SPECIFICATION OF THE CONTROLLED DESIGNATIONS OF ORIGIN "SAUMUR"

approved by the order of 19 July 2016, JORF of 29 July 2016

CHAPTER I

I. – Name of the designation

Only wines meeting the specific provisions set out below may claim the controlled designation of origin "Saumur", initially recognised by the decrees of 14 November 1936 (still white and red wines), of 31 December 1957 (sparkling wines) and of 9 May 1964 (still rosé wines).

II. – Geographical denominations and complementary terms

1° – The name of the controlled designation of origin may be supplemented by the geographical denomination "Val de Loire" according to the rules fixed in the present specification for the use of this geographical denomination.

2° – The name of the controlled designation of origin "Saumur" may be followed by the complementary geographical denomination "Puy-Notre-Dame" for wines meeting the production conditions fixed for this complementary geographical denomination in the present specification.

3° – The name of the controlled designation of origin may be supplemented by the term "primeur" or "nouveau" for still rosé wines meeting the particular conditions fixed for this term in the present specification.

III. – Colours and types of product

1° – The controlled designation of origin "Saumur" is reserved for still white, rosé and red wines and for white and rosé sparkling wines.

2° – The complementary geographical denomination "Puy-Notre-Dame" is reserved for still red wines.

3° – The term "primeur" or "nouveau" is reserved for still rosé wines.

IV. – Areas and zones in which the various operations are carried out

1° – Geographical area

a) – The following are carried out within the territory of the communes below: - the harvesting of the grapes, the vinification, the elaboration and the ageing of the still wines liable to benefit from the controlled designation of origin "Saumur"; - the harvesting of the grapes, the vinification, the elaboration and the ageing of the wines liable to benefit from the complementary geographical denomination "Puy-Notre-Dame"; - the harvesting of the grapes, the vinification, the elaboration, the ageing and the packaging of the white and rosé sparkling wines liable to benefit from the controlled designation of origin "Saumur".

All the steps of the production take place in the geographical areas whose perimeter encompasses the territory of the following communes, on the basis of the official geographic code of 2018:

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	**COMMUNES**
AOC "Saumur" (still white and rosé wines)	**Deux-Sèvres department:** Saint-Martin-de-Mâcon, Tourtenay **Maine-et-Loire department:** Artannes-sur-Thouet, Brézé, Brossay, Chacé, Cizay-la-Madeleine, Le Coudray-Macouard, Courchamps, Distré, Doué-en-Anjou (former territories of the delegated communes of Doué-la-Fontaine, Forges, Meigné and Les Verchers-sur-Layon), Épieds, Fontevraud-l'Abbaye, Montreuil-Bellay, Montsoreau, Parnay, Le Puy-

	Notre-Dame, Rou-Marson, Saint-Cyr-en-Bourg, Saint-Just-sur-Dive, Saumur, Souzay-Champigny, Turquant, Les Ulmes, Varrains, Vaudelnay **Vienne department:** Berrie, Curçay-sur-Dive, Glénouze, Pouançay, Ranton, Saint-Léger-de-Montbrillais, Saix, Ternay, Les Trois-Moutiers
AOC "Saumur" (still red wines)	**Deux-Sèvres department:** Saint-Martin-de-Mâcon, Tourtenay **Maine-et-Loire department:** Artannes-sur-Thouet, Brézé, Brossay, Cizay-la-Madeleine, Le Coudray-Macouard, Courchamps, Distré, Doué-en-Anjou (former territories of the delegated communes of Doué-la-Fontaine, Forges, Meigné and Les Verchers-sur-Layon), Épieds, Fontevraud-l'Abbaye, Montreuil-Bellay, Le Puy-Notre-Dame, Rou-Marson, Saint-Just-sur-Dive, Saumur, Les Ulmes, Vaudelnay **Vienne department:** Berrie, Curçay-sur-Dive, Glénouze, Pouançay, Ranton, Saint-Léger-de-Montbrillais, Saix, Ternay, Les Trois-Moutiers
Complementary geographical denomination "Puy-Notre-Dame"	**Maine-et-Loire department:** Brossay, Doué-en-Anjou (former territories of the delegated communes of Meigné and Les Verchers-sur-Layon), Épieds, Le Puy-Notre-Dame, Les Ulmes, Vaudelnay **Vienne department:** Berrie, Pouançay, Saint-Léger-de-Montbrillais, Saix
AOC "Saumur" (white and rosé sparkling wines)	**Deux-Sèvres department:** Argenton-l'Église, Bouillé-Loretz, Brion-près-Thouet, Mauzé-Thouarsais, Sainte-Verge, Saint-Martin-de-Mâcon, Saint-Martin-de-Sanzay, Tourtenay, Val en Vignes (former territories of the delegated communes of Bouillé-Saint-Paul and Cersay) **Maine-et-Loire department:** Antoigné, Artannes-sur-Thouet, Aubigné-sur-Layon, Brézé, Brissac Loire Aubance (former territory of the delegated commune of Chemellier), Brossay, Cernusson, Chacé, Cizay-la-Madeleine, Cléré-sur-Layon, Le Coudray-Macouard, Courchamps, Dénezé-sous-Doué, Distré, Doué-en-Anjou (former territories of the delegated communes of Brigné, Concourson-sur-Layon, Doué-la-Fontaine, Forges, Meigné, Montfort, Saint-Georges-sur-Layon and Les Verchers-sur-Layon), Épieds, Fontevraud-l'Abbaye, Gennes-Val-de-Loire (former territories of the delegated communes of Chênehutte-Trèves-Cunault, Gennes, Grézillé, Saint-Georges-des-Sept-Voies and Le Thoureil), Lys-Haut-Layon (former territories of the delegated communes of Les Cerqueux-sous-Passavant, La Fosse-de-Tigné, Nueil-sur-Layon, Tancoigné, Tigné, Trémont and Vihiers), Montilliers, Montreuil-Bellay, Montsoreau, Parnay, Passavant-sur-Layon, Le Puy-Notre-Dame, Rou-Marson, Saint-Cyr-en-Bourg, Saint-Just-sur-Dive, Saint-Macaire-du-Bois, Saumur, Souzay-Champigny, Terranjou (former territory of the delegated commune of Martigné-Briand), Tuffalun (former territory of the delegated commune of Ambillou-Château), Turquant, Les Ulmes, Varrains, Vaudelnay **Vienne department:** Berrie, Curçay-sur-Dive, Glénouze, Pouançay, Ranton, Saint-Léger-de-Montbrillais, Saix, Ternay, Les Trois-Moutiers

The cartographic documents representing the geographical areas may be consulted on the website of the National Institute of Origin and Quality.

2° – Delimited parcel area

a) – The wines liable to benefit from the controlled designation of origin "Saumur" come exclusively from vines situated within the delimited parcel production area as approved by the National Institute of Origin and Quality at the sessions of the competent national committee of 4 and 5 November 1992, 3 and 4 November 1994, 4 and 5 September 1996, 11 December 2001, 13 and 14 February 2002 and at the sessions of the standing committee of the competent national committee of 5 September 2007 and 19 January 2017. The National Institute of Origin and Quality lodges with the town halls of the communes referred to in 1° the graphic documents establishing the parcel boundaries of the production area thus approved.

b) – For the complementary geographical denomination "Puy-Notre-Dame", the wines come from grapes arising from parcels that have been the subject of an identification procedure. The identification of the vine parcels is carried out on the basis of criteria relating to their place of establishment, fixed by the competent

national committee of the National Institute of Origin and Quality at its session of 29 May 2008, after the opinion of the committee of experts appointed for this purpose. Any producer wishing to have a parcel identified makes the request thereof to the services of the National Institute of Origin and Quality before 31 January of the year of harvest. The list of the newly identified parcels is approved each year by the competent national committee of the National Institute of Origin and Quality after the opinion of the aforementioned committee of experts. The lists of the criteria and of the identified parcels may be consulted at the services of the National Institute of Origin and Quality and of the defence and management body concerned.

3° – Immediate proximity area

The immediate proximity area, defined by derogation for the vinification, the elaboration and the ageing of the still rosé wines, for the vinification, the elaboration and the ageing of the still white and red wines whether or not liable to benefit from the complementary geographical denomination "Puy-Notre-Dame", and for the vinification, the elaboration, the ageing and the packaging of the sparkling wines, is made up of the territory of the following communes, on the basis of the official geographic code of 2018:

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	**COMMUNES**
AOC "Saumur" (still white and rosé wines)	**Deux-Sèvres department:** Argenton-l'Église, Bouillé-Loretz, Brion-près-Thouet, Louzy, Mauzé-Thouarsais, Oiron, Saint-Cyr-la-Lande, Sainte-Radegonde, Sainte-Verge, Saint-Martin-de-Sanzay, Thouars, Val en Vignes (former territories of the delegated communes of Bouillé-Saint-Paul and Cersay) **Indre-et-Loire department:** Saint-Nicolas-de-Bourgueil **Loire-Atlantique department:** Ancenis, Le Loroux-Bottereau, Le Pallet, La Remaudière, Vair-sur-Loire (former territory of the delegated commune of Anetz), Vallet **Maine-et-Loire department:** Allonnes, Angers, Antoigné, Aubigné-sur-Layon, Beaulieu-sur-Layon, Bellevigne-en-Layon (former territories of the delegated communes of Champ-sur-Layon, Faveraye-Mâchelles, Faye-d'Anjou, Rablay-sur-Layon and Thouarcé), Blaison-Saint-Sulpice (former territories of the delegated communes of Blaison-Gohier and Saint-Sulpice), Bouchemaine, Brain-sur-Allonnes, Brissac Loire Aubance (former territories of the delegated communes of Les Alleuds, Brissac-Quincé, Charcé-Saint-Ellier-sur-Aubance, Chemellier, Coutures, Luigné, Saint-Rémy-la-Varenne, Saint-Saturnin-sur-Loire, Saulgé-l'Hôpital and Vauchrétien), Cernusson, Chalonnes-sur-Loire, Chemillé-en-Anjou (former territories of the delegated communes of Chanzeaux, La Jumellière and Valanjou), Champtocé-sur-Loire, Chaudefonds-sur-Layon, Cléré-sur-Layon, Denée, Dénezé-sous-Doué, Doué-en-Anjou (former territories of the delegated communes of Brigné, Concourson-sur-Layon, Montfort and Saint-Georges-sur-Layon), Les Garennes-sur-Loire (former territories of the delegated communes of Juigné-sur-Loire and Saint-Jean-des-Mauvrets), Gennes-Val-de-Loire (former territories of the delegated communes of Chênehutte-Trèves-Cunault, Gennes, Grézillé, Saint-Georges-des-Sept-Voies and Le Thoureil), Huillé, Ingrandes-Le Fresne sur Loire (former territory of the delegated commune of Ingrandes), Jarzé Villages (former territory of the delegated commune of Lué-en-Baugeois), Louresse-Rochemenier, Lys-Haut-Layon (former territories of the delegated communes of Les Cerqueux-sous-Passavant, La Fosse-de-Tigné, Nueil-sur-Layon, Tancoigné, Tigné, Trémont and Vihiers), Mauges-sur-Loire (former territories of the delegated communes of La Chapelle-Saint-Florent, Le Marillais, Le Mesnil-en-Vallée, Montjean-sur-Loire, La Pommeraye, Saint-Florent-le-Vieil, Saint-Laurent-de-la-Plaine and Saint-Laurent-du-Mottay), Mazé-Milon (former territory of the delegated commune of Fontaine-Milon), Montilliers, Mozé-sur-Louet, Mûrs-Erigné, Orée d'Anjou (former territories of the delegated communes of Bouzillé, Champtoceaux, Drain, Landemont, Liré, Saint-Laurent-des-Autels, La Varenne),

	Passavant-sur-Layon, La Possonnière, Rochefort-sur-Loire, Sainte-Gemmes-sur-Loire, Saint-Georges-sur-Loire, Saint-Germain-des-Prés, Saint-Macaire-du-Bois, Saint-Martin-du-Fouilloux, Saint-Melaine-sur-Aubance, Saint-Sigismond, Savennières, Soucelles, Soulaines-sur-Aubance, Terranjou (former territories of the delegated communes of Chavagnes, Martigné-Briand and Notre-Dame-d'Allençon), Tuffalun (former territories of the delegated communes of Ambillou-Château, Louerre and Noyant-la-Plaine), Val-du-Layon (former territories of the delegated communes of Saint-Aubin-de-Luigné and Saint-Lambert-du-Lattay), Varennes-sur-Loire, Verrie, Verrières-en-Anjou (former territories of the delegated communes of Pellouailles-les-Vignes and Saint-Sylvain-d'Anjou), Villevêque
AOC "Saumur" (still red wines)	**Deux-Sèvres department:** Argenton-l'Église, Bouillé-Loretz, Brion-près-Thouet, Louzy, Mauzé-Thouarsais, Oiron, Saint-Cyr-la-Lande, Sainte-Radegonde, Sainte-Verge, Saint-Martin-de-Sanzay, Thouars, Val en Vignes (former territories of the delegated communes of Bouillé-Saint-Paul and Cersay) **Indre-et-Loire department:** Saint-Nicolas-de-Bourgueil **Loire-Atlantique department:** Ancenis, Le Loroux-Bottereau, Le Pallet, La Remaudière, Vair-sur-Loire (former territory of the delegated commune of Anetz), Vallet **Maine-et-Loire department:** Allonnes, Angers, Antoigné, Aubigné-sur-Layon, Beaulieu-sur-Layon, Bellevigne-en-Layon (former territories of the delegated communes of Champ-sur-Layon, Faveraye-Mâchelles, Faye-d'Anjou, Rablay-sur-Layon and Thouarcé), Blaison-Saint-Sulpice (former territories of the delegated communes of Blaison-Gohier and Saint-Sulpice), Bouchemaine, Brain-sur-Allonnes, Brissac Loire Aubance (former territories of the delegated communes of Les Alleuds, Brissac-Quincé, Charcé-Saint-Ellier-sur-Aubance, Chemellier, Coutures, Luigné, Saint-Rémy-la-Varenne, Saint-Saturnin-sur-Loire, Saulgé-l'Hôpital and Vauchrétien), Cernusson, Chacé, Chalonnes-sur-Loire, Champtocé-sur-Loire, Chaudefonds-sur-Layon, Chemillé-en-Anjou (former territories of the delegated communes of Chanzeaux, La Jumellière and Valanjou), Cléré-sur-Layon, Denée, Dénezé-sous-Doué, Doué-en-Anjou (former territories of the delegated communes of Brigné, Concourson-sur-Layon, Montfort, Saint-Georges-sur-Layon), Les Garennes sur Loire (former territories of the delegated communes of Juigné-sur-Loire and Saint-Jean-des-Mauvrets), Gennes-Val-de-Loire (former territories of the delegated communes of Chênehutte-Trèves-Cunault, Gennes, Grézillé, Saint-Georges-des-Sept-Voies and Le Thoureil), Huillé, Ingrandes-Le-Fresne sur Loire (former territory of the delegated commune of Ingrandes), Jarzé Villages (former territory of the delegated commune of Lué-en-Baugeois), Louresse-Rochemenier, Lys-Haut-Layon (former territories of the delegated communes of Les Cerqueux-sous-Passavant, La Fosse-de-Tigné, Nueil-sur-Layon, Tancoigné, Tigné, Trémont and Vihiers), Mauges-sur-Loire (former territories of the delegated communes of La Chapelle-Saint-Florent, Le Marillais, Le Mesnil-en-Vallée, Montjean-sur-Loire, La Pommeraye, Saint-Florent-le-Vieil, Saint-Laurent-de-la-Plaine and Saint-Laurent-du-Mottay), Mazé-Milon (former territory of the delegated commune of Fontaine-Milon), Montilliers, Montsoreau, Mozé-sur-Louet, Mûrs-Erigné, Orée d'Anjou (former territories of the delegated communes of Bouzillé, Champtoceaux, Drain, Landemont, Liré, Saint-Laurent-des-Autels and La Varenne), Parnay, Passavant-sur-Layon, La Possonnière, Rochefort-sur-Loire, Saint-Cyr-en-Bourg, Sainte-Gemmes-sur-Loire, Saint-Georges-sur-Loire, Saint-Germain-des-Prés, Saint-Macaire-du-Bois, Saint-Martin-du-Fouilloux, Saint-Melaine-sur-Aubance, Saint-Sigismond, Savennières, Soucelles, Soulaines-sur-Aubance, Souzay-Champigny, Terranjou (former territories of the delegated communes of Chavagnes, Martigné-Briand and Notre-Dame-d'Allençon), Tuffalun (former territories of the delegated communes of Ambillou-Château, Louerre and Noyant-la-Plaine), Turquant, Val-du-Layon (former territories of the delegated communes of Saint-Aubin-de-Luigné and Saint-Lambert-du-Lattay), Varennes-sur-Loire, Varrains, Verrie, Verrières-en-Anjou (former territories of the delegated communes of Pellouailles-les-Vignes and Saint-Sylvain-d'Anjou), Villevêque
Complementary geographical denomination "Puy-Notre-Dame"	**Deux-Sèvres department:** Argenton-l'Église, Bouillé-Loretz, Brion-près-Thouet, Louzy, Mauzé-Thouarsais, Oiron, Saint-Cyr-la-Lande, Sainte-Radegonde, Sainte-Verge, Saint-Martin-de-Mâcon, Saint-Martin-de-Sanzay, Thouars, Tourtenay, Val en Vignes (former territories of the delegated communes of Bouillé-Saint-Paul and Cersay)

	Indre-et-Loire department: Saint-Nicolas-de-Bourgueil **Loire-Atlantique department:** Ancenis, Le Loroux-Bottereau, Le Pallet, La Remaudière, Vair-sur-Loire (former territory of the delegated commune of Anetz), Vallet **Maine-et-Loire department:** Allonnes, Angers, Antoigné, Artannes-sur-Thouet, Aubigné-sur-Layon, Beaulieu-sur-Layon, Bellevigne-en-Layon (former territories of the delegated communes of Champ-sur-Layon, Faveraye-Mâchelles, Faye-d'Anjou, Rablay-sur-Layon and Thouarcé), Blaison-Saint-Sulpice (former territories of the delegated communes of Blaison-Gohier and Saint-Sulpice), Bouchemaine, Brain-sur-Allonnes, Brissac Loire Aubance (former territories of the delegated communes of Les Alleuds, Brissac-Quincé, Charcé-Saint-Ellier-sur-Aubance, Chemellier, Coutures, Luigné, Saint-Rémy-la-Varenne, Saint-Saturnin-sur-Loire, Saulgé-l'Hôpital and Vauchrétien), Cernusson, Chacé, Chalonnes-sur-Loire, Champtocé-sur-Loire, Chaudefonds-sur-Layon, Chemillé-en-Anjou (former territories of the delegated communes of Chanzeaux, La Jumellière and Valanjou), Cléré-sur-Layon, Le Coudray-Macouard, Courchamps, Denée, Dénezé-sous-Doué, Doué-en-Anjou (former territories of the delegated communes of Brigné, Concourson-sur-Layon, Forges, Montfort and Saint-Georges-sur-Layon), Fontevraud-l'Abbaye, Les Garennes-sur-Loire (former territories of the delegated communes of Juigné-sur-Loire and Saint-Jean-des-Mauvrets), Gennes-Val-de-Loire (former territories of the delegated communes of Chênehutte-Trèves-Cunault, Gennes, Grézillé, Saint-Georges-des-Sept-Voies and Le Thoureil), Huillé, Ingrandes-Le-Fresne sur Loire (former territory of the delegated commune of Ingrandes), Jarzé Villages (former territory of the delegated commune of Lué-en-Baugeois), Louresse-Rochemenier, Lys-Haut-Layon (former territories of the delegated communes of Les Cerqueux-sous-Passavant, La Fosse-de-Tigné, Nueil-sur-Layon, Tancoigné, Tigné, Trémont and Vihiers), Mauges-sur-Loire (former territories of the delegated communes of La Chapelle-Saint-Florent, Le Marillais, Le Mesnil-en-Vallée, Montjean-sur-Loire, La Pommeraye, Saint-Florent-le-Vieil, Saint-Laurent-de-la-Plaine and Saint-Laurent-du-Mottay), Mazé-Milon (former territory of the delegated commune of Fontaine-Milon), Montilliers, Montsoreau, Mozé-sur-Louet, Mûrs-Erigné, Orée d'Anjou (former territories of the delegated communes of Bouzillé, Champtoceaux, Drain, Landemont, Liré, Saint-Laurent-des-Autels and La Varenne), Parnay, Passavant-sur-Layon, La Possonnière, Rochefort-sur-Loire, Rou-Marson, Saint-Cyr-en-Bourg, Sainte-Gemmes-sur-Loire, Saint-Georges-sur-Loire, Saint-Germain-des-Prés, Saint-Just-sur-Dive, Saint-Macaire-du-Bois, Saint-Martin-du-Fouilloux, Saint-Melaine-sur-Aubance, Saint-Sigismond, Saumur, Savennières, Soucelles, Soulaines-sur-Aubance, Souzay-Champigny, Terranjou (former territories of the delegated communes of Chavagnes, Martigné-Briand and Notre-Dame-d'Allençon), Tuffalun (former territories of the delegated communes of Ambillou-Château, Louerre and Noyant-la-Plaine), Turquant, Val-du-Layon (former territories of the delegated communes of Saint-Aubin-de-Luigné and Saint-Lambert-du-Lattay), Varennes-sur-Loire, Varrains, Verrie, Verrières-en-Anjou (former territories of the delegated communes of Pellouailles-les-Vignes and Saint-Sylvain-d'Anjou), Villevêque **Vienne department:** Curçay-sur-Dive, Glénouze, Ranton, Ternay
AOC "Saumur" (white and rosé sparkling wines)	**Deux-Sèvres department:** Louzy, Oiron, Saint-Cyr-la-Lande, Sainte-Radegonde, Thouars **Indre-et-Loire department:** Saint-Nicolas-de-Bourgueil **Loire-Atlantique department:** Ancenis, Le Loroux-Bottereau, Le Pallet, La Remaudière, Vair-sur-Loire (former territory of the delegated commune of Anetz), Vallet **Maine-et-Loire department:** Allonnes, Angers, Beaulieu-sur-Layon, Bellevigne-en-Layon (former territories of the delegated communes of Champ-sur-Layon, Faveraye-Mâchelles, Faye-d'Anjou, Rablay-sur-Layon and Thouarcé), Blaison-Saint-Sulpice (former territories of the delegated communes of Blaison-Gohier and Saint-Sulpice), Bouchemaine, Brain-sur-Allonnes, Brissac Loire Aubance (former territories of the delegated communes of Les Alleuds, Brissac-Quincé, Charcé-Saint-Ellier-sur-Aubance, Coutures, Luigné, Saint-Rémy-la-Varenne, Saint-Saturnin-sur-Loire, Saulgé-l'Hôpital and Vauchrétien), Chalonnes-sur-Loire, Champtocé-sur-Loire, Chemillé-en-Anjou (former territories of the delegated communes of Chanzeaux, La Jumellière and Valanjou), Chaudefonds-sur-Layon, Denée, Les Garennes-sur-Loire (former territories of the delegated communes of Juigné-sur-Loire and Saint-Jean-des-Mauvrets), Huillé, Ingrandes-Le-Fresne sur Loire (former territory of the delegated commune of Ingrandes), Jarzé

	Villages (former territory of the delegated commune of Lué-en-Baugeois), Louresse-Rochemenier, Mauges-sur-Loire (former territories of the delegated communes of La Chapelle-Saint-Florent, Le Marillais, Le Mesnil-en-Vallée, Montjean-sur-Loire, La Pommeraye, Saint-Florent-le-Vieil, Saint-Laurent-de-la-Plaine and Saint-Laurent-du-Mottay), Mazé-Milon (former territory of the delegated commune of Fontaine-Milon), Mozé-sur-Louet, Mûrs-Erigné, Orée d'Anjou (former territories of the delegated communes of Bouzillé, Champtoceaux, Drain, Landemont, Liré, Saint-Laurent-des-Autels and La Varenne), La Possonnière, Rochefort-sur-Loire, Sainte-Gemmes-sur-Loire, Saint-Georges-sur-Loire, Saint-Germain-des-Prés, Saint-Martin-du-Fouilloux, Saint-Melaine-sur-Aubance, Saint-Sigismond, Savennières, Soucelles, Soulaines-sur-Aubance, Terranjou (former territories of the delegated communes of Chavagnes and Notre-Dame-d'Allençon), Tuffalun (former territories of the delegated communes of Louerre and Noyant-la-Plaine), Val-du-Layon (former territories of the delegated communes of Saint-Aubin-de-Luigné and Saint-Lambert-du-Lattay), Varennes-sur-Loire, Verrières-en-Anjou (former territories of the delegated communes of Pellouailles-les-Vignes and Saint-Sylvain-d'Anjou), Villevêque

V. – Grape varieties

1° – Grape varieties

The wines come from the following varieties:

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	GRAPE VARIETIES
AOC "Saumur" (still white wines)	Chenin B (or pineau de la Loire)
AOC "Saumur" (still red wines)	Main variety: cabernet franc N; Accessory varieties: cabernet-sauvignon N, pineau d'Aunis N
AOC "Saumur" (still rosé wines)	Cabernet franc N and cabernet-sauvignon N
AOC "Saumur" (white and rosé sparkling wines)	Chenin B (or pineau de la Loire), chardonnay B, sauvignon B, cabernet franc N, cabernet-sauvignon N, gamay N, grolleau gris G, grolleau N, pineau d'Aunis N, pinot noir N
Complementary geographical denomination "Puy-Notre-Dame"	Main variety: cabernet franc N; Accessory variety: cabernet-sauvignon N

2° – Proportion rules on the holding

The conformity of the grape varieties is assessed, for the colour considered, over all of the parcels of the holding producing the wine of the controlled designation of origin.

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	PROPORTION RULES ON THE HOLDING
AOC "Saumur" (still red wines)	The proportion of the accessory varieties is less than or equal to 30 % of the grape varieties
Complementary geographical denomination "Puy-Notre-Dame"	The proportion of the accessory variety is less than or equal to 15 % of the grape varieties

VI. – Management of the vineyard

1° – Training methods

a) – Planting density.

GENERAL PROVISIONS

The vines present a minimum planting density of 4,000 plants per hectare. They may not present a spacing between rows greater than 2.50 metres and a spacing between plants within the same row less than 1

metre. The vines presenting a planting density lower than 4,000 plants per hectare but greater than or equal to 3,300 plants per hectare benefit, for their harvest, from the right to the controlled designation of origin, subject to compliance with the provisions relating to the trellising and foliage-height rules fixed in the present specification. These vines may not present a spacing between rows greater than 3 metres and a spacing between plants within the same row less than 1 metre.

COMPLEMENTARY GEOGRAPHICAL DENOMINATION "PUY-NOTRE-DAME"

The vines present a minimum planting density of 4,500 plants per hectare. They may not present a spacing between rows greater than 2.20 metres and a spacing between plants within the same row less than 1 metre.

b) – Pruning rules.

The vines are pruned, by mixed pruning, at the latest on 30 April:

VARIETIES, CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	**PRUNING RULES**
Cabernet franc N and cabernet-sauvignon N varieties	
AOC "Saumur" (still red and rosé wines, white and rosé sparkling wines)	Either with a maximum of 12 free eyes per plant and a maximum of 8 free eyes on the long cane; or with a maximum of 14 free eyes per plant and a maximum of 5 free eyes on the long cane
Complementary geographical denomination "Puy-Notre-Dame"	With a maximum of 9 free eyes per plant and a maximum of 7 free eyes on the long cane
Chenin B (or pineau de la Loire) variety	
AOC "Saumur" (still white wines)	Either with a maximum of 10 free eyes per plant and a maximum of 7 free eyes on the long cane; or with a maximum of 12 free eyes per plant and a maximum of 4 free eyes on the long cane
AOC "Saumur" (white and rosé sparkling wines)	Either with a maximum of 12 free eyes per plant and a maximum of 7 free eyes on the long cane; or with a maximum of 14 free eyes per plant and a maximum of 5 free eyes on the long cane
Gamay N and pinot noir N varieties	
AOC "Saumur" (white and rosé sparkling wines)	Either with a maximum of 10 free eyes per plant and a maximum of 6 free eyes on the long cane; or with a maximum of 12 free eyes per plant and a maximum of 4 free eyes on the long cane
Grolleau N and grolleau gris G varieties	
AOC "Saumur" (white and rosé sparkling wines)	Either with a maximum of 10 free eyes per plant and a maximum of 5 free eyes on the long cane; or with a maximum of 12 free eyes per plant and a maximum of 4 free eyes on the long cane
Pineau d'Aunis N variety	
AOC "Saumur" (still red wines and white and rosé sparkling wines)	Either with a maximum of 10 free eyes per plant and a maximum of 6 free eyes on the long cane; or with a maximum of 12 free eyes per plant and a maximum of 4 free eyes on the long cane
Chardonnay B and sauvignon B varieties	

AOC "Saumur" (white and rosé sparkling wines)	Either with a maximum of 12 free eyes per plant and a maximum of 8 free eyes on the long cane; or with a maximum of 14 free eyes per plant and a maximum of 5 free eyes on the long cane

c) – Trellising rules and foliage height.

GENERAL PROVISIONS

The height of the trellised foliage is at least equal to 0.6 times the spacing between rows, the height of trellised foliage being measured between the lower limit of the foliage, established at least 0.40 metre above the ground, and the upper topping limit, established at least 0.20 metre above the upper trellising wire.

PARTICULAR PROVISIONS

The vine parcels whose planting density is lower than 4,000 plants per hectare but greater than or equal to 3,300 plants per hectare moreover meet the following trellising rules: - the minimum height of the trellising posts above ground is 1.90 metre; - obligation of 4 levels of trellising wires; - the minimum height of the last level of wire is 1.85 metre above the ground.

d) – Average maximum load per parcel.
The average maximum load per parcel is fixed at:

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	**AVERAGE MAXIMUM LOAD PER PARCEL (kilograms per hectare)**
AOC "Saumur" (still red, rosé and still white wines)	10,000
AOC "Saumur" (white and rosé sparkling wines)	12,000
Complementary geographical denomination "Puy-Notre-Dame"	8,500

e) – Threshold for missing vines.
The percentage of dead or missing vine plants, referred to in Article D. 645-4 of the Rural and Maritime Fishing Code, is fixed at 20 %.

f) – Cultivation condition of the vine.
The parcels are managed so as to ensure a good overall cultivation condition of the vine, in particular its sanitary condition and the upkeep of its soil.

2° – Other cultivation practices

GENERAL PROVISIONS

a) – In order to preserve the characteristics of the physical and biological environment that constitutes a fundamental element of the terroir, a plant cover of the headlands is compulsory.

b) – A controlled plant cover, spontaneous or sown, is compulsory on the inter-row; in the absence of this plant cover, the operator carries out a soil tillage so as to ensure the control of the spontaneous vegetation or demonstrates the use of biocontrol products approved by the public authorities in viticulture. In the event of the use of biocontrol herbicides on a parcel, the use of other herbicides is prohibited.

COMPLEMENTARY GEOGRAPHICAL DENOMINATION "PUY-NOTRE-DAME"

a) – The disbudding (dédoublement) of the vine is compulsory; the operation is carried out at the latest on 15 July of the year of harvest.

b) – In order to preserve the characteristics of the physical and biological environment that constitutes a fundamental element of the terroir, a controlled plant cover, spontaneous or sown, is compulsory on the inter-row; in the absence of this plant cover, the operator carries out a soil tillage so as to ensure the control of the spontaneous vegetation.

3° – Irrigation

Irrigation is prohibited.

VII. – Harvest, transport and ripeness of the grapes

1° – Harvest

The wines come from grapes harvested at proper ripeness. The date of the start of the harvest is fixed according to the provisions of Article D. 645-6 of the Rural and Maritime Fishing Code.

2° – Ripeness of the grapes

a) – Sugar richness of the grapes and natural alcoholic strength by volume.
The sugar richness of the grapes and the natural alcoholic strengths by volume meet the following characteristics:

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	MINIMUM SUGAR RICHNESS OF THE GRAPES (grams per litre of must)	MINIMUM NATURAL ALCOHOLIC STRENGTH BY VOLUME
AOC “Saumur” (still white wines)	170	10.5 %
AOC “Saumur” (still red wines)	180	10.5 %
AOC “Saumur” (still rosé wines)	161	10 %
AOC “Saumur” (base wines intended for the elaboration of white and rosé sparkling wines)	153	9.5 %
Complementary geographical denomination “Puy-Notre-Dame”	216	12 %

b) – Minimum acquired alcoholic strength by volume.
The still rosé wines present a minimum acquired alcoholic strength by volume of 10 %.

c) – Maximum acquired alcoholic strength by volume.
The base wines intended for the elaboration of the sparkling wines liable to benefit from the controlled designation of origin and obtained in the absence of enrichment present a maximum acquired alcoholic strength by volume of 12 %.

VIII. – Yields. – Entry into production

1° – Yield and limit yield

The yield and the limit yield, referred to in Article D. 645-7 of the Rural and Maritime Fishing Code, are fixed at:

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	YIELD (hectolitres per hectare)	LIMIT YIELD (hectolitres per hectare)
AOC “Saumur” (still white wines)	60	65
AOC “Saumur” (still red wines)	57	69
AOC “Saumur” (still rosé wines)	57	69
AOC “Saumur” (white and rosé sparkling wines)	67	76
Complementary geographical denomination “Puy-Notre-Dame”	50	56

2° – Entry into production of young vines

GENERAL PROVISIONS

The benefit of the controlled designation of origin may be granted to wines coming from parcels of young vines only from the 2nd year following that in the course of which planting was carried out in place before 31 July.

COMPLEMENTARY GEOGRAPHICAL DENOMINATION "PUY-NOTRE-DAME"

The benefit of the complementary geographical denomination "Puy-Notre-Dame" may be granted to wines coming from parcels of young vines only from the 3rd year following that in the course of which planting was carried out in place before 31 July.

IX. – Processing, elaboration, ageing, packaging, storage

1° – General provisions

The wines are vinified in accordance with local, fair and constant usages.

a) – Blending of the varieties.

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	BLENDING RULES
AOC "Saumur" (still red wines)	The proportion of the accessory varieties is less than or equal to 30 % in the blend
AOC "Saumur" (white and rosé sparkling wines)	The proportion of the chenin B variety, in the cuvée of the white wines intended for the taking of foam, is greater than or equal to 60 %. The proportion of the cabernet franc N variety, in the cuvée of the rosé wines intended for the taking of foam, is greater than or equal to 60 %. The proportion of the sauvignon B variety, in the cuvée intended for the taking of foam, is less than or equal to 10 %. By cuvée is meant all of the volumes of wines intended directly for bottling for the taking of foam. It is made up of a base wine or of a blend of base wines
Complementary geographical denomination "Puy-Notre-Dame"	The proportion of the accessory variety is less than or equal to 15 % in the blend

b) – Malolactic fermentation.

The malolactic fermentation is compulsorily completed for the red wines. The wines ready to be placed on the market in bulk or at the packaging stage present a malic acid content less than or equal to 0.4 gram per litre.

c) – Analytical standards.

The wines present, after fermentation, the following contents of fermentable sugars (glucose + fructose):

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	CONTENT OF FERMENTABLE SUGARS (glucose + fructose) (grams per litre)
AOC "Saumur" (still white and rosé wines)	Less than or equal to 3. Less than or equal to 6, if the total acidity content expressed in grams of tartaric acid per litre is not lower by more than 2 grams per litre than the content of fermentable sugars
AOC "Saumur" (still red wines)	Less than or equal to 3
Complementary geographical denomination "Puy-Notre-Dame"	Less than or equal to 3
AOC "Saumur" (base wines intended for the elaboration of white and rosé sparkling wines that have been the subject of an enrichment)	Less than or equal to 5
AOC "Saumur" (base wines intended for the elaboration of white and rosé sparkling wines that have not been the subject of any enrichment)	Less than or equal to 24

Every lot of non-packaged wine liable to benefit from the term “primeur” or “nouveau” presents a volatile acidity less than or equal to 10.2 milliequivalents per litre.

d) – Oenological practices and physical treatments.
For the elaboration of the rosé wines, the use of charcoals for oenological use, alone or in a mixture in preparations, is prohibited. For the red wines liable to benefit from the controlled designation of origin “Saumur”, the subtractive enrichment techniques are authorised and the maximum rate of partial concentration in relation to the volumes used is fixed at 10 %. For the wines liable to benefit from the complementary geographical denomination “Puy-Notre-Dame”, any enrichment operation is prohibited. The use of wood chips is subject to the following provisions:

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	PROVISIONS RELATING TO THE USE OF WOOD CHIPS
AOC “Saumur” (still white and still rosé wines); AOC “Saumur” (white and rosé sparkling wines); Complementary geographical denomination “Puy-Notre-Dame”	The use of wood chips is prohibited
AOC “Saumur” (still red wines)	The use of wood chips is prohibited except during vinification

The wines do not exceed, after enrichment, the following total alcoholic strength by volume:

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE	TOTAL ALCOHOLIC STRENGTH BY VOLUME
AOC “Saumur” (still white, rosé and red wines)	12.5 %
AOC “Saumur” (base wines intended for the elaboration of white and rosé sparkling wines)	11.6 %
AOC “Saumur” (white and rosé sparkling wines, in the event of enrichment of the must)	13 % (after the taking of foam and before the addition of the expedition liqueur)

e) – Vat capacity.
Every operator has a vinification vat capacity at least equal to 1.4 times the average volume vinified on the holding over the last five years.

f) – Upkeep of the cellar and equipment.
The cellar (floors and walls) and the vinification equipment present a good general condition of upkeep.

2° – Provisions by type of product

a) – The base wines intended for the elaboration of the rosé sparkling wines may arise from a maceration or from a bleeding (saignée).

b) – The sparkling wines are exclusively elaborated by a second fermentation in bottles. The addition of the tirage liqueur and of the expedition liqueur may not lead to increasing the volume of wine by a percentage greater than 2.5 % of the initial volume used. The excess volumes are destroyed by dispatch to industrial uses before 15 December of the year following that of the disgorging of the corresponding lots. The elaboration of the sparkling wines gives rise to the dispatch to industrial uses of the by-products arising from the disgorging at a rate of 0.5 % of the volume of wine in bottles to be disgorged. The dispatch to industrial uses is carried out before 15 December of the year following that of the disgorging of the corresponding lots. The duration of conservation in bottles on lees may not be less than 9 months.

c) – The white and red wines liable to benefit from the controlled designation of origin “Saumur” are the subject of an ageing at least until 15 January of the year following that of the harvest.

d) – The wines liable to benefit from the complementary geographical denomination “Puy-Notre-Dame” are the subject of an ageing at least until 1 June of the year following that of the harvest.

3° – Provisions relating to packaging

a) – For each packaged lot, the operator keeps available for the approved control body: - the information appearing in the register of handling operations referred to in Article D. 645-18 of the Rural and Maritime Fishing Code; - for the still wines, an analysis carried out at packaging; - for the sparkling wines, an analysis carried out at the tirage for the taking of foam. The analysis reports are kept for a period of 6 months from the date of packaging or from the date of tirage.

b) – The sparkling wines are elaborated and marketed in the bottles inside which the taking of foam was carried out, with the exception of the wines sold in bottles of a volume less than or equal to 37.5 centilitres or greater than 150 centilitres.

4° – Provisions relating to storage

The operator demonstrates a specific place for the storage of the packaged products.

5° – Provisions relating to the movement of products and to placing on the market for the consumer

a) – Date of placing on the market for the consumer.
The wines are placed on the market for the consumer:

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	**DATE**
AOC “Saumur” (still white and red wines)	At the end of the ageing period, from 15 January of the year following that of the harvest
AOC “Saumur” (white and rosé sparkling wines)	At the end of the minimum ageing period of 9 months from the date of tirage
Complementary geographical denomination “Puy-Notre-Dame”	At the end of the ageing period, from 1 June of the year following that of the harvest
AOC “Saumur” (still rosé wines), whether or not supplemented by the term “primeur” or “nouveau”	According to the provisions of Article D. 645-17 of the Rural and Maritime Fishing Code

b) – Period during which the wines may not move between approved warehouse keepers.
The wines may move between approved warehouse keepers:

CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE, COMPLEMENTARY GEOGRAPHICAL DENOMINATION	**DATE**
AOC “Saumur” (still white and red wines)	From 1 December of the year following that of the harvest
AOC “Saumur” (white and rosé sparkling wines)	At the end of the minimum ageing period of 9 months from the date of tirage
Complementary geographical denomination “Puy-Notre-Dame”	From 1 December of the year following that of the harvest
AOC “Saumur” (still rosé wines)	From 15 November of the year of harvest
AOC “Saumur” (still rosé wines) supplemented by the term “primeur” or “nouveau”	From the 38th day preceding the 3rd Thursday of the month of November of the year of harvest

X. – Link with the geographical area

1° – Information on the geographical area

a) – Description of the natural factors contributing to the link

The geographical area is situated at the extreme south-west of the Paris Basin, where the Mesozoic and Cenozoic substratum comes to cover the Precambrian and Palaeozoic bedrock attached to the Armorican Massif. This geological particularity differentiates the geographical area, marked by the presence of the tuffeau chalk (Saumur) and locally christened "Anjou blanc", from the region situated to the west (Angers), marked by the presence of the schists, in particular slate-bearing ones, and locally christened "Anjou noir". The geographical area is bordered to the north by the Loire, and is crossed, from south to north, by the valley of the Thouet and of its tributary the Dive. This hydrographic network has chiselled the landscape into a succession of hillsides of various exposures whose altitude varies from 40 metres to 110 metres. 4 geographical sectors appear: - to the north, the Turonian cuesta and the formations that surmount it; - to the west, the sector resting on the Jurassic plateau (sector of Brossay) and the Cenomanian clayey formations that cover it in its northern part; - to the south-west, the sector resting on the Cretaceous, widely eroded and presenting outlier knolls (Puy-Notre-Dame, Argentay, Tourtenay…); - to the east, the sector of the hillsides of the Dive (Vienne department), where the vine, on the flanks of the hillsides, dominates the cereal plain. The landscape is shaped by the cultivation of the vine, which has colonised the favourable exposures while preserving, at the summit of the knolls, forest formations where oak and chestnut dominate. At the heart of the vine parcels rises a ventilation chimney for the immense cavities that served to extract the stones for building the houses, were exploited as mushroom farms and are now used as ageing and conservation cellars for the wines. This landscape is marked by the harmony between the vineyard and the architectural built heritage, the osmosis between the winegrowing villages, the "clos" adjoining bourgeois properties with façades adorned with sculptures, impressive in their whiteness and characteristic of "l'Anjou Blanc", which have contributed to the creation of a regional natural park and to the listing of this region as a UNESCO World Heritage Site. Reflecting the usages, the soils of the parcels precisely delimited for the harvesting of the grapes are developed on the various Turonian formations: rendzinas and brown calcareous soils more or less thick, locally covered at the summit of the slopes by sands and clays arising from more recent formations such as the Senonian or the Eocene. They present a good thermal behaviour, a moderate water reserve, and are free of any sign of hydromorphy. The climate of the Saumur region is oceanic. The Mauges massifs, situated to the west of the geographical area, nuance this oceanic characteristic by a foehn effect. The annual rainfall oscillates between 550 millimetres and 600 millimetres and characterises an area sheltered from the humid winds, whereas it exceeds 800 millimetres on the hills of the Mauges. This rainfall difference is even more marked during the vegetative cycle of the vine, in particular from the month of June until the harvest period. Situated to the south of the geographical area, the "Seuil du Poitou" brings some southern nuances that are reflected in the presence of a vegetation that may be surprising on these banks of the Loire (holm oaks, olive trees, almond trees…). The average annual temperatures are relatively high (about 12 °C). The Loire and its tributaries also hold a preponderant place by playing a role of thermal regulator.

b) – Description of the human factors contributing to the link

Geologically close to the Touraine, the Saumur region is attached to Anjou by its historical and human traits. The region of Saumur belongs to the Gaulish tribe of the Andecavi, established in Anjou as far as Candes-Saint-Martin, a veritable Gallo-Roman frontier town between the zone of influence of the Andecavi and Turones (of Touraine) tribes. Thereafter, the history of the vineyard is linked, until the middle of the Middle Ages, to that of the Angevin vineyard belonging to the counts of Anjou. Viticulture developed especially during the 16th century with the arrival of the Dutch brokers who, appreciating the aptitude of these wines for transport by sea, in particular made the qualities of the chenin B variety recognised beyond the borders of the region. From this era, the different qualities of these wines are explained by their capacity for ageing. Thus, the wines "for the sea" are the wines for keeping, contrary to the wines intended for the Parisian market. The vineyard is established on the "Coteaux de Saumur", to the south of the town, and overlooks the Loire. The notoriety and the demand are such that the vineyard extends importantly towards the south-west, in particular in the cantons of Montreuil-Bellay and of Doué-la-Fontaine. The development for navigation of the Thouet and of the Dive is decisive. The cabernet franc N variety (locally called "Breton") makes its appearance and with it the first red and rosé wines of "Saumur". Its progression is slow but constant, thanks in particular to Antoine Cristal, an avant-garde winegrower of the 19th century, who never ceased to promote the virtues of this Bordelais plant, thus contributing strongly to its development. Doctor Maisonneuve recalls that at the end of the 18th century, 8,000 pieces of first-quality "Saumur" wines are exported by sea and 30,000 pieces of second quality leave for the regions of Orléans and Paris. The production of sparkling wines rests on the historical production

of still white wines. As early as the 15th century, the producers observe that the wine bottled during the winter, and after a second fermentation linked to the return of the first heat, sparkles while retaining its aromatic finesse. First "pétillants", the mastery of the second fermentation in bottle, either from the fermentable sugars of the partially fermented must, or by the addition of a tirage liqueur, favours, at the beginning of the 19th century, thanks to Jean Ackerman, the development of the production of sparkling wines, which benefits from the existence of important cellars dug into the tuffeau chalk and at the heart of which the wines can be conserved and aged at a low and constant temperature and in ideal hygrometric conditions. In 1827, the vineyard of "Saumur" represents 10,500 hectares. The producers group together from the beginning of the 20th century into unions, with the aim of protecting their production, of favouring technique and of promoting the wines of "Saumur". In 1910 was born the "Union syndicale de viticulteurs Saumurois", then in 1911 the "Syndicat des Vignerons des coteaux de Saumur", which then gathers together more than 400 members. These unions work in particular towards the recognition, in 1936, of the wines as controlled designation of origin "Saumur". During the 20th century, the production of red wines undergoes an important development, rising from 3,000 hectolitres to 50,000 hectolitres. According to the situations, these wines may be supple and light, or more structured.

2° – Information on the quality and characteristics of the products

Still wines

The white wines are dry, of a robe often light yellow with greenish reflections; they evoke delicacy. Their perfumes of fruits and of white flowers are often flattering. Their palate offers a pleasant sensation of freshness. The rosé wines present a robe of pale pink hue. The aromas are subtle and very often evoke red fruits. The palate, fresh, exhales the fruitiness at length. These are light and harmonious wines. The red wines frequently present a ruby robe sometimes enhanced with a few garnet reflections. The nose, fresh and intense, may give off fruity aromas (strawberry, raspberry, cherry…) wrapped in spicy, animal or slightly smoky notes. On the palate, the wines very often give off pronounced fruity notes and the tannins are generally silky and supple. Agreeable in their youth, they can age a few years to gain in complexity. The wines benefiting from the complementary geographical denomination "Puy-Notre-Dame" are red wines, arising predominantly from the cabernet franc N variety, which present a robe generally well sustained and offer a greater aromatic complexity. The fruity notes evoke very ripe red fruits, even black fruits. On the palate these keeping wines are very structured.

Sparkling wines

The sparkling wines are white or rosé. The fine and abundant bubbles form long strings. The aromas very frequently and subtly evoke fruits, white flowers and pastry. The same elegance reigns on the palate, where one finds again a very pleasant sensation of freshness.

3° – Causal interactions

Still wines

Under the climate of the Saumur region, the geo-pedological formations of the middle and upper Turonian, of the Jurassic, of the Senonian and of the Eocene, have permitted the establishment of the chenin B and cabernet franc N varieties, essential varieties of the white, rosé and red wines of the region of Saumur. Situated at more than 40 metres of altitude, these formations allow a moderate water supply and vigour of the vine, so many elements ensuring a perfect ripeness of the grapes that permits the obtaining of red and white wines with varied fruity aromas. The grape varieties, essentially chenin B and cabernet franc N, associated with these favourable conditions of the physical environment, have favoured the development of particular production usages. The production of these wines is given priority on shallow soils warming up more quickly, thus ensuring an excellent phenolic ripeness of the grapes to obtain aromatic wines. The producers have developed, over the generations, a know-how reflected in particular in the control of the yields, an adapted pruning and a harvest at optimal ripeness. A particular attention is paid to the vinification and to the ageing of the wines, which take place gently in conditions of constant light, air humidity and temperature, such as it is possible to observe them in the underground cellars dug into the tuffeau chalk, and permitting all the organoleptic qualities of the white and red wines to be revealed, in particular by preserving their aromatic complexity and by favouring, for the red wines, a supple and silky tannic expression. The history and the evolution of the grape varieties of the different sectors of the Saumur region have permitted the definition of distinct geographical units according to the type and the

colour of the wines, thus recognising particular red-wine production zones. It is moreover within this whole that the complementary geographical denomination "Puy-Notre-Dame" was recognised in 2007, with a particular parcel delimitation and rigorous production rules (shorter pruning and compulsory disbudding). These parcels are all situated on hillsides and present clayey-calcareous soils, thus ensuring, in the grapes, an optimal concentration in anthocyanins and aroma precursors that confers on the wines arising from them a sustained robe and permits the development of aromas of ripe fruits, even black fruits. The natural sugar richness of the grapes intended for the vinification of the said complementary geographical denomination renders any enrichment operation unnecessary. A period of ageing, at least until 1 June of the year following that of the harvest, and translated in the specification, is nevertheless necessary to round off the tannins of these wines known as "tuffe" wines. The producers perpetuate the vineyard of "Saumur" in the greatest tradition, thus echoing the words of Antoine Cristal, a winegrower of the Saumur region at the beginning of the 19th century: "I want to show that the Saumur vineyard is capable of producing a wine that competes with the greatest crus. A soil like this must give a natural wine that ranks among the best." The parcels intended for the production of the rosé wines are situated on clayey-calcareous soils or clays with flint that warm up slowly because they are deeper than those intended for the production of the still red wines and thus engender a lesser accumulation of sugars in the grape, which contributes to the freshness and to the lightness of the wine.

Sparkling wines

The production of sparkling wines falls within the same context. The producers were able to make the observation that wines packaged and conserved in cellar could be the subject, at the end of the winter, of a new fermentation. The empirical mastery of this "second spontaneous fermentation" first led to the production of "pétillant" wines, in particular with the chenin B variety. This variety, late, established in the environmental conditions of the Saumur region, develops proven aptitudes for the production of fresh sparkling wines with fine bubbles and aromas of fruits, flowers and pastry. These aptitudes were exploited from the beginning of the 19th century, in particular under the impulse of Jean-Baptiste Ackerman, with the mastery of the elaboration by "second fermentation in bottle" for the production of sparkling wines. A particular attention is paid to the harvest so as to ensure an optimal ripeness and a good sugar/acidity balance necessary both to a guaranteed freshness, to a good taking of foam and to a good keeping potential. Furthermore, the presence of underground cellars, in particular at the heart of "l'Anjou blanc", constitutes a favourable factor for the elaboration of these wines, which requires vast places of storage and handling in ideal conditions of light, air humidity and temperature. This rigour and this technical route were applied to the black varieties, for a more confidential production of rosé sparkling wines. Strong with the experience acquired for more than a century, the elaborators of sparkling wines possess a perfectly mastered know-how in the composition of their cuvées. The ageing on lees of a minimum duration of 9 months contributes to developing the complexity of the wines. In 2009, the production of sparkling wines benefiting from the controlled designation of origin "Saumur" is 100,000 hectolitres.

XI. – Transitional measures

1° – Delimited parcel area

On a transitional basis, and subject to meeting the other provisions of the present specification, the production arising from the parcels excluded from the delimited parcel area "Saumur", identified by their cadastral references, their area and their grape varieties, continues to benefit from the right to the controlled designation of origin until the grubbing up of the said parcels and at the latest until the 2017 harvest inclusive, for the communes whose list was approved by the competent national committee of the National Institute of Origin and Quality at its session of 4 and 5 November 1992.

2° – Grape varieties and blending rules

On a transitional basis and until the 2016 harvest inclusive, the still white wines may arise from the chardonnay B and sauvignon B varieties. The proportion of these varieties, in the blend of the wines, is less than or equal to 20 %.

3° – Training methods

a) – Planting density.

The vine parcels planted before 22 November 1999, presenting a planting density lower than 3,300 plants

per hectare, continue to benefit, for their harvest, from the right to the controlled designation of origin until they are grubbed up and at the latest until the 2024 harvest inclusive, subject to meeting the other provisions of the present specification, including all the trellising and foliage-height rules. The vine parcels planted before 22 November 1999, not meeting the provision relating to the spacing between plants within the same row, continue to benefit, for their harvest, from the right to the controlled designation of origin until they are grubbed up and at the latest until the 2024 harvest inclusive, subject to meeting the other provisions of the present specification.

b) – Pruning rules.

VARIETIES, CONTROLLED DESIGNATION OF ORIGIN, COLOUR OF THE WINES, TYPE OF WINE	**PRUNING RULES**
Chardonnay B and sauvignon B varieties — AOC “Saumur” (still white wines)	On a transitional basis and until the 2016 harvest inclusive, the vines may be pruned according to the following rules: - either with a maximum of 12 free eyes per plant and a maximum of 8 free eyes on the long cane; - or with a maximum of 14 free eyes per plant and a maximum of 5 free eyes on the long cane.
Chenin B (or pineau de la Loire) variety — AOC “Saumur” (white and rosé sparkling wines)	The vines aged more than 25 years at the date of 31 July 2009 may be pruned, until they are grubbed up, with a maximum of 10 free eyes per plant of which 8 free eyes on the long cane.

The vines of the chenin B (or pineau de la Loire) variety aged more than 25 years at the date of 31 July 2009 and intended for the production of sparkling wines may be pruned, until they are grubbed up, with a maximum of 10 free eyes per plant of which 8 free eyes on the long cane.

4° – Other cultivation practices

The provisions relating to the obligation of a controlled plant cover, spontaneous or sown, on the inter-row or, in the absence of this plant cover, the obligation for the operator to carry out a soil tillage or to use biocontrol products so as to ensure the control of the spontaneous vegetation, do not apply to the vine parcels in place at the date of approval of the present specification and whose spacing between rows is less than or equal to 1.70 metre.

XII. – Rules of presentation and labelling

1° – General provisions

Wines for which, under the terms of the present specification, the controlled designation of origin “Saumur”, whether or not followed by the complementary geographical denomination “Puy-Notre-Dame”, is claimed and which are presented under the said appellation may not be declared after the harvest, offered to the public, dispatched, put up for sale or sold unless, in the harvest declaration, in advertisements, on leaflets, labels, invoices and any containers whatsoever, the aforesaid controlled designation of origin is entered.

2° – Particular provisions

a) – The optional terms whose use, by virtue of the Community provisions, may be regulated by the Member States, are entered in characters whose dimensions in height, width and thickness are not greater than double those of the characters composing the name of the controlled designation of origin.

b) – The dimensions of the characters of the geographical denomination “Val de Loire” are not greater, both in height and in width, than two-thirds of those of the characters composing the name of the controlled designation of origin.

c) – In the harvest and stock declarations, invoices, accounting documents, excise documents and all other documents accompanying the wine or the harvest, the entry “Wine intended for the elaboration of Saumur sparkling wine” or “Fresh grapes for Saumur sparkling wine” is compulsory.

d) – The wines benefiting from the complementary geographical denomination "Puy-Notre-Dame" are compulsorily presented with the indication of the vintage. The indication of a vintage is reserved for wine arising 100 % from the harvest of the year mentioned.

e) – The wines benefiting from the term "primeur" or "nouveau" are compulsorily presented with the indication of the vintage.

f) – The labelling of the wines benefiting from the controlled designation of origin may specify the name of a smaller geographical unit, subject to: - it being a registered cadastral lieu-dit; - it appearing on the harvest declaration. The name of the registered cadastral lieu-dit is printed in characters whose dimensions are not greater, both in height and in width, than half those of the characters composing the name of the controlled designation of origin.

CHAPTER II

I. – Declaration obligations

1° – Prior declaration of parcel allocation and visual identification of the parcels (for the complementary geographical denomination "Puy-Notre-Dame")

Every operator declares to the defence and management body the list of the parcels allocated to the production of the complementary geographical denomination "Puy-Notre-Dame" before 31 January preceding the harvest. This declaration is renewable twice by tacit renewal, except for modifications notified by the operator before 31 January preceding each harvest. The allocated parcels are the subject, in the vineyard, of a marking (signs) permitting their visualisation and identification.

2° – Claim declaration (still wines)

The claim declaration is sent to the defence and management body at least fifteen days before the marketing of the first lot of the year concerned and at the latest on 31 January of the year following that of the harvest. It indicates: - the appellation claimed; - the volume of the wine; - the EVV and SIRET numbers; - the name and address of the applicant; - the place of storage of the wine. It is accompanied by a copy of the harvest declaration or, as the case may be, a copy of the production declaration or an extract of the stock accounts for the buyers of grapes, musts or base wines.

3° – Claim declaration known as "of aptitude"

For the base wines intended for the elaboration of sparkling wines, the claim declaration known as "of aptitude" is sent to the defence and management body at the latest on 31 January of the year following that of the harvest. The defence and management body transmits this declaration to the approved control body. This declaration specifies: - the appellation claimed; - the volume of base wine; - the EVV and SIRET numbers; - the name and address of the applicant; - the place of storage of the base wine. It is accompanied by a copy of the harvest declaration, or as the case may be, a copy of the production declaration and an extract of the stock accounts for the buyers of grapes, musts or base wines.

4° – Claim declaration known as "of end of tirage"

The claim declaration is sent to the approved control body at the latest at the end of the month in the course of which the tirage operation was carried out. It indicates: - the appellation claimed; - the volume of the wine, expressed in number of bottles; - the tirage number; - the EVV and SIRET numbers; - the name and address of the applicant; - the place of storage of the wine. It is accompanied by an extract of the stock accounts for the buyers of grapes, musts or base wines and by the general plan of the places of storage.

5° – Prior declaration of sale of wines in bulk (still wines)

The prior declaration of sale of wines in bulk is made to the approved control body. It is either concomitant with the claim declaration (that is to say at the latest on 31 January of the year following that of the harvest) or carried out at least fifteen days before the marketing of the first lots of the year concerned. It specifies the following information (as at the day of the declaration): - the volumes, by controlled designation of origin, intended for sale in bulk; - the volumes, by controlled designation of origin, having already been the subject of a transaction, the identity of the buyer and the removal date provided for in the contract.

6° – Declaration relating to the dispatch outside the national territory of a non-packaged wine

Every operator wishing to carry out a dispatch outside the national territory of a non-packaged wine benefiting from the controlled designation of origin makes the declaration thereof to the approved control body at least fifteen working days before the dispatch.

7° – Fallback (repli) declaration

Every operator carrying out a fallback of a wine benefiting from the controlled designation of origin into a more general controlled designation of origin sends to the defence and management body and to the approved control body a summary table at the latest on 31 January of each year.

8° – Downgrading declaration

Every operator carrying out a downgrading of wines benefiting from the controlled designation of origin sends to the defence and management body and to the approved control body a summary table at the latest on 31 January of each year.

9° – Declaration of new plantings of vines whose planting density is lower than 4,000 plants per hectare but greater than or equal to 3,300 plants per hectare

This declaration is sent to the defence and management body at the latest on 31 July of the year of planting. It comprises the following information: - the cadastral references of the parcel(s); - the total area.

II. – Keeping of registers

The registers provided for in the present specification are kept and kept available for the officers responsible for the control and communicable at their prior request. They may be kept in any form (paper or computerised).

1° – Parcel monitoring register

This register recalls the information of the CVI record and specifies in particular, for each parcel: - the most restrictive delimited parcel area to which the parcel belongs; - the evaluation of the height of trellised foliage.

2° – Register of production objectives

This register is filled in by the operator before the end of the month of February of the year of harvest. It specifies, for the parcel(s) concerned: - the year of harvest; - the controlled designation of origin; - the cadastral references; - the area.

3° – Ripeness monitoring register

Every operator producing grapes and every operator vinifying wines of the controlled designation of origin keeps up to date a register on which are recorded by controlled designation of origin: - the year of harvest; - for at least one parcel, the results of a ripeness check carried out before harvest: sugar richness of the grapes, density, total acidity and/or berry-tasting sheet; - per container, the natural alcoholic strength by volume in potential at the filling of the container.

4° – Register of monitoring of the lots intended for a bulk transaction or a packaging

Every operator keeps up to date a register on which are recorded, by controlled designation of origin and per lot intended for a bulk transaction, a packaging or a tirage: - the date of constitution of the lot; - the volume of the lot; - the container(s); - the destination of the lot: bulk transaction (with the identity of the buyer), packaging, tirage; - the identity of the laboratory that carried out the chemical analysis of the lot; - the number of the analysis.

CHAPTER III

I. – Main points to be checked and evaluation methods

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
A – STRUCTURAL RULES	

A1 – Delimited parcel area. — Belonging of the planted parcels to the delimited parcel area.	Documentary check and check in the field.
A2 – Production potential. — Grape varieties and proportion rules, planting density and trellising, monitoring of the transitional measures.	Documentary check and/or check in the field.
A3 – Geographical area and immediate proximity area. — Belonging of the processing, ageing, packaging and storage facilities to the geographical area or to the immediate proximity area.	Documentary check and on-site check.
Facilities for monitoring the ripeness and characteristics of the harvest.	Documentary check and on-site check.
Place of vinification and ageing.	Documentary check and on-site check.
Packaging in the geographical area or the immediate proximity area (sparkling wines).	Documentary check and on-site check.
B – RULES LINKED TO THE PRODUCTION CYCLE	
B1 – Management of the vineyard. — Pruning.	Check in the field. Check of all the parcels for the complementary geographical denomination “Puy-Notre-Dame”.
Height of trellised foliage.	Documentary check and check in the field. Check of all the parcels for the complementary geographical denomination “Puy-Notre-Dame”.
Average maximum load per parcel.	Check in the field. Check of all the parcels for the complementary geographical denomination “Puy-Notre-Dame”.
Cultivation condition of the vine and other cultivation practices.	Check in the field. Check of all the parcels for the complementary geographical denomination “Puy-Notre-Dame”.
B2 – Harvest, transport and ripeness of the grapes. — Sugar richness of the grapes.	Documentary check (verification of the records kept by the operators) and check in the field (verification at the parcel at harvest).
B3 – Processing, elaboration, ageing, packaging and storage. — Oenological practices and/or physical treatments (enrichment).	Documentary check and/or on-site check.
Monitoring of the particular processing rules (sparkling wines).	Documentary check and on-site check.
B4 – Harvest declaration and claim declaration. — Threshold for missing vines.	Documentary check and check in the field.
Authorised yield.	Documentary check.
Claim declaration or harvest declaration and coherence with the register of production objectives.	Documentary check.
C – CHECKS ON THE PRODUCTS	
Sparkling wines after the taking of foam and before disgorging.	Analytical and organoleptic examination.
Still wines at the stage of the movement of the products between approved warehouse keepers or at the placing on the market for the consumer, non-packaged, being the subject of a transaction between operators.	Analytical and organoleptic examination. Analytical and organoleptic examination of all the lots for the complementary geographical denomination “Puy-Notre-Dame”.
Still wines ready to be placed on the market for the consumer (in bulk or packaged).	Analytical and organoleptic examination. Analytical and organoleptic examination of all the lots for the complementary geographical denomination “Puy-Notre-Dame”.

Still non-packaged wines intended for a dispatch outside the national territory.	Analytical and organoleptic examination of all the lots.

II. – References concerning the control structure

National Institute of Origin and Quality (INAO)
TSA 30003

Tel: (33) (0)1.73.30.38.00
Fax: (33) (0)1.73.30.38.04
Email: info@inao.gouv.fr

The check of compliance with the present specification is carried out by a third-party body offering guarantees of competence, impartiality and independence, under the authority of the INAO, on the basis of an approved inspection plan.

The inspection plan sets out the self-checks carried out by the operators on their own activity and the internal checks carried out under the responsibility of the defence and management body. It indicates the external checks carried out by the third-party body as well as the analytical and organoleptic examinations. The whole of the checks is carried out by sampling. The wines benefiting from the complementary geographical denomination “Puy-Notre-Dame” intended to be placed into circulation between approved warehouse keepers or at the stage of placing on the market for the consumer, and the still non-packaged wines intended for a dispatch outside the national territory, are the subject of a systematic analytical and organoleptic check.
