloin, Cormot-Vauchignon, Corpeau, Couchey, Curley, Curtil-Vergy, Daix, Dijon, Ebaty, Echevronne, Epernay-sous-Gevrey, Etrochey, Fixin, Flagey-Echézeaux, Flavignerot, Fleurey-sur-Ouche, Fussey, Gerland, Gevrey-Chambertin, Gilly-lès-Cîteaux, Gomméville, Grancey-sur-Ource, Griselles, La-Rochepot, Ladoix-Serrigny, Lantenay, Larrey, L'Etang-Vergy, Levernois, Magny-lès-Villers, Mâlain, Marcenay, Marey-lès-Fussey, Marsannay-la-Côte, Massingy, Mavilly-Mandelot, Meloisey, Merceuil, Messanges, Meuilley, Meursanges, Meursault, Molesme, Montagny-lès-Beaune, Monthelie, Montliot-et-Courcelles, Morey-Saint-Denis, Mosson, Nantoux, Nicey, Noiron-sur-Seine, Nolay, Nuits-Saint-Georges, Obtrée, Pernand-Vergelesses, Perrigny-lès-Dijon, Plombières-lès-Dijon, Poinçon-lès-Larrey, Pommard, Pothières, Premeaux-Prissey, Prusly-sur-Ource, Puligny-Montrachet, Quincey, Reulle-Vergy, Ruffey-lès-Beaune, Saint-Aubin, Saint-Bernard, Sainte-Colombe-sur-Seine, Sainte-Marie-la-Blanche Saint-Philibert, Saint-Romain, Santenay, Savigny-lès-Beaune, Segrois, Tailly, Talant, Thoires, Valforêt (for the part of the territory corresponding to the former commune of Clémencey), Vannaire, Velars-sur-Ouche, Vertault, Vignoles, Villars-Fontaine, Villebichot, Villedieu, Villers-la-Faye, Villers-Patras, Villy-le-Moutier, Vix, Volnay, Vosne-Romanée and Vougeot;

- Rhône department: Alix, Anse, Arnas, Bagnols, Beaujeu, Belleville-en-Beaujolais, Belmont-d'Azergues, Blacé, Bully, Cercié, Chambost-Allières, Chamelet, Charentay, Charnay, Châtillon, Chazay-d'Azergues, Chénas, Chessy, Chiroubles, Cogny, Corcelles-en-Beaujolais, Dareizé, Denicé, Dracé, Emeringes, Fleurie, Frontenas, Gleizé, Juliénas, Jullié, L'Arbresle, Lacenas, Lachassagne, Lancié, Lantignié, Le Breuil, Le Perréon, Légny, Les Ardillats, Létra, Limas, Lozanne, Lucenay, Marchampt, Marcy, Moiré, Montmelas-Saint-Sorlin, Morancé, Odenas, Pommiers, Porte des Pierres Dorées, Quincié-en-Beaujolais, Régnié-Durette, Rivolet, Saint-Etienne-des-Oullières, Saint-Georges-de-Reneins, Saint-Germain-Nuelles, Saint-Vérand, Saint-Clément-sur-Valsonne, Saint-Cyr-le-Chatoux, Saint-Didier-sur-Beaujeu, Sainte-Paule, Saint-Etienne-la-Varenne, Saint-Jean-des-Vignes, Saint-Julien, Saint-Just-d'Avray, Saint-Lager, Saint-Romain-de-Popey, Salles-Arbuissonnas-en-Beaujolais, Sarcey, Taponas, Ternand, Theizé, Val-d'Oingt, Vaux-en-Beaujolais, Vauxrenard, Vernay, Ville-sur-Jarnioux, Villefranche, Villié-Morgon and Vindry-sur-Turdine (for the part of the territory corresponding to the former communes of Dareizé, Les Olmes and Saint-Loup);

- Saône-et-Loire department: Aluze, Ameugny, Azé, Barizey, Beaumont-sur-Grosne, Berzé-la-Ville, Berzé-le-Châtel, Bissey-sous-Cruchaud, Bissy-la-Mâconnaise, Bissy-sous-Uxelles, Bissy-sur-Fley, Blanot, Bonnay-Saint-Ythaire, Bouzeron, Boyer, Bray, Bresse-sur-Grosne, Burgy, Burnand, Bussières, Buxy, Cersot, Chagny, Chaintré, Chalon-sur-Saône, Chamilly, Champagny-sous-Uxelles, Champforgeuil, Chânes, Change, Chapaize, La Chapelle-de-Bragny, La Chapelle-de-Guinchay, La Chapelle-sous-Brancion, Charbonnières, Chardonnay, La Charmée, Charnay-lès-Mâcon, Charrecey, Chasselas, Chassey-le-Camp, Château, Châtenoy-le-Royal, Chaudenay, Cheilly-lès-Maranges, Chenôves, Chevagny-lès-Chevrières, Chissey-lès-Mâcon, Clessé, Cluny, Cormatin, Cortambert, Cortevaix, Couches, Crêches-sur-Saône, Créot, Cruzille, Culles-les-Roches, Curtil-sous-Burnand, Davayé, Demigny, Dennevy, Dezize-lès-Maranges, Donzy-le-Pertuis, Dracy-lès-Couches, Dracy-le-Fort, Epertully, Etrigny, Farges-lès-Chalon, Farges-lès-Mâcon, Flagy, Fleurville, Fley, Fontaines, Fragnes-la-Loyère (for the part of the territory corresponding to the former commune of La Loyère),

Fuissé, Genouilly, Germagny, Givry, Granges, Grevilly, Hurigny, Igé, Jalogny, Jambles, Jugy, Jully-lès-Buxy, La Vineuse-sur-Frégande (for the part of the territory corresponding to the former communes of Donzy-le-National, La Vineuse and Massy), Lacrost, Laives, Laizé, Lalheue, Leynes, Lournand, Lugny, Mâcon, Malay, Mancey, Martailly-lès-Brancion, Massilly, Massy, Mellecey, Mercurey, Messey-sur-Grosne, Milly-Lamartine, Montagny-lès-Buxy, Montbellet, Montceaux-Ragny, Moroges, Nanton, Ozenay, Paris-l'Hôpital, Péronne, Pierreclos, Plottes, Préty, Prissé, Pruzilly, Remigny, La Roche-Vineuse, Romanèche-Thorins, Rosey, Royer, Rully, Saint-Jean-de-Trézy, Saint-Albain, Saint-Ambreuil, Saint-Amour-Bellevue, Saint-Boil, Saint-Clément-sur-Guye, Saint-Denis-de-Vaux, Saint-Désert, Saint-Gengoux-de-Scissé, Saint-Gengoux-le-National, Saint-Germain-lès-Buxy, Saint-Gervais-sur-Couches, Saint-Gilles, Saint-Jean-de-Vaux, Saint-Léger-sur-Dheune, Saint-Mard-de-Vaux, Saint-Martin-Belle-Roche, Saint-Martin-du-Tartre, Saint-Martin-sous-Montaigu, Saint-Maurice-de-Satonnay, Saint-Maurice-des-Champs, Saint-Rémy, Saint-Sernin-du-Plain, Saint-Vallerin, Saint-Vérand, Saisy, La Salle, Salornay-sur-Guye, Sampigny-lès-Maranges, Sancé, Santilly, Sassangy, Saules, Savigny-sur-Grosne, Sennecey-le-Grand, Senozan, Sercy, Serrières, Sigy-le-Châtel, Sologny, Solutré-Pouilly, Saint-Maurice-lès-Couches, Saint-Pierre-de-Varennes, Saint-Symphorien-d'Ancelles, Taizé, Tournus, Uchizy, Varennes-lès-Mâcon, Vaux-en-Pré, Vergisson, Vers, Verzé, Le Villars and Viré;

- Yonne department: Aigremont, Annay-sur-Serin, Arcy-sur-Cure, Asquins, Augy, Auxerre, Avallon, Bazarnes, Beine, Bernouil, Béru, Bessy-sur-Cure, Bleigny-le-Carreau, Censy, Chablis, Champlay, Champs-sur-Yonne, Chamvres, Charentenay, Châtel-Gérard, Chemilly-sur-Serein, Cheney, Chevannes, Chichée, Chitry, Collan, Coulangeron, Coulanges-la-Vineuse, Courgis, Cruzy-le-Châtel, Dannemoine, Deux-Rivières, Dyé, Epineuil, Escamps, Escolives-Sainte-Camille, Fleys, Fontenay-près-Chablis, Gy-l'Evêque, Héry, Irancy, Island, Joigny, Jouancy, Junay, Jussy, La-Chapelle-Vaupelteigne, Lichères-près-Aigremont, Lignorelles, Ligny-le-Châtel, Lucy-sur-Cure, Maligny, Mélisey, Merry-Sec, Migé, Molay, Molosmes, Montholon (for the part of the territory corresponding to the former communes of Champvallon, Villiers-sur-Tholon and Volgré), Montigny-la-Resle, Mouffy, Moulins-en-Tonnerois, Nitry, Noyers, Ouanne, Paroy-sur-Tholon, Pasilly, Pierre-Perthuis, Poilly-sur-Serein, Pontigny, Préhy, Quenne, Roffey, Rouvray, Saint-Père, Sainte-Pallaye, Sarry, Senan, Serrigny, Saint-Bris-le-Vineux, Saint-Cyr-les-Colons, Sainte-Vertu, Tharoiseau, Tissey, Tonnerre, Tronchoy, Val-de-Mercy, Vallan, Venouse, Venoy, Vermenton, Vézannes, Vézelay, Vézinnes, Villeneuve-Saint-Salves, Villy, Vincelles, Vincelottes, Viviers and Yrouerre.

## V. – Grape varieties

The wines come solely from the chardonnay B variety.

## VI. – Management of the vineyard

*1° – Training methods*

a) – Planting density

The vines have a minimum planting density of 8,000 plants per hectare, with a spacing between rows less than or equal to 1.40 metres and a spacing between plants within the same row greater than or equal to 0.80 metre.

b) – Pruning rules

The wines come from vines pruned according to the following provisions:

| **PRUNING METHOD** | **PRUNING RULES** |
|---|---|
| **GENERAL PROVISIONS** | |

| **PRUNING METHOD** | **PRUNING RULES** |
|---|---|
| Short pruning (vines trained as Royat cordon) | – The vines are pruned with a maximum of 10 free eyes per plant; – Each plant bears a maximum of 5 spurs, each pruned to a maximum of 2 free eyes. |
| Long pruning (vines pruned in Guyot or in “taille à queue du Mâconnais”) | Vines pruned in single or double Guyot are pruned with a maximum of 10 free eyes per plant. Each plant bears: – either a single cane bearing a maximum of 6 free eyes and 2 spurs each pruned to a maximum of 2 free eyes; – or a single cane bearing a maximum of 8 free eyes and 1 spur pruned to a maximum of 2 free eyes; – or two canes bearing a maximum of 4 free eyes and 1 spur pruned to a maximum of 2 free eyes. Vines pruned in “taille à queue du Mâconnais” are pruned with a maximum of 14 free eyes per plant. Each plant bears a cane with a maximum of 12 free eyes, whose tip is tied to the lower trellising wire. |
| **PARTICULAR PROVISIONS** | |
| When cordons are rejuvenated, the vines are pruned with a maximum of 10 free eyes per plant. Long pruning may be adapted with a 2nd spur allowing the position of the cane to be alternated from one year to the next. Whatever the pruning method, the vines may be pruned with additional free eyes provided that, at the phenological stage corresponding to 11 or 12 leaves, the number of fruit-bearing shoots of the year per plant is less than or equal to the number of free eyes defined in the pruning rules. | |

c) – Trellising and foliage height rules

- The vines must be trellised and the trellising is maintained;

- The height of trellised foliage is at least equal to 0.6 times the spacing between rows, the height of trellised foliage being measured between the lower limit of the foliage, set at least 0.30 metre above the ground, and the upper trimming limit.

d) – Average maximum load per parcel

The average maximum load per parcel is set at:

- 10,500 kilograms per hectare for wines eligible for the protected designation of origin “Pouilly-Vinzelles”;

- 9,500 kilograms per hectare for wines eligible for the term “premier cru”.

e) – Threshold of missing vines

The percentage of dead or missing vine plants referred to in Article D. 645-4 of the Rural and Maritime Fishing Code is set at 20 %.

f) – Cultivation condition of the vine

The parcels are managed so as to ensure a good overall cultivation condition of the vine, in particular its sanitary condition and the upkeep of its soil.

*2° – Other cultivation practices*

a) – In order to preserve the characteristics of the physical and biological environment, which constitutes a fundamental element of the terroir:

- Permanent grass cover of the headlands is compulsory;

- In parcels producing wines eligible for the term “premier cru”, weeding with chemical products is prohibited, including biocontrol products;

- A period of soil rest, or fallow, of at least three growing seasons is compulsory between the grubbing-up and the replanting of a parcel situated within the delimited production area for wines eligible for the term “premier cru”;

- Any substantial modification of the morphology, the subsoil, the arable layer or the elements that guarantee the integrity and sustainability of the soils of a parcel intended for the production of the protected designation of origin is prohibited, with the exception of classic deep-ploughing works.

b) – Vine plantings and replacements are carried out with healthy plant material that has undergone hot-water treatment making it possible to combat flavescence dorée.

*3° – Irrigation*

Irrigation is prohibited.

## VII. – Harvest, transport and ripeness of the grapes

*1° – Harvest*

a) – The wines come from grapes harvested at good ripeness.

b) – Particular harvesting provisions

Wines eligible for the term “premier cru” come exclusively from grapes harvested by hand.

c) – Particular provisions for transport of the harvest

The harvest is protected from rain during its transport and on its reception.

*2° – Ripeness of the grapes*

The sugar content of the grapes and the natural alcoholic strengths by volume of the wines meet the following characteristics:

| **PROTECTED DESIGNATION OF ORIGIN** | **MINIMUM SUGAR CONTENT OF THE GRAPES (grams per litre of must)** | **MINIMUM NATURAL ALCOHOLIC STRENGTH BY VOLUME** |
|---|---|---|
| PDO “Pouilly-Vinzelles” | 178 | 11 % |
| Wines eligible for the term “premier cru” | 195 | 12 % |

## VIII. – Yields – Entry into production

*1° – Yield and limit yield*

The yield and limit yield referred to in Article D. 645-7 of the Rural and Maritime Fishing Code are set at:

| **PROTECTED DESIGNATION OF ORIGIN** | **YIELD (hectolitres per hectare)** | **LIMIT YIELD (hectolitres per hectare)** |
|---|---|---|
| PDO “Pouilly-Vinzelles” | 60 | 70 |
| Wines eligible for the term “premier cru” | 58 | 66 |

*2° – Entry into production of young vines*

The benefit of the protected designation of origin may only be granted to wines coming from:

- parcels of young vines only from the 2nd year following that in the course of which planting was carried out in place before 31 July;

- parcels of young vines only from the 1st year following that in the course of which grafting in place was carried out before 31 July;

- parcels of vines that have been top-grafted, at the earliest in the 1st year following that in the course of which the top-grafting was carried out before 31 July, and once the parcels no longer contain any variety other than that permitted for the appellation. By derogation, in the year following that in the course of which the top-grafting was carried out before 31 July, the variety permitted for the appellation may represent only 80 % of the planting of each parcel concerned.

**IX. – Processing, elaboration, ageing, packaging, storage**

*1° – General provisions*

The wines are vinified in accordance with local, fair and constant usages.

a) – Analytical standards

Finished wines, ready to be released for consumption within the meaning of Article D. 645-18-I of the Rural and Maritime Fishing Code, have a maximum fermentable sugar content (glucose + fructose) of:

- 3 grams per litre;

- or 4 grams per litre if the total acidity is greater than or equal to 55.10 milliequivalents per litre, i.e. 4.13 grams per litre expressed as tartaric acid (or 2.7 grams per litre expressed as H2SO4).

b) – Oenological practices and physical treatments

- The use of pieces of wood is prohibited;

- After enrichment, the wines have a total alcoholic strength by volume less than or equal to 13.5 %.

c) – Prohibited equipment

Continuous presses are prohibited.

d) – Vat capacity

Every operator has an overall vat capacity (vinification and storage) equivalent to at least the volume of wine vinified for the previous year's harvest, as entered either on the harvest declaration, pro rata to the change in the holding's area in production, or on the production declaration.

e) – Upkeep of the cellar and equipment

The cellar and the vinification equipment are well maintained; this is reflected in particular by:

- general hygiene of the elaboration premises, with general cleanliness, well-maintained floors, adequate drainage and a surface avoiding stagnation;

- harmlessness of the equipment and products coming into contact with the wine;

- separation and specificity of the premises: premises without the same functions must be separated, such as storage areas for plant-protection products, cleaning products or hydrocarbons, from the premises for vinification, ageing and storage of dry goods (corks, cartons);

- management of wine effluents: effluents must be removed as quickly as possible from foodstuff premises and deposited in well-maintained containers that are easy to clean and can be closed; waste storage areas must be kept clean; waste must be disposed of hygienically and in an environmentally friendly manner; a waste storage and removal area must be provided;

- absence of hazardous or odorous substances in the vinification, ageing and storage premises (odour).

f) – Ageing

| **GENERAL PROVISION** | |
|---|---|
| The temperature of the containers during the ageing phase is controlled and less than or equal to 25 °C. | |
| **PARTICULAR PROVISIONS** | |
| PDO “Pouilly-Vinzelles” | The wines are aged at least until 1 February of the year following that of the harvest. |
| PDO “Pouilly-Vinzelles” eligible for the term premier cru | The wines are aged at least until 1 July of the year following that of the harvest. |

*2° – Provisions relating to packaging*

For every packaged lot, the operator keeps available for the approved control body:

- the information appearing in the register of handling operations referred to in Article D. 645-18 of the Rural and Maritime Fishing Code;

- the reports of analyses carried out before or after packaging.

These analysis reports are kept for a period of 6 months from the date of packaging.

*3° – Provisions relating to storage*

The operator provides evidence of a protected storage place for wines packaged in unlabelled bottles, with a temperature of between 5 °C and 22 °C.

*4° – Provisions relating to the circulation of products and placing on the market for the consumer*

At the end of the ageing period, the wines are placed on the market for the consumer:

| **PROTECTED DESIGNATION OF ORIGIN** | **DATE** |
|---|---|
| PDO “Pouilly-Vinzelles” | From 15 February of the year following that of the harvest |
| PDO “Pouilly-Vinzelles” eligible for the term “premier cru” | From 15 July of the year following that of the harvest |

## X. – Link with the geographical area

*1° – Information on the geographical area*

a) – Description of the natural factors contributing to the link

The geographical area is situated in the south of the natural region of the “Monts du Mâconnais”, in southern Burgundy. It lies on the east-facing slope of the easternmost ridge of the Mâconnais, facing the Saône plain and the Bresse. It extends over the communes of Vinzelles and Mâcon (former commune of Loché, merged with Mâcon), at the southernmost end of the Saône-et-Loire department.

This ridge is a relief stretching in a north–south direction. Its eastern slope exposes sedimentary formations of the Secondary era, mainly Lower and Middle Jurassic limestones and marls (clayey limestones) and, at the top of the slope, Triassic sandstones. The soils are relatively varied. Rather acid and beige in colour at the top of the slope, they are clay-limestone and reddish-brown in the middle and lower slope. Shallow soils on hard limestone have developed locally. This diversity largely determines the specificity of the various “climats” (names given to cadastral lieux-dits) within the geographical area.

The parcels precisely delimited for the harvesting of the grapes are planted on the east-facing slope, at altitudes of between 210 metres and 280 metres. They occupy the upper slopes, overlooking the villages of Loché and Vinzelles.

The climate is oceanic, tempered by southern influences. Extremes are limited both by the natural barrier of the "Monts du Charollais" to the west, which partly protects the vines from wet influences, and by the beneficial influence of mild air currents coming from the south along the Rhône corridor from the first fine days. The average annual temperature is 11 °C. Summers are hot and sunny. Total annual rainfall does not exceed 800 millimetres, and rainfall is moderate during the vine's growing season.

b) – Description of the human factors contributing to the link

The place name Vinzelles (Vinicella in the 3rd century AD, meaning "little vine") recalls that the vine has been established there since Gallo-Roman times. In the Middle Ages, the monks of Cluny, then the local lords, were able to develop and make the most of the wine-growing potential of the geographical area. The seigneurial properties acquired at that time continued their economic wine-growing function and went through periods of prosperity until the 18th century. In the 19th century, the construction of the Paris–Lyon railway opened up national markets. Periods of serious crisis followed, with phylloxera and overproduction at the end of the 19th century.

Supported by the "Cave coopérative des Grands crus blancs", founded in 1929, the wines of "Pouilly-Vinzelles" were recognised as a designation of origin first by judgment in 1931, then as a controlled designation of origin by the decree of 27 April 1940. The reconstitution of this small vineyard was carried out exclusively with the chardonnay B variety, to the detriment of the gamay N variety that had dominated in the 19th century.

Production is shared between the cooperative system, historically dominant, and more recently dynamic private cellars. Producers highlight the diversity of situations through specific vinifications, emphasised by mentioning, on the labelling of the wines, the name of the "climat" or cadastral lieu-dit. Commercial dynamism is also reflected in a growing share of exports.

From the 1950s until the mid-1980s, the "Cave coopérative des Grands crus blancs" vinified nearly all the volumes. It is still the largest operator, vinifying nearly 60 % of production. A cellar shop for private customers, opened in the 1960s, developed significantly from the 1980s, in parallel with the emphasis placed on indicating the "climat" on labels. Sales in bottle, and exports, really began to develop from that period. At the end of the 1990s, the arrival of a new generation of young growers contributed to the expansion of these practices. More and more producers vinify in their own cellars and are keen to individualise their cuvées and highlight the "climats".

The vines are trained according to the usages specific to the "Mâconnais", in particular arched-cane pruning known as "taille à queue du Mâconnais", which is predominant in the vineyard.

In 2019 the area in production was about fifty hectares, for an average volume of 2,700 hectolitres, produced by some twenty estates. Nearly half of this production is sold in bottle. The cooperative still accounts for 70 % of the volume produced.

*2° – Information on the quality and characteristics of the product*

The wine, with a pale gold robe with green tints, very often gives off a subtle, floral bouquet evoking white flowers and acacia. It may take on deeper tones with age, then expressing on the palate a rich aromatic palette of citrus and other white-fleshed fruit, often evolving with age towards more complex aromas of dried fruit and honeyed notes. Its natural minerality is balanced by richness and opulence.

Wines benefiting from the term "premier cru" may be opulent and silky, round or livelier with a mineral note. They generally keep a fine balance that ensures their persistence on the finish.

*3° – Causal interactions*

The oceanic climate tempered by southern influences is expressed in a mildness characteristic of the south of the "Mâconnais" region. The wines of "Pouilly-Vinzelles" display a particular typicity there, characterised by opulence and fruit on the palate, illustrating their "southern Burgundy" origin. Marked summer heat, sometimes lasting into the autumn, greatly benefits the vine by favouring advanced ripeness.

On this hillside facing the rising sun, at moderate altitude, the chardonnay B variety has found a choice site. The predominantly calcareous soils, which nevertheless retain a certain coolness, lead it to express elegance and minerality.

Although they cover a small area, the parcels precisely delimited for the harvesting of the grapes show a certain variety of soil and exposure conditions. The recognition of this diversity has encouraged producers to mention the name of the "climat" from which the grapes come on the labels, thus highlighting these nuances, which are fully expressed in the wines.

The efforts made by producers are constant, and know-how has been perpetuated to respect the original character of the wines expressed by the nature of the soils, both in viticultural practices and in the cellars. The "taille à queue du Mâconnais", characteristic of this region, allows on the one hand a good distribution of nutrients within the vine plant and, on the other, protects the plants against spring frost.

The individualisation of cuvées is the concern of all producers, who, proud of their best parcels, are keen to isolate each production and to show the names of the "climats" thus differentiated on their labels.

The presence of cellars and wine stores dating back to the 16th century bears witness to the vitality of this vineyard. In the 19th century, the wines of Vinzelles were frequently sold under the name "Pouilly", the name of a neighbouring hamlet renowned for its white wine production. This usage attests to the recognised quality of the production of Vinzelles.

Having developed for some time in the shadow of its neighbour Fuissé, "Pouilly-Vinzelles" has now earned its credentials thanks to the efforts of the young producers established since the end of the 1990s, who have developed export trade.

## X. – Transitional measures

*1° – Planting density*

Vine parcels in place on 31 July 2009 with a planting density of between 6,000 and 8,000 plants per hectare continue to benefit, for their harvest, from the right to the protected designation of origin until they are grubbed up.

*2° – Pruning rules*

Vine parcels in place before 31 August 1975 and pruned in the so-called "taille à queue du Mâconnais" may be pruned in such a way that, at the phenological stage corresponding to 11 or 12 leaves, each plant bears a maximum of 28 fruit-bearing shoots of the year, including 2 canes each bearing a maximum of 12 fruit-bearing shoots of the year.

*3° – Harvesting method for wines eligible for the term premier cru*

Parcels producing wines eligible for the term "premier cru" may be harvested mechanically for a period of 4 harvests from the date of approval of the present specification.

## XI. – Rules of presentation and labelling

*1° – General provisions*

Wines for which, under the terms of the present specification, the protected designation of origin "Pouilly-Vinzelles" is claimed and which are presented under the said appellation may not be declared after the harvest, offered to the public, dispatched, put up for sale or sold unless, in the harvest declaration, in advertisements, on leaflets, labels, invoices and any containers whatsoever, the aforesaid protected designation of origin is entered.

*2° – Particular provisions*

a) The name of a climat that may be associated with the term "premier cru" is placed immediately after the name of the protected designation of origin and printed in characters whose dimensions, both in height and in width, are not larger than those of the characters making up the name of the protected designation of origin.

b) The labelling of wines benefiting from the protected designation of origin may specify the larger geographical unit "Vin de Bourgogne" or "Grand Vin de Bourgogne".

c) – The labelling of wines benefiting from the protected designation of origin may specify the smaller geographical unit, provided that:

- it is the name of a registered lieu-dit (cadastral locality);

- it appears on the harvest declaration;

- the name of the registered lieu-dit is not identical to that of a climat eligible for the term "premier cru", in order to avoid any problem of homonymy.

The name of the registered lieu-dit is printed in characters whose dimensions, both in height and in width, are not larger than half those of the characters making up the name of the protected designation of origin.

d) – Where the grape variety is indicated on the labelling, this indication does not appear in the same field of vision as the compulsory particulars and is printed in characters whose dimensions do not exceed 2 millimetres.

# CHAPTER II

## I. – Declaration obligations

### *1. Claim declaration*

The claim declaration is sent to the defence and management body at least fifteen days before circulation between authorised warehousekeepers and at the latest on 10 December of the year of harvest.

It indicates in particular:

- the designation claimed;

- the volume of the wine;

- the EVV or SIRET number;

- the name and address of the applicant;

- the place of storage of the wine.

It is accompanied in particular by a copy of the harvest declaration and, as the case may be, a copy of the production declaration or an extract of the stock accounts for buyers of grapes and musts.

***2. Declaration prior to transaction and collections***

Every operator wishing to sell in bulk a wine benefiting from the protected designation of origin makes a transaction declaration for the lot concerned to the approved control body within time limits set in the control plan of between six and fifteen working days before any collection.

This declaration, accompanied where applicable by a copy of the purchase contract, specifies in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the identification of the lot;

- the volume of the lot;

- the identification of the containers;

- the identity of the buyer.

If collections are made for volumes smaller than those set out in the transaction declaration, the operator informs the approved control body in writing.

***3. Declaration of release for consumption***

Every operator declares to the approved control body each lot of wine intended to be released for consumption within the meaning of Article D. 645-18-I of the Rural and Maritime Fishing Code.

This declaration may also be drawn up for lots already packaged. It is made within time limits set in the control plan of between six and fifteen working days before release for consumption or before the lots concerned are dispatched from the operator's cellars.

It specifies in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the identification of the lot;

- the volume of the lot;

- the lot number for wines already packaged;

- the identification of the containers for non-packaged wines.

However, making available to the approved control body the register referred to in Article D. 645-18 II of the Rural and Maritime Fishing Code serves as the declaration of release for consumption, under the conditions set out in the control plan.

***4. Declaration relating to the dispatch outside the national territory of a non-packaged wine***

Every operator wishing to dispatch outside the national territory a non-packaged wine benefiting from the protected designation of origin declares it to the approved control body within time limits set in the control plan of between six and fifteen working days before any dispatch.

***5. Fallback declaration***

Every operator carrying out a fallback of a wine benefiting from the protected designation of origin into a more general protected designation of origin sends the defence and management body and the

approved control body a monthly declaration at the latest on the 1st working day following the tenth day of each month.

This declaration indicates in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the more general protected designation of origin of the fallback;

- the volume concerned by the fallback;

- the vintage;

- the state of the lot concerned (bulk, bottle, hermetically sealed vacuum containers…).

The approved control body transmits without delay a copy of the monthly declaration to the approved control body for the more general protected designation of origin concerned.

The defence and management body transmits without delay to the defence and management body of the more general protected designation of origin concerned the list of operators who have made a monthly fallback declaration, together with a summary statement indicating:

- the more general protected designation of origin of the fallback;

- the volume concerned by the fallback;

- the vintage(s);

- the state of the lot(s) concerned (bulk, bottle, hermetically sealed vacuum containers…).

***6. Downgrading declaration***

Every operator carrying out a downgrading of wines benefiting from the protected designation of origin sends the defence and management body and the approved control body a monthly declaration within time limits set in the control plan. This declaration indicates in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the volume downgraded;

- the vintage;

- the date of the downgrading.

***7. Reworking of parcels***

Before any development or any works liable to modify the morphology, the subsoil, the arable layer (including any addition of exogenous soil) or the elements that guarantee the integrity and sustainability of the soils of a parcel intended for the production of the protected designation of origin, with the exception of classic deep-ploughing works, the operator sends a declaration to the defence and management body at least four weeks before the planned start date of the works.

The defence and management body transmits, without delay, a copy of this declaration to the services of the National Institute of Origin and Quality.

***8. Declaration of grubbing-up and planting***

For parcels situated within the delimited parcel production area for wines eligible for the term “premier cru”, each operator declares to the defence and management body, before the end of the

current wine-growing year, the parcels grubbed up, the parcels planted and the provisional replanting plan.

### II. – Keeping of registers

***General plan of the storage and vinification places***

Every vinifying operator keeps up to date and available for the approved control body a general plan of the storage and vinification places, allowing in particular the number, designation and capacity of the containers to be identified.

## CHAPTER III

### I. – Main points to be checked and evaluation methods

| MAIN POINTS TO BE CHECKED | EVALUATION METHODS |
|---|---|
| **A – STRUCTURAL RULES** | |
| A1 – Location of operators within the immediate proximity area | Documentary check |
| A2 – Belonging of the planted parcels to the delimited area | – Documentary check: up-to-date CVI parcel record; – Check in the field |
| A3 – Claimable production potential (grape varieties and proportion rules, monitoring of transitional measures, planting density, plant material) | – Documentary check; – Check in the field |
| A4 – Processing, ageing, packaging and storage facilities | |
| Vat capacity | – Documentary check: general plan of the storage places; – On-site check |
| Ageing (temperature control and length of ageing) | – Documentary check: declaration of release for consumption or bottling register; – On-site check |
| State of upkeep of the cellar and equipment (hygiene) | On-site check |
| Protected storage place and storage conditions (T °C) | On-site check |
| **B – RULES LINKED TO THE PRODUCTION CYCLE** | |
| B1 – Management of the vineyard | |
| Pruning | Check in the field |
| Average maximum load per parcel | Check in the field |
| Cultivation and sanitary condition of the vine (sanitary condition of foliage and berries, upkeep of the soil, upkeep of the trellising) | Check in the field |
| B2 – Harvest, transport and ripeness of the grapes | |
| Ripeness of the grapes | – Documentary check: records of ripeness monitoring; – Check in the field |
| B3 – Processing, elaboration, ageing, packaging, storage | |

| MAIN POINTS TO BE CHECKED | EVALUATION METHODS |
|---|---|
| Oenological practices or treatments (enrichment, prohibited practices…) | – Documentary check: enrichment, acidification and de-acidification register; – On-site check |
| Stock accounts, analytical traceability | Documentary check: keeping of registers, analysis reports |
| B4 – Harvest declaration and claim declaration | |
| Missing vines | – Documentary check (keeping the list up to date); – Check in the field |
| Authorised yield | Documentary check: check of declarations, monitoring of authorisations granted by the INAO services after their investigation of the operator's individual request |
| VSI, volumes harvested in excess of the authorised yield | Documentary check: monitoring of destruction certificates |
| Claim declaration | – Documentary and on-site check: compliance with procedures and time limits, consistency with the harvest and production declarations; – Check of the release of products into circulation |
| **C – CHECKS ON THE PRODUCTS** | |
| Non-packaged wines (at transaction or collection) | Analytical and organoleptic examination |
| Packaged wines (before or after preparation for release for consumption) | Analytical and organoleptic examination |
| Non-packaged wines intended for dispatch outside the national territory | Analytical and organoleptic examination of all lots |
| **D – PRESENTATION OF THE PRODUCTS** | |
| Labelling | On-site check |

## II. – References concerning the control structure

Institut National de l'Origine et de la Qualité (INAO)

TSA 30003, 93555 MONTREUIL Cedex

Tel.: (33) (0)1.73.30.38.00 – Fax: (33) (0)1.73.30.38.04 – Email: contact@inao.gouv.fr

Compliance with the present specification is checked on the basis of an approved control plan, by a third-party body offering guarantees of competence, impartiality and independence that has received delegation from the INAO.
