Specification of the controlled designation of origin "BOURGOGNE PASSE-TOUT-GRAINS"

CHAPTER I

I. – Name of the designation

Only wines meeting the specific provisions set out below may claim the controlled designation of origin "Bourgogne Passe-tout-grains", initially recognised by the decree of 31 July 1937.

II. – Geographical denominations and complementary terms

The name of the controlled designation of origin may not be supplemented or followed by any geographical denomination.

III. – Colour and types of product

The controlled designation of origin "Bourgogne Passe-tout-grains" is reserved for still red or rosé wines.

IV. – Areas and zones in which the various operations are carried out

1° – Geographical area

The harvesting of the grapes, the vinification and the elaboration of the wines are carried out within the territory of the following communes:

- Côte-d'Or department: Aloxe-Corton, Ancey, Arcenant, Auxey-Duresses, Baubigny, Beaune, Belan-sur-Ource, Bévy, Bissey-la-Côte, Bligny-lès-Beaune, Boncourt-le-Bois, Bouix, Bouze-lès-Beaune, Brion-sur-Ource, Brochon, Chambolle-Musigny, Charrey-sur-Seine, Chassagne-Montrachet, Chaumont-le-Bois, Chaux, Chenôve, Chevannes, Chorey-lès-Beaune, Collonges-lès-Bévy, Comblanchien, Corcelles-les-Monts, Corgoloin, Cormot-le-Grand, Corpeau, Couchey, Curtil-Vergy, Daix, Dijon, Echevronne, L'Etang-Vergy, Fixin, Flagey-Echezeaux, Fussey, Gevrey-Chambertin, Gilly-lès-Cîteaux, Gomméville, Griselles, Ladoix-Serrigny, Larrey, Magny-lès-Villers, Mâlain, Marcenay, Marey-lès-Fussey, Marsannay-la-Côte, Massingy, Mavilly-Mandelot, Meloisey, Messanges, Meuilley, Meursault, Molesmes, Monthelie, Montliot-et-Courcelles, Morey-Saint-Denis, Mosson, Nantoux, Noiron-sur-Seine, Nolay, Nuits-Saint-Georges, Obtrée, Pernand-Vergelesses, Plombières-lès-Dijon, Poinçon-lès-Larrey, Pommard, Pothières, Premeaux-Prissey, Puligny-Montrachet, Reulle-Vergy, Rochepot (La), Saint-Aubin, Saint-Romain, Santenay, Savigny-lès-Beaune, Segrois, Talant, Thoires, Vannaire, Vauchignon, Villars-Fontaine, Villedieu, Villers-la-Faye, Villers-Patras, Vix, Volnay, Vosne-Romanée and Vougeot;

- Rhône department: Alix, Anse, L'Arbresle, Les Ardillats, Arnas, Bagnols, Beaujeu, Belleville, Belmont-d'Azergues, Blacé, Le Bois-d'Oingt, Le Breuil, Bully, Cercié, Chambost-Allières, Chamelet, Charentay, Charnay, Châtillon, Chazay-d'Azergues, Chénas, Chessy, Chiroubles, Cogny, Corcelles-en-Beaujolais, Dareizé, Denicé, Emeringes, Fleurie, Frontenas, Gleizé, Jarnioux, Juliénas, Jullié, Lacenas, Lachassagne, Lancié, Lantignié, Légny, Létra, Liergues, Limas, Lozanne, Lucenay, Marchampt, Marcy, Moiré, Montmelas-Saint-Sorlin, Morancé, Nuelles, Odenas, Oingt, Les Olmes, Le Perréon, Pommiers, Pouilly-le-Monial, Quincié-en-Beaujolais, Régnié-Durette, Rivolet, Saint-Clément-sur-Valsonne, Saint-Cyr-le-Chatoux, Saint-Didier-sur-Beaujeu, Saint-Etienne-des-Oullières, Saint-Etienne-la-Varenne, Saint-Georges-de-Reneins, Saint-Germain-sur-l'Arbresle, Saint-Jean-d'Ardières, Saint-Jean-des-Vignes, Saint-Julien, Saint-Just-d'Avray, Saint-Lager, Saint-Laurent-d'Oingt, Saint-Loup, Saint-Romain-de-Popey, Saint-Vérand, Sainte-Paule, Salles-Arbuissonnas-en-Beaujolais, Sarcey, Ternand, Theizé, Vaux-en-Beaujolais, Vauxrenard, Vernay, Ville-sur-Jarnioux and Villié-Morgon;

- Saône-et-Loire department: Aluze, Ameugny, Azé, Barizey, Berzé-la-Ville, Berzé-le-Châtel, Bissey-sous-Cruchaud, Bissy-la-Mâconnaise, Bissy-sous-Uxelles, Bissy-sur-Fley, Blanot, Bonnay, Bouzeron, Boyer, Burgy, Burnand, Bussières, Buxy, Bray, Bresse-sur-Grosne, Cersot, Chagny, Chaintré, Chamilly, Champagny-sous-Uxelles, Chânes, Change, Chapaize, La Chapelle-de-Guinchay, La Chapelle-sous-Brancion, Charbonnières, Chardonnay, Charnay-lès-Mâcon, Charrecey, Chasselas, Chassey-le-Camp, Château, Cheilly-lès-Maranges, Chenôves, Chevagny-lès-Chevrières, Chissey-lès-Mâcon, Clessé, Cortambert, Cortevaix, Couches, Crêches-sur-Saône, Créot, Cruzille, Culles-les-Roches, Curtil-sous-Burnand, Davayé, Dennevy, Dezize-lès-Maranges, Donzy-le-National, Dracy-lès-Couches, Dracy-le-Fort, Epertully, Etrigny, Farges-lès-Mâcon, Fleurville, Fley, Fontaines, Fuissé, Genouilly, Germagny, Givry, Grevilly, Hurigny, Igè, Jalogny, Jambles, Jugy, Jully-lès-Buxy, Lacrost, Laives, Laizé, Leynes, Lournand, Lugny, Mâcon, Malay, Mancey, Martailly-lès-Brancion, Massy, Mellecey, Mercurey, Milly-Lamartine, Montagny-lès-Buxy, Montbellet, Montceaux-Ragny, Moroges, Nanton, Ozenay, Paris-l'Hôpital, Péronne, Pierreclos, Plottes, Préty, Prissé, Pruzilly, Remigny, La Roche-Vineuse, Romanèche-Thorins, Rosey, Royer, Rully, Saint-Albain, Saint-Amour-Bellevue, Saint-Boil, Saint-Clément-sur-Guye, Saint-Denis-de-Vaux, Saint-Désert, Saint-Gengoux-de-Scissé, Saint-Gengoux-le-National, Saint-Gilles, Saint-Jean-de-Trézy, Saint-Jean-de-Vaux, Saint-Léger-sur-Dheune, Saint-Mard-de-Vaux, Saint-Martin-Belle-Roche, Saint-Martin-du-Tartre, Saint-Martin-sous-Montaigu, Saint-Maurice-des-Champs, Saint-Maurice-de-Satonnay, Saint-Maurice-lès-Couches, Saint-Pierre-de-Varennes, Saint-Sernin-du-Plain, Saint-Symphorien-d'Ancelles, Saint-Vallerin, Saint-Vérand, Saint-Ythaire, La Salle, Salornay-sur-Guye, Sampigny-lès-Maranges, Santilly, Sassangy, Saules, Savigny-sur-Grosne, Sennecey-le-Grand, Senozan, Sercy, Serrières, Sigy-le-Châtel, Sologny, Solutré-Pouilly, Tournus, Uchizy, Vaux-en-Pré, Vergisson, Vers, Verzé, Le Villars, La Vineuse, Vinzelles and Viré;

- Yonne department: Accolay, Asquins, Augy, Auxerre, Beine, Bernouil, Béru, Bleigny-le-Carreau, Chablis, Champvallon, La Chapelle-Vaupelteigne, Charentenay, Chemilly-sur-Serein, Cheney, Chichée, Chitry, Collan, Coulanges-la-Vineuse, Courgis, Cravant, Dannemoine, Dyé, Epineuil, Escolives-Sainte-Camille, Fleys, Fontenay-près-Chablis, Irancy, Joigny, Junay, Jussy, Lignorelles, Ligny-le-Châtel, Maligny, Migé, Molosmes, Mouffy, Poilly-sur-Serein, Préhy, Quenne, Saint-Bris-le-Vineux, Saint-Cyr-les-Colons, Saint-Père, Serrigny, Tharoiseau, Tonnerre, Tronchoy, Val-de-Mercy, Venoy, Vermenton, Vézelay, Vézinnes, Villy, Vincelottes, Viviers and Volgré.

2° – Delimited parcel area

The wines come exclusively from vines situated within the delimited parcel production area as approved by the National Institute of Origin and Quality at the sessions of the competent national committee listed in the annex. The National Institute of Origin and Quality lodges with the town halls of the communes referred to in 1° the graphic documents establishing the parcel boundaries of the production area thus approved.

3° – Immediate proximity area

The immediate proximity area, defined by derogation for the vinification and the elaboration of the wines, is made up of the territory of the following communes:

- Côte-d'Or department: Agencourt, Argilly, Autricourt, Cérilly, Chambœuf, Channay, Châtillon-sur-Seine, Clémencey, Combertault, Corcelles-les-Arts, Curley, Ebaty, Epernay-sous-Gevrey, Etrochey, Flavignerot, Fleurey-sur-Ouche, Gerland, Grancey-sur-Ource, Lantenay, Levernois, Merceuil, Meursanges, Montagny-lès-Beaune, Nicey, Perrigny-lès-Dijon, Prusly-sur-Ource, Quincey, Ruffey-lès-Beaune, Saint-Bernard, Saint-Philibert, Sainte-Colombe-sur-Seine, Sainte-Marie-la-Blanche, Tailly, Velars-sur-Ouche, Vertault, Vignoles, Villebichot and Villy-Le-Moutier;

- Rhône department: Dracé, Taponas and Villefranche-sur-Saône;

- Saône-et-Loire department: Beaumont-sur-Grosne, Chalon-sur-Saône, Champforgeuil, La Chapelle-de-Bragny, La Charmée, Chatenoy-le-Royal, Chaudenay, Cluny, Cormatin, Demigny, Donzy-le-Pertuis, Farges-lès-Chalon, Flagy, Granges, Lalheue, La Loyère, Massilly, Messey-sur-Grosne, Saint-Ambreuil, Saint-Germain-lès-Buxy, Saint-Gervais-sur-Couches, Saint-Rémy, Saisy, Sancé, Taizé and Varennes-lès-Macon;

- Yonne department: Aigremont, Annay-sur-Serein, Arcy-sur-Cure, Avallon, Bazarnes, Bessy-sur-Cure, Censy, Champlay, Champs-sur-Yonne, Chamvres, Chatel-Gérard, Chevannes, Coulangeron, Cruzy-le-Chatel, Escamps, Gy-l'Evêque, Héry, Island, Jouancy, Lichères-près-Aigremont, Lucy-sur-Cure, Melisey, Merry-Sec, Molay, Montigny-la-Resle, Moulins-en-Tonnerois, Nitry, Noyers, Ouanne, Paroy-sur-Tholon, Pasilly, Pierre-Perthuis, Pontigny, Roffey, Rouvray, Sacy, Sainte-Pallaye, Sainte-Vertu, Sarry, Senan, Tissey, Vallan, Venouse, Vezannes, Villeneuve-Saint-Salves, Villiers-sur-Tholon, Vincelles and Yrouerre.

V. – Grape varieties

1° – Grape varieties

The wines come from the following varieties:

- main varieties: gamay N and pinot noir N;

- accessory varieties: chardonnay B, pinot blanc B, pinot gris G.

2° – Proportion rules on the holding

Compliance of the planting is assessed, for the colour concerned, over all the parcels of the holding producing the wine of the appellation.

- The proportion of the pinot noir N variety is greater than 30 % of the planting.

- The proportion of the gamay N variety is greater than 15 % of the planting.

- The accessory varieties are authorised only as mixed plantings within the vines. Their total proportion is limited to 15 % within each parcel.

VI. – Management of the vineyard

1° – Training methods

a) – Planting density

- The vines have a minimum planting density of 5,000 plants per hectare, with a spacing between rows that may not exceed 2.20 metres.

- In the delimited vineyard of the controlled designation of origin "Bourgogne" followed by the geographical denominations "Hautes Côtes de Beaune" and "Hautes Côtes de Nuits", the vines have a minimum planting density of 4,000 plants per hectare, with a spacing between rows that may not exceed 3 metres.

- Where the planting density is greater than 8,000 plants per hectare, the vines may not have a spacing between plants within the same row of less than 0.50 metre.

- Where the planting density is less than or equal to 8,000 plants per hectare, the vines may not have a spacing between plants within the same row of less than 0.80 metre.

Vines planted "en foule" (randomly, without rows) have a minimum planting density of 9,000 plants per hectare and a spacing between plants within the same row greater than 0.50 metre.

b) – Pruning rules

The vines are pruned according to the following techniques:

- either short pruning (vines trained as Royat cordon, bilateral cordon, gobelet and fan), with a number of free eyes per square metre less than or equal to 10;

- or single or double Guyot long pruning, with a number of free eyes per square metre less than or equal to 8.

Vines in the delimited vineyard of the controlled designation of origin "Bourgogne" followed by the geographical denominations "Hautes Côtes de Beaune" and "Hautes Côtes de Nuits" (so-called "wide" vines) are pruned:

- either short pruning (vines trained as Royat cordon or bilateral cordon);

- or single or double Guyot long pruning.

The number of free eyes per square metre is less than or equal to 6. Overlapping of canes on the same wire is prohibited.

Whatever the pruning method, the vines may be pruned with additional free eyes provided that, at the phenological stage corresponding to 11 or 12 leaves, the number of fruit-bearing shoots of the year per square metre is less than or equal to the number of free eyes defined in the pruning rules.

c) – Trellising and foliage height rules

SPACING BETWEEN ROWS, LOCATION OF THE VINES	**TRELLISING AND FOLIAGE HEIGHT RULES**
Vines with a spacing between rows of less than 2.50 metres	The height of trellised foliage must be at least equal to 0.6 times the spacing between rows, the height of trellised foliage being measured between the lower limit of the foliage, set at least 0.30 metre above the ground, and the upper trimming limit.
Vines with a spacing of 2.50 metres or more, in the delimited vineyard of the controlled designation of origin "Bourgogne" followed by the geographical denominations "Hautes Côtes de Beaune" and "Hautes Côtes de Nuits" (so-called "wide" vines)	The height of trellised foliage must be at least equal to 1.50 metres, the height of trellised foliage being measured between the lower limit of the foliage, set at least 0.30 metre above the ground, and the upper trimming limit.

- When the vines are not trained in gobelet, they must be raised on a stake or trellised; the trellising must be maintained.

- When the vines are planted "en foule", they are trained on stakes.

d) – Average maximum load per parcel

The average maximum load per parcel is set at 10,000 kilograms per hectare.

e) – Threshold of missing vines

The percentage of dead or missing vine plants referred to in Article D. 644-22 of the Rural Code is set at 20 %.

f) – Cultivation condition of the vine

The parcels must be managed so as to ensure a good overall cultivation condition of the vine, reflected in particular by:

- control of a good sanitary condition, making it possible to obtain healthy foliage and healthy berries;

- upkeep of the soil, namely control of grass cover by a grass height of less than half the trellising height (height between the ground and the upper trellising wire), and control of erosion through the absence of visible roots.

2° – Other cultivation practices

a) – In order to preserve the characteristics of the soils, which constitute a fundamental element of the terroir:

- Permanent grass cover of the headlands is compulsory.

- Any substantial modification of the morphology, the subsoil, the arable layer or the structuring elements of the landscape of a parcel intended for the production of the controlled designation of origin is prohibited, with the exception of classic deep-ploughing works.

b) – Vine plantings and replacements may only be made with healthy plant material that has undergone hot-water treatment.

3° – Irrigation

Irrigation is prohibited.

VII. – Harvest, transport and ripeness of the grapes

1° – Harvest

a) – The wines come from grapes harvested at good ripeness.

b) – Particular harvesting provisions

No particular provision.

c) – Particular provisions for transport of the harvest

The harvest is protected from rain during its transport and on its reception.

2° – Ripeness of the grapes

a) – Sugar content of the grapes

Grapes with a sugar content of less than the following may not be considered to be at good ripeness:

- 171 grams per litre of must for red wines;

- 161 grams per litre of must for rosé wines.

b) – Minimum natural alcoholic strength by volume

The wines have a minimum natural alcoholic strength by volume of 10 %.

VIII. – Yields – Entry into production

1° – Yield

The yield referred to in Article D. 644-25 of the Rural Code is set at 64 hectolitres per hectare.

2° – Limit yield

The limit yield referred to in Article D. 644-25 of the Rural Code is set at 69 hectolitres per hectare.

3° – Entry into production of young vines

The benefit of the controlled designation of origin may only be granted to wines coming from:

- parcels of young vines only from the 2nd year following that in the course of which planting was carried out in place before 31 July;

- parcels of young vines only from the 1st year following that in the course of which grafting in place was carried out before 31 July;

- parcels of vines that have been top-grafted, at the earliest in the 1st year following that in the course of which the top-grafting was carried out before 31 July, and once the parcels no longer contain any varieties other than those permitted for the appellation. By derogation, in the year following that in the course of which the top-grafting was carried out before 31 July, the varieties permitted for the appellation may represent only 80 % of the planting of each parcel concerned.

IX. – Processing, elaboration, ageing, packaging, storage

1° – General provisions

The wines are vinified in accordance with local, fair and constant usages.

a) – Reception and pressing

Rosé wines are vinified by vatting of crushed or uncrushed grapes, without pressing the harvest before fermentation.

b) – Blending of varieties

The wines come from a blend in which the gamay N and pinot noir N varieties must be present.

- The proportion of the pinot noir N variety is greater than 30 %.

- The proportion of the gamay N variety is greater than 15 %.

- Red and rosé wines produced from parcels with mixed plantings are vinified by blending the grapes.

c) – Malolactic fermentation

At the packaging stage, red wines have a maximum malic acid content of 0.4 gram per litre.

d) – Analytical standards

Finished wines ready to be released for consumption within the meaning of Article D. 644-36-I of the Rural Code have a maximum fermentable sugar content (glucose + fructose) of:

- 3 grams per litre for rosé wines;

- 2 grams per litre for red wines.

e) – Oenological practices and physical treatments

- Subtractive enrichment techniques (TSE) are authorised for red wines within the limit of a maximum concentration rate of 10 %. The equipment used is fitted with a meter allowing the volume of water removed to be declared.

- For the production of rosé wines, the use of oenological charcoal, alone or mixed in preparations, is prohibited.

- The use of pieces of wood is prohibited.

- After enrichment, the wines do not exceed a total alcoholic strength by volume of 12.5 %.

f) – Prohibited equipment

Continuous presses are prohibited.

g) – Overall vat capacity

Every operator must have an overall vat capacity (vinification and storage) equivalent to at least:

- for rosé wines, the volume of wine vinified for the previous year's harvest, as entered either on the harvest declaration, pro rata to the change in the holding's area in production, or on the production declaration;

- for red wines, 150 % of the volume of wine vinified for the previous year's harvest, as entered either on the harvest declaration, pro rata to the change in the holding's area in production, or on the production declaration.

h) – Good overall state of upkeep of the cellar (floor and walls) and of the equipment (hygiene)

The cellar and the equipment are well maintained; this is reflected in particular by:

- general hygiene of the elaboration premises, with general cleanliness, well-maintained floors, adequate drainage and a surface avoiding stagnation;

- harmlessness of the equipment and products coming into contact with the wine;

- separation and specificity of the premises: premises without the same functions must be separated, such as storage areas for plant-protection products, cleaning products or hydrocarbons, from the premises for vinification, ageing and storage of dry goods (corks, cartons);

- management of wine effluents: effluents must be removed as quickly as possible from foodstuff premises and deposited in well-maintained containers that are easy to clean and can be closed. Waste storage areas must be kept clean; waste must be disposed of hygienically and in an environmentally friendly manner; a waste storage and removal area must be provided;

- absence of hazardous or odorous substances in the vinification, ageing and storage premises (odour).

i) – Other provisions

The temperature of the containers during the ageing phase must be controlled and less than or equal to 25 °C.

2° – Provisions by type of product

No particular provision.

3° – Provisions relating to packaging

For every packaged lot, the operator keeps available for the approved control body:

- the information appearing in the register of handling operations referred to in Article D. 644-36 of the Rural Code;

- the reports of analyses carried out before packaging allowing analytical monitoring of the packaged lots. These reports are kept for a period of six months from the date of packaging.

4° – Provisions relating to storage

The operator provides evidence of a protected storage place for packaged products, in particular products packaged in unlabelled bottles, meeting the following conditions:

- temperature: between 5 °C and 22 °C.

5° – Provisions relating to the circulation of products and placing on the market for the consumer

a) – Date of placing on the market for the consumer

The wines are placed on the market for the consumer in accordance with the provisions of Article D. 644-35 of the Rural Code.

b) – Period during which the wines may not circulate between authorised warehousekeepers

No particular provision.

X. – Link with the geographical area

(No text in this version.)

XI. – Transitional measures

1° – Training methods

a) – Vine parcels in place on the date of approval of the present specification, situated in the Yonne department, with a planting density of less than 5,000 plants per hectare continue to benefit, for their harvest, from the right to the controlled designation of origin until they are grubbed up.

b) – Vine parcels in place before 1980, situated outside the delimited vineyard of the controlled designation of origin "Bourgogne" followed by the geographical denominations "Hautes Côtes de Beaune" and "Hautes Côtes de Nuits", which do not comply with the provisions relating to planting density set out in the present specification and are trained on a "single-plane" trellis, continue to benefit, for their harvest, from the right to the controlled designation of origin until they are grubbed up, provided that they:

- have a planting density greater than 3,000 plants per hectare;

- are pruned with a maximum of 6 free eyes per square metre;

- have a trellised foliage height at least equal to 1.50 metres, the height of trellised foliage being measured between the lower limit of the foliage, set at least 0.30 metre above the ground, and the upper trimming limit.

The volume that may be claimed under the controlled designation of origin is calculated on the basis of the yield authorised for the controlled designation of origin multiplied by a coefficient of 0.80.

c) – Vine parcels in place before 1980, situated in the delimited vineyard of the controlled designation of origin "Bourgogne" followed by the geographical denominations "Hautes Côtes de Beaune" and "Hautes Côtes de Nuits", which do not comply with the provisions relating to planting density set out in the present specification and are trained on a "single-plane" trellis, continue to benefit, for their harvest, from the right to the controlled designation of origin until they are grubbed up, provided that they:

- have a planting density greater than 3,000 plants per hectare;

- are pruned with a maximum of 6 free eyes per square metre;

- have a trellised foliage height at least equal to 1.50 metres, the height of trellised foliage being measured between the lower limit of the foliage, set at least 0.30 metre above the ground, and the upper trimming limit.

d) – Vine parcels in place before the date of approval of the present specification, trained according to the so-called "lyre" system, continue to benefit, for their harvest, from the right to the controlled designation of origin until they are grubbed up, provided that they:

- have a minimum planting density of 3,000 plants per hectare, with a spacing between rows of less than 3.5 metres and a spacing between plants within the same row of between 0.8 metre and 1 metre;

- are pruned in double Guyot or double Royat cordon. Overlapping of canes or cordons is prohibited. Each plant bears a maximum of 26 free eyes and the maximum number of free eyes per square metre is 8;

- have a trellised foliage height at least equal to 1.2 metres, measured between the lower trellising wire and the upper trimming limit. The trellising consists of two planes that diverge towards the top. The distance between the trellising planes is at least 0.5 metre at the base and between 1.0 metre and 1.4 metres at the top.

2° – Grape varieties, proportion rules on the holding and blending of varieties

Up to and including the 2012 harvest, the proportion of the gamay N variety in the planting of the holding and in the blend of the wines may be less than 15 %.

XII. – Rules of presentation and labelling

1° – General provisions

Wines for which, under the terms of the present specification, the controlled designation of origin "Bourgogne Passe-tout-grains" is claimed and which are presented under the said appellation may not be declared after the harvest, offered to the public, dispatched, put up for sale or sold unless, in the harvest declaration, in advertisements, on leaflets, labels, invoices and any containers whatsoever, the aforesaid controlled designation of origin is entered, accompanied by the words "Appellation d'origine contrôlée", the whole in very conspicuous characters.

2° – Particular provisions

The name "Bourgogne" and the words "Passe-tout-grains" are written in identical characters of the same form, size and colour on labels, marks, stamps, corks, capsules, seals or any other closure device, invoices, commercial papers, packaging and containers.

CHAPTER II

I. – Declaration obligations

1. Claim declaration

The claim declaration must be sent to the defence and management body at least fifteen days before circulation between authorised warehousekeepers and at the latest on 1 December of the year of harvest.

It indicates in particular:

- the designation claimed;

- the volume of the wine;

- the EVV or SIRET number;

- the name and address of the applicant;

- the place of storage of the wine.

It is accompanied in particular by a copy of the harvest declaration and, as the case may be, a copy of the production declaration or an extract of the stock accounts for buyers of grapes and musts.

2. Declaration prior to transaction and collections

Every operator wishing to sell in bulk a wine benefiting from the controlled designation of origin must make a transaction declaration for the lot concerned to the approved control body within time limits set in the control or inspection plan of between six and fifteen working days before any collection.

This declaration, accompanied where applicable by a copy of the purchase contract, specifies in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the identification of the lot;

- the volume of the lot;

- the identification of the containers;

- the identity of the buyer.

If collections are made for volumes smaller than those set out in the transaction declaration, the operator must inform the control body in writing.

3. Declaration of release for consumption

Each lot of wine intended to be released for consumption within the meaning of Article D. 644-36-I of the Rural Code must be the subject of a declaration of release for consumption to the approved control body within minimum time limits set in the control or inspection plan of between six and fifteen working days before release for consumption.

This declaration may also be drawn up for lots already packaged, within minimum time limits set in the control or inspection plan of between six and fifteen working days before the lots concerned are dispatched from the operator's cellars.

It specifies in particular:

- the identity of the operator;

- the EVV or SIRET number;

- the identification of the lot;

- the volume of the lot;

- the lot number for wines already packaged;

- the identification of the containers for non-packaged wines.

4. Declaration relating to the dispatch outside the national territory of a non-packaged wine

Every operator wishing to dispatch outside the national territory a non-packaged wine benefiting from the controlled designation of origin must declare it to the approved control body within time limits set in the control or inspection plan of between six and fifteen working days before any dispatch.

5. Fallback declaration

Every operator marketing a wine benefiting from the controlled designation of origin under a more general appellation must declare it to the defence and management body and to the approved control body:

- at the same time as the declaration prior to transaction, if the wine is the subject of a bulk transaction after the fallback;

- at the same time as the packaging declaration, if the wine is packaged after the fallback;

- within time limits set in the control or inspection plan of between six and fifteen working days following the recording of the fallback in the wine register, if the wine is the subject of a fallback after packaging.

The defence and management body and the approved control body inform, respectively and without delay, the defence and management body of the more general appellation concerned and the approved control body for the more general appellation concerned.

6. Downgrading declaration

Every operator carrying out a downgrading of wines benefiting from the controlled designation of origin sends the defence and management body and the approved control body a quarterly summary.

7. Declaration of equipment for TSE

Every operator holding a concentration apparatus must declare it upon purchase to the defence and management body, specifying its specifications. The defence and management body keeps an up-to-date list of operators holding such equipment and sends it each year to the National Institute of Origin and Quality at the latest on 1 September.

Every operator using a service provider declares it to the defence and management body, which draws up the list of these operators and sends it each year to the National Institute of Origin and Quality at the latest on 1 September.

8. Reworking of parcels

Before any development or any works liable to modify the morphology, the subsoil, the arable layer (including any addition of exogenous soil) or the structuring elements of the landscape of a parcel intended for the production of the controlled designation of origin, with the exception of classic deep-ploughing works, a declaration must be sent by the operator to the defence and management body at least 4 weeks before the planned start date of the works. The defence and management body transmits, without delay, a copy of this declaration to the services of the National Institute of Origin and Quality.

9. Derogatory system

Operators carrying out at least five transactions per week and/or at least forty-two preparations for release for consumption within the meaning of Article D. 644-36-I of the Rural Code per year may group their transaction, release-for-consumption and fallback declarations. In this case, they must provide the approved control body with their forecast of transactions, releases for consumption and fallbacks, then send the quarterly summary of all the declarations referred to in points 2, 3 and 5 above.

II. – Keeping of registers

1. General plan of the storage and vinification places

Every vinifying operator must keep up to date and available for the approved control body a general plan of the storage and vinification places, allowing in particular the number, designation and capacity of the containers to be identified.

2. TSE register

Every operator carrying out partial concentration of musts must keep an up-to-date TSE register including in particular:

- the initial volume;

- the volume of water evaporated;

- the identification of the lot after concentration (volume and potential alcoholic strength).

CHAPTER III

I. – Main points to be checked and evaluation methods

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
A – STRUCTURAL RULES	
A1 – Location of operators within the immediate proximity area	Documentary check
A2 – Belonging of the planted parcels to the delimited area	Documentary check (up-to-date CVI parcel record); visit in the field
A3 – Production potential (grape varieties and proportion rules, monitoring of derogatory measures, planting density, plant material)	Documentary check and field visits (details in the inspection plan)
A4 – Processing, ageing, packaging and storage facilities	
Vat capacity	Documentary check: general plan of the storage places; on-site visit
Ageing (temperature control and length of ageing)	Documentary check: temperature records and packaging declaration; on-site visit
State of upkeep of the cellar and equipment (hygiene)	On-site visit
Protected storage place and storage conditions (T °C)	Documentary check: temperature records; on-site visit
B – RULES LINKED TO THE PRODUCTION CYCLE	
B1 – Management of the vineyard	
Pruning	Visit in the field
Average maximum load per parcel	Visit in the field
Cultivation and sanitary condition of the vine (sanitary condition of foliage and berries, upkeep of the soil, upkeep of the trellising)	Visit in the field
B2 – Harvest, transport and ripeness of the grapes	
Ripeness of the grapes	Documentary check: must analysis report; visit in the field
B3 – Processing, elaboration, ageing, packaging, storage	
Oenological practices or treatments (enrichment, prohibited practices…)	Documentary check: declaration of equipment and TSE register, enrichment, acidification and de-acidification register; on-site visit
Stock accounts, analytical traceability	Documentary check: keeping of registers by operators, analysis reports
B4 – Harvest declaration and claim declaration	
Missing vines	Documentary check (declaration obligations); visit in the field
Authorised yield	Documentary check (check of declarations, monitoring of authorisations granted by the INAO services after their investigation of the operator's individual request)

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
VSI, volumes harvested in excess of the authorised yield	Documentary check: monitoring of destruction certificates
Claim declaration	Documentary check and on-site visit: compliance with procedures and time limits, consistency with the harvest and production declarations; check of the release of products into circulation
C – CHECKS ON THE PRODUCTS	
Packaged wines	Analytical and organoleptic examination before or after packaging
Non-packaged wines	Analytical and organoleptic examination at transaction
Non-packaged wines intended for dispatch outside the national territory	Analytical and organoleptic examination of all lots
D – PRESENTATION OF THE PRODUCTS	
Labelling	On-site visit

II. – References concerning the control structure

Institut National de l'Origine et de la Qualité (INAO)

51, rue d'Anjou, 75008 PARIS

Tel.: (33) (0)1.53.89.80.00 – Fax: (33) (0)1.42.25.57.97 – Email: info@inao.gouv.fr

The INAO is the control authority ensuring compliance with the provisions of the present specification for products benefiting from the controlled designation of origin.

ANNEX

SESSIONS OF THE COMPETENT NATIONAL COMMITTEE AT WHICH THE DELIMITED PARCEL AREAS WERE APPROVED
