SPECIFICATION OF THE CONTROLLED DESIGNATION OF ORIGIN "BANYULS"

CHAPTER I

I. – Name of the designation

Only natural sweet wines meeting the specific provisions set out below may claim the controlled designation of origin "Banyuls", initially recognised by the decree of 6 August 1936.

II. – Geographical denominations and complementary terms

The name of the appellation may be supplemented by the terms "hors d'âge" and "Rancio" for wines meeting the production conditions fixed for these terms in the present specification.

1° – The name of the controlled designation of origin is compulsorily supplemented by the terms "ambré", "blanc", "rosé", "rimage" or "traditionnel" for the natural sweet wines meeting the conditions fixed for these terms in the present specification.

2° – The name of the controlled designation of origin may be supplemented by the term "hors d'âge" for the natural sweet wines benefiting from the terms "ambré" or "traditionnel" and meeting the production conditions fixed for this term in the present specification.

3° – The name of the controlled designation of origin may be supplemented by the term "rancio" for the natural sweet wines benefiting from the terms "ambré" or "traditionnel", whether or not benefiting from the term "hors d'âge", and meeting the production conditions fixed for this term in the present specification.

III. – Colour and types of product

The controlled designation of origin "Banyuls" is reserved for white, rosé and red natural sweet wines elaborated solely according to the production conditions fixed for the benefit of the terms "ambré", "blanc", "rosé", "rimage" or "traditionnel".

IV. – Areas and zones in which the various operations are carried out

1° – Geographical area

The harvesting of the grapes, the vinification, the elaboration and the ageing of the wines, and the harvesting of the grapes, the vinification, the elaboration, the ageing and the packaging of the wines liable to benefit from the terms "blanc" or "rimage", are carried out within the territory of the following communes of the Pyrénées-Orientales department: Banyuls-sur-Mer, Cerbère, Collioure and Port-Vendres.

2° – Delimited parcel area

The wines may not arise from vine parcels that, by the nature of their soil or their situation, are unfit to produce the wine of the controlled designation of origin. The National Institute of Origin and Quality lodges with the town halls of the communes referred to in 1° the graphic documents establishing the parcel boundaries of the production area thus approved.

3° – Immediate proximity area

The immediate proximity area, defined by derogation for the vinification, the elaboration and the ageing of the wines, and for the vinification, the elaboration, the ageing and the packaging of the wines liable to benefit from the terms "blanc" or "rimage", is made up of the territory of the following communes of the Pyrénées-Orientales department: Argelès-sur-Mer, Laroque-des-Albères, Montesquieu-des-Albères, Palau-del-Vidre, Saint-André, Saint-Génis-des-Fontaines, Sorède, Villelongue-dels-Monts.

To which are added, for the ageing and the packaging of the wines and the ageing and the packaging of the wines liable to benefit from the terms "blanc" or "rimage", the territory of the following communes of the Pyrénées-Orientales: Cases-de-Pène, Elne, Ortaffa, Prats-de-Mollo.

V. – Grape varieties

1° – Grape varieties

a) – The wines come from the following varieties: - main varieties: grenache blanc B, grenache gris G, grenache N, macabeu B, muscat à petits grains B, muscat d'Alexandrie B (locally called muscat romain) and tourbat B (locally called malvoisie du Roussillon); - accessory varieties: carignan N, cinsaut N and syrah N.

TERMS	GRAPE VARIETIES
Wine liable to benefit from the term "ambré" or "blanc"	- main varieties: grenache blanc B, grenache gris G, macabeu B, tourbat B (locally called malvoisie du Roussillon); - accessory varieties: marsanne B, muscat à petits grains B and muscat d'Alexandrie B, roussanne B, vermentino B, carignan B.
Wine liable to benefit from the term "rosé"	- main varieties: grenache blanc B, grenache gris G, grenache N, macabeu B, tourbat B (locally called malvoisie du Roussillon); - accessory varieties: muscat à petits grains B and muscat d'Alexandrie B.
Wine liable to benefit from the term "rimage"	- main variety: grenache N; - accessory varieties: carignan N, cinsaut N, counoise N, grenache gris G, mourvèdre N, syrah N.
Wine liable to benefit from the term "traditionnel"	- main varieties: grenache gris G, grenache N; - accessory varieties: carignan N, cinsaut N, counoise N, mourvèdre N, syrah N.

b) – The parcels intended to be planted with muscat à petits grains B and muscat d'Alexandrie B must meet the technical criteria defined respectively for each of these varieties and approved by the competent national committee of the National Institute of Origin and Quality.

2° – Proportion rules on the holding and on the parcel

TERMS	PROPORTION RULES
Wine liable to benefit from the term "ambré" or "blanc"	a) – Proportion rules on the holding: the proportion of all the muscat à petits grains B and muscat d'Alexandrie B varieties is less than or equal to 20 % of the grape varieties. b) – Proportion rules on the parcel: the proportion of the marsanne B, roussanne B, vermentino B and carignan B varieties is less than or equal to 10 % of the total grape varieties of a same parcel.
Wine liable to benefit from the term "rosé"	Proportion rules on the holding: the proportion of all the muscat à petits grains B and muscat d'Alexandrie B varieties is less than or equal to 20 % of the grape varieties.
Wine liable to benefit from the term "rimage"	Proportion rules on the parcel: the proportion of the accessory varieties is less than or equal to 10 % of the total grape varieties of a same parcel.
Wine liable to benefit from the term "traditionnel"	a) – Proportion rules on the holding: the proportion of the grenache N variety is greater than or equal to 50 % of the grape varieties. b) – Proportion rules on the parcel: the proportion of the accessory varieties is less than or equal to 10 % of the total grape varieties of a same parcel.

VI. – Management of the vineyard

1° – Training methods

a) – Planting density.

GENERAL PROVISIONS

The vines present a minimum planting density of 4,000 plants per hectare. These vines may not present a spacing between rows greater than 2.50 metres. Each plant has a maximum area of 2.5 square metres. This area is obtained by multiplying the inter-row and plant-spacing distances.

PARTICULAR PROVISIONS

For the vines planted in a square or in a quincunx, each plant has a maximum area of 3 square metres. This area is obtained by multiplying the inter-row and plant-spacing distances within the same row. The spacing between rows and the spacing between plants within the same row is less than or equal to 1.70 metre. The vines planted on terraces may present a maximum spacing of 2.5 metres between the crest of the bank or

of the low wall and the first row of the upper terrace, as well as between the foot of the bank or of the low wall and the first row of the lower terrace.

b) – Pruning rules.

GENERAL PROVISIONS

The vines are trained in goblet or fan. They are pruned by short pruning with a maximum of 7 spurs per plant. Each spur bears a maximum of 2 free eyes. Pruning must be carried out at the latest on 31 March. However, the services of the National Institute of Origin and Quality may grant a derogation in the event of exceptional meteorological conditions, of serious family problems or of tenancies taken over late.

PARTICULAR PROVISIONS

The grenache blanc B, grenache gris G and grenache N varieties may be the subject of a pre-pruning with a number of free eyes per spur greater than 2, subject to the vines being pruned, by 31 March at the latest, in accordance with the provisions above.

c) – Trellising rules and foliage height.

TRAINING OF THE VINE	TRELLISING RULES AND FOLIAGE HEIGHT
Vines trained in the "raised single-plane trellising" mode.	The height of the trellised foliage, after topping, must be at least equal to 0.45 times the spacing between rows, the height of trellised foliage being measured between the lower limit of the foliage, established at least 0.30 metre above the ground, and the upper topping limit, established at least 0.20 metre above the upper trellising wire.
Other training methods.	The length of the shoots, after topping, is greater than or equal to 0.60 metre.

d) – Average maximum load per parcel.

The average maximum load per parcel is fixed at 6,000 kilograms per hectare, with a maximum of 1.5 kilogram per plant.

e) – Thresholds for missing vines.

- The percentage of dead or missing vine plants, referred to in Article D. 645-4 of the Rural and Maritime Fishing Code, is fixed at 20 %. - For the vines whose planting density is greater than or equal to 5,000 plants per hectare, the percentage of dead or missing vine plants, referred to in Article D. 645-4 of the Rural and Maritime Fishing Code, is fixed at 30 %.

f) – Cultivation condition of the vine.

The parcels are managed so as to ensure a good overall cultivation condition of the vine, in particular its sanitary condition and the upkeep of its soil.

2° – Other cultivation practices

a) – The water-circulation-control developments and the elements structuring the landscape (low walls, terraces, banquettes…) are maintained by means making it possible to guarantee the integrity and the durability of the soils as well as the respect of the characteristic landscape of the vineyard.

b) – In order to preserve the characteristic landscape of the vineyard, the elements structuring the landscape (low walls, terraces, banks, banquettes…) may not be the subject of important modifications. In order to preserve the characteristics of the physical and biological environment that constitutes a fundamental element of the terroir: - On the parcels fit for the production of the controlled designation of origin, the water-circulation-control developments and the structuring elements making it possible to guarantee the integrity and the durability of the soils (low walls, terraces, banquettes…) are maintained according to the usages by means making it possible to guarantee the integrity and the durability of the soils as well as the preservation of the characteristic elements of the terroir, by using traditional materials. - Only the developments or works that do not bring a substantial modification of the structuring elements making it possible to guarantee the integrity and the durability of the soils (low walls, terraces, banks, banquettes…) of a parcel of the delimited parcel area are authorised. - The control of the spontaneous

vegetation is carried out, from 1 September to 1 February, either by a soil tillage or by equipment ensuring a precise localisation of the treatment products.

3° – Irrigation

Irrigation is prohibited.

VII. – Harvest, transport and ripeness of the grapes

1° – Harvest

a) – The wines come from grapes harvested at proper ripeness. - For the muscat à petits grains B variety and for the muscat d'Alexandrie B variety, the date of the start of the harvest is fixed according to the provisions of Article D. 645-6 of the Rural and Maritime Fishing Code; - for the other varieties, the date of the harvest is defined individually on the parcel or the cultivation block according to the ripeness and the sanitary condition of the harvest.

b) – Particular harvest provisions. - The wines come from grapes harvested manually by successive pickings. - The sanitary sorting of the harvest is compulsory whenever the harvest visually presents a degraded sanitary condition or an insufficient level of ripeness. This sorting is carried out by the operator either at the parcel or at the cellar.

c) – Particular provisions for the transport of the harvest. - During the transport of the harvest, the grapes are neither crushed nor packed down; - the harvest must be transported in conditions permitting the maintenance of its qualitative potential.

2° – Ripeness of the grapes

The wines arise from musts presenting a minimum natural sugar richness of 252 grams per litre.

VIII. – Yields. – Entry into production

1° – Yield

The yield referred to in Article D. 645-7 of the Rural and Maritime Fishing Code is fixed at 30 hectolitres of must per hectare.

2° – Limit yield

The limit yield referred to in Article D. 645-7 of the Rural and Maritime Fishing Code is fixed at 40 hectolitres of must per hectare.

3° – Loss of the benefit of the controlled designation of origin

The wines are obtained within the limit of a yield per hectare of 40 hectolitres of must. This yield corresponds to the total production of the claimed parcels. Any exceeding of this yield causes the whole of the harvest to lose the benefit of the controlled designation of origin.

4° – Entry into production of young vines

The benefit of the controlled designation of origin may be granted to wines coming from: - parcels of young vines only from the 3rd year following that in the course of which planting was carried out in place before 31 July; - parcels of young vines only from the 2nd year following that in the course of which grafting in place was carried out before 31 July; - parcels of vines that have been top-grafted, at the earliest in the 1st year following that in the course of which the top-grafting was carried out before 31 July, and once the parcels no longer contain any varieties other than those permitted for the appellation. By way of derogation, in the year following that in the course of which the top-grafting was carried out before 31 July, the varieties permitted for the appellation may represent only 80 % of the grape varieties of each parcel concerned.

5° – Particular provisions

No complementary particular provision. Only the controlled designations of origin "Banyuls" and "Collioure" may be claimed for the wines produced on a same determined area of vines in production. In this case, the quantity declared per hectare in the controlled designation of origin "Collioure" may not be

greater than the difference between 40 hectolitres and the quantity declared in controlled designation of origin “Banyuls” affected by a coefficient equal to 1.3.

IX. – Processing, elaboration, ageing, packaging, storage

1° – General provisions

The wines are vinified in accordance with local, fair and constant usages.

a) – Blending of the varieties.

The red wines arise from the grenache N variety alone or from a blend of several varieties of which, compulsorily and predominantly, the grenache N variety.

TERMS	BLENDING RULES
Wine liable to benefit from the term “ambré” or “blanc”	- The wines arise from one or more of the main varieties; - the proportion of all the muscat à petits grains B and muscat d’Alexandrie B varieties is less than or equal to 20 % in the blends; - the proportion of the marsanne B, roussanne B, vermentino B, carignan B varieties is less than or equal to 10 % in the blends.
Wine liable to benefit from the term “rosé”	The proportion of the accessory varieties is less than or equal to 20 % in the blends.
Wine liable to benefit from the term “rimage”	The proportion of the accessory varieties is less than or equal to 10 % in the blends.
Wine liable to benefit from the term “traditionnel”	- The proportion of the grenache N variety is greater than or equal to 50 % in the blends; - the proportion of the accessory varieties is less than or equal to 10 % in the blends.

b) – Analytical standards.

The wines intended for a bulk transaction, or at the packaging stage, meet the following analytical standards:

Acquired alcoholic strength by volume		**Greater than or equal to 15 %**
Total alcoholic strength by volume		**Greater than or equal to 21.5 %**
Content of fermentable sugars (glucose and fructose) (grams per litre)		Greater than or equal to 45
Content of fermentable sugars — particular values	Wines liable to benefit from the term “ambré”	Less than or equal to 2.50
	Wines liable to benefit from the term “traditionnel”	Greater than or equal to 2.80
	Wines liable to benefit from the term “rimage”	Greater than or equal to 4
Colouring intensity (OD 420 + OD 520)	Wines liable to benefit from the term “rosé”	Between 0.40 and 0.70
Hue (OD 420/OD 520)	Wines liable to benefit from the term “rosé”	Less than or equal to 1.2

c) – Oenological practices and physical treatments.

- Any enrichment operation is prohibited; - the addition of any product liable to modify the colour of the wines is prohibited; - the fortification (mutage) and the fortification top-ups are authorised under the conditions referred to in 2° below.

d) – Prohibited equipment.

The use of continuous vinifiers, screw draining tables, continuous presses and centrifugal destemmers is prohibited.

e) – Vinification vat capacity.
Every operator has a vinification vat capacity equivalent to the volume vinified during the previous harvest, at equal area.

f) – Good overall upkeep of the cellar (floors and walls) and equipment.
The cellar (floors and walls) and the vinification equipment present a good general condition of upkeep.

2° – Provisions by type of product

GENERAL PROVISIONS

The wines are obtained by fortification (mutage) of the must in the course of fermentation. The fortification is carried out by the addition of neutral wine spirit titrating at least 96 % vol., within the limit, evaluated in pure alcohol, of 5 % minimum and 10 % maximum of the volume of the must used. The fortification operation is carried out before 31 December of the year of harvest of the must. However, fortification top-ups may be authorised or ordered by the services of the Directorate-General for Competition, Consumer Affairs and Fraud Control, within the limit of a total addition of 10 % in pure alcohol, before the claim declaration.

PARTICULAR PROVISIONS FOR ELABORATION

Wines liable to benefit from the term “ambré”, “blanc” or “rosé”	The wines are obtained by separation of the musts from the pulp of the grape before the start of the fermentation.
Wines liable to benefit from the term “rimage”	The wines are compulsorily fortified on the grapes (mutés sur grains).
Wines liable to benefit from the term “traditionnel”	The wines are obtained by maceration of the must with the pulp of the grape during all or part of the fermentation.

PARTICULAR PROVISIONS FOR AGEING

Wines liable to benefit from the term “blanc” or “rimage”	The wines are the subject of an ageing in a reductive medium, at least until 1 May of the year following that of the harvest, of which a minimum of 3 months in bottle.
Wines liable to benefit from the term “ambré” or “traditionnel”	The wines are the subject of an ageing in an oxidative medium, at least until 1 March of the 3rd year following that of the harvest.
Wines liable to benefit from the term “hors d’âge”	The wines are the subject of an ageing at least until 1 September of the 5th year following that of the harvest.
Wines liable to benefit from the term “rancio”	The term is reserved for the wines that, according to the ageing conditions, have acquired the “goût de rancio” (rancio taste).

d) – The wines are the subject of a minimum ageing until 31 August of the year following that of the harvest.

3° – Provisions relating to packaging

GENERAL PROVISIONS

For each packaged lot, the operator keeps available for the approved control body: - the information appearing in the register of handling operations referred to in Article D. 645-18 of the Rural and Maritime Fishing Code; - an analysis carried out before or after packaging and, in this latter case, within a maximum time limit of fifteen days following the packaging. The analysis reports must be kept for a period of 6 months from the date of packaging.

PARTICULAR PROVISIONS

Wines benefiting from the term “rosé”	In order to preserve the essential characteristics of the wines, they are packaged in glass bottles at the latest on 31 December of the year following that of the harvest.
Wines benefiting from the term	- In order to preserve the essential characteristics of the wines, they are packaged in glass bottles by the operator harvesting the grapes and vinifying these wines or by the collective vinification

"blanc" or "rimage"	unit whose members harvest the grape. - The packaging is carried out at the latest on 30 June of the 2nd year following that of the harvest.

4° – Provisions relating to storage

The operator demonstrates a place suited to the storage of the packaged products.

5° – Provisions relating to the movement of products and to placing on the market for the consumer

a) – Date of placing on the market for the consumer.

The wines are placed on the market for the consumer:

TERMS	DATES
Wines benefiting from the term "rosé"	According to the provisions of Article D. 645-17 of the Rural and Maritime Fishing Code.
Wines benefiting from the term "blanc" or "rimage"	From 1 May of the year following that of the harvest.
Wines benefiting from the term "ambré" or "traditionnel"	From 1 March of the 3rd year following that of the harvest.
Wines benefiting from the term "hors d'âge"	From 1 September of the 5th year following that of the harvest.

APPELLATION AND COMPLEMENTARY TERM	DATE
AOC Banyuls	1 September of the year following that of the harvest

b) – Period during which the wines may not move between approved warehouse keepers.

The wines may move between approved warehouse keepers at the earliest on:

TERMS	DATES
Wines benefiting from the term "rosé"	1 December of the year of harvest.
Wines benefiting from the term "blanc" or "rimage"	15 March of the year following that of the harvest.
Wines benefiting from the term "ambré" or "traditionnel"	15 February of the 3rd year following that of the harvest.
Wines benefiting from the term "hors d'âge"	15 August of the 5th year following that of the harvest.

X. – Link with the geographical area

1° – Information on the geographical area

a) – Description of the natural factors contributing to the link

b) – Description of the human factors contributing to the link

2° – Information on the quality and characteristics of the products

3° – Causal interactions

XI. – Transitional measures

1° – Training methods

a) – The vine parcels planted before the date of 31 July 2009 with a planting density lower than 4,000 plants per hectare, or whose spacing between rows is greater than 2.50 metres, continue to benefit, for their harvest, from the right to the controlled designation of origin, until they are grubbed up, subject to compliance with the provisions relating to the foliage height fixed in the present specification.

b) – The vine parcels planted in a square or in a quincunx at the date of 31 July 2009, with a spacing between rows and on the row greater than 1.70 metre and less than 2 metres, continue to benefit, for their harvest, from the right to the controlled designation of origin, until they are grubbed up, subject to compliance with the provisions relating to the foliage height fixed in the present specification.

2° – Processing, elaboration, ageing, packaging, storage

a) – For the wines liable to benefit from the term “traditionnel”, the compulsory ageing in an oxidative medium until 1 May of the 3rd year following that of the harvest is applicable from the 2012 harvest. For the wines of the earlier harvests, the minimum duration of ageing of the wines in an oxidative medium is the following:

2012 harvest	30 months
2011 harvest	24 months
2010 harvest	18 months

b) – The provision relating to the packaging in the geographical area and in the immediate proximity area of the wines benefiting from the terms “blanc” or “rimage” applies from 1 January 2014.

XII. – Rules of presentation and labelling

1° – General provisions

Wines for which, under the terms of the present specification, the controlled designation of origin “Banyuls” is claimed and which are presented under the said appellation may not be declared after the harvest, offered to the public, dispatched, put up for sale or sold unless, in the harvest declaration, in advertisements, on leaflets, labels, invoices and any containers whatsoever, the controlled designation of origin “Banyuls” is entered and accompanied by the entry “Appellation d’origine contrôlée”, the whole in very apparent characters.

2° – Particular provisions

No complementary particular provision.

a) – The terms “vin doux naturel” are compulsorily entered on the labels.

b) – All the optional indications are entered, on the labels, in characters whose dimensions, both in height and in width, are not greater than double those of the characters composing the name of the controlled designation of origin.

c) – The terms “ambré”, “blanc”, “rimage”, “rosé” or “traditionnel” appear compulsorily on the labelling. These terms also appear in the advertisements, on the leaflets and on the invoices.

d) – The wines benefiting from the terms “blanc”, “rimage” and “rosé” are compulsorily presented with the indication of the vintage.

CHAPTER II

I. – Declaration obligations

1. Prior declaration of parcel allocation

Each operator declares to the defence and management body the list of the parcels allocated to the production of the controlled designation of origin before 1 February preceding the harvest. This declaration is renewable by tacit renewal, except for modifications notified by the operator before 1 February preceding each harvest. This declaration specifies: - the identity of the operator; - its EVV or SIRET number; - the cooperative cellar(s) to which it is, where applicable, a supplier; - for each parcel: the cadastral reference, the area, the year of planting, the variety or the share of each variety if the parcel is planted with different varieties, the planting density, the spacings on the row and between rows. It is accompanied by a copy of the list of the parcels presenting a percentage of dead or missing plants, established in accordance with the provisions of Article D. 645-4 of the Rural and Maritime Fishing Code. The operator may declare renouncing to produce the appellation until the start of the harvest and at the latest on 15 August, on justified grounds, to the defence and management body.

2. Claim declaration

The claim declaration must be sent to the defence and management body before 1 February of the year following that of the harvest. For the wines liable to benefit from the terms “blanc” and “rimage”, the claim declaration must be sent to the defence and management body at the latest on 15 June of the 2nd year following that of the harvest. For the wines liable to benefit from the term “rosé”, the claim declaration must be sent to the defence and management body at the latest on 1 July of the year following that of the harvest. It indicates: - the appellation claimed and the term; - the volume of the wine; - the EVV or SIRET number; - the name and address of the applicant; - the place of storage of the wine. It is accompanied by: - a copy of the harvest declaration, a copy of the definitive fortification declaration and, where applicable, a copy of the production declaration or an extract of the stock accounts for the buyers of grapes and musts; - the list of the containers of the cellar plan permitting in particular the number, the designation and the capacity of the containers to be identified according to the arrangements defined in the control or inspection plan.

3. Prior declaration of bulk transactions or of removals

Every operator wishing to market in bulk a wine benefiting from the controlled designation of origin must make to the approved control body and to the management body a transaction declaration for the lot concerned between the day of the contractualisation of the transaction and at the latest ten days before the removal. The lot is defined as a homogeneous whole arising from one or more containers. If the contracted volume is split into several lots and removed at different dates (more than one month apart), each removal will be the subject of a different declaration.

4. Packaging declaration

Every operator wishing to package a wine benefiting from the controlled designation of origin must make to the approved control body a prior declaration of packaging for the lot concerned within a time limit of eight working days before the operation. The operators carrying out more than 12 packagings per year, distributed over the year across at least six months, are exempted from this declaration obligation, but must send quarterly a summary declaration.

5. Declaration of intention of packaging for the wines benefiting from the term “blanc” or “rimage”

Every operator wishing to package a wine benefiting from the term “blanc” or “rimage” must make to the defence and management body and to the approved control body a prior declaration of packaging for the lot concerned within a time limit of three working days before the start of the operation. This document, completed with the information required at point 3 of the present chapter, is equivalent to a claim declaration.

6. Declaration of intention of packaging for the wines benefiting from the term “rosé”

Every operator wishing to package or to have packaged a wine benefiting from the term “rosé” must make to the defence and management body a prior declaration of intention of packaging for the lot concerned within a time limit of eight working days before the start of the operation.

7. Declaration relating to the dispatch outside the national territory of a non-packaged wine

Every operator wishing to carry out a dispatch outside the national territory of a non-packaged wine benefiting from the controlled designation of origin must make the declaration thereof to the approved control body at least ten working days before the dispatch. The operator must specify the volumes concerned.

8. Fallback (repli) declaration

Every operator marketing a wine benefiting from the controlled designation of origin under a more general appellation must make the declaration thereof to the defence and management body and to the approved control body within a time limit of fifteen days maximum after this fallback. The operator must specify the volumes concerned.

9. Downgrading declaration

Every operator carrying out a downgrading of wines benefiting from the controlled designation of origin must make the declaration thereof to the defence and management body and to the control body at the latest seven working days after this downgrading. The operator must specify the volumes concerned.

10. Declaration of intention of planting for the muscat à petits grains B and muscat d'Alexandrie B varieties

Every operator sends to the defence and management body a declaration of intention of planting for the muscat à petits grains B and muscat d'Alexandrie B varieties before 15 November preceding the year of planting. This declaration specifies: - the identity of the operator; - its EVV or SIRET number; - the cooperative cellar(s) to which it is, where applicable, a supplier; - for each parcel: the cadastral reference, the area, the planned variety.

11. Declaration for the development or redevelopment of a parcel

Before any development or any works modifying the topography, the subsoil, the arable layer (including any addition of exogenous soil) or elements making it possible to guarantee the integrity and the durability of the soils of a delimited parcel, going beyond the classic deep-ploughing works, a declaration must be sent by the operator to the defence and management body within a time limit of at least four weeks before the start of the envisaged works. The defence and management body transmits a copy of this declaration to the service of the INAO without delay. This declaration specifies: - the identity of the operator; - its EVV or SIRET number; - the cadastral reference and the area of the parcel(s) concerned.

II. – Keeping of registers

The following registers must be filled in regularly and be kept available for the approved control body:

1. Ripeness monitoring

Ripeness-monitoring register with the reading of the sugar richness of the grapes per cultivation unit and the reading of the natural alcoholic strength by volume per container.

2. Register relating to the transitional provisions

List of the parcels being the subject of transitional provisions relating to the training method.

3. Cellar plan

List of the containers permitting in particular the number, the designation and the capacity of the containers to be identified according to the arrangements defined in the control or inspection plan.

CHAPTER III

I. – Main points to be checked and evaluation methods

MAIN POINTS TO BE CHECKED	EVALUATION METHODS
A – STRUCTURAL RULES	
A1 – Belonging of the planted (and allocated) parcels to the delimited area.	Documentary check and check in the field.
A2 – Claimable production potential (training method, entry of the vines into production, monitoring of the transitional measures).	Documentary check and check in the field.
A3 – Processing, ageing, packaging and storage facility. — Prohibited equipment.	Documentary check and on-site check.
Traceability of the packaging.	Documentary check and on-site check.
Place of storage suited to the packaged products.	Documentary check and on-site check.
B – RULES LINKED TO THE PRODUCTION CYCLE	
B1 – Management of the vineyard. — Pruning.	Check in the field.
Average maximum load per parcel.	Check in the field.
Other cultivation practices (upkeep of the water-circulation-control developments, developments or works on the parcels, control of the spontaneous vegetation).	Check in the field.

B2 – Harvest, transport and ripeness of the grapes. — Ripeness of the grapes.	Documentary check.
B3 – Processing, elaboration, packaging, storage. — Fortification (mutage).	Documentary check.
B4 – Harvest declaration and claim declaration. — Authorised yield. Total production of the claimed parcels.	Documentary check.
C – CHECKS ON THE PRODUCTS	
Analytical standards at the stage of the transaction and of the packaging.	Documentary and/or analytical check.
At the stage of the transaction and of the packaging.	Organoleptic examination.
Non-packaged wines intended for a dispatch outside the national territory.	Analytical and organoleptic examination of all the lots.
D – PRESENTATION OF THE PRODUCTS	
Labelling: - terms “ambré”, “traditionnel”, “hors d’âge”, “rancio”; - terms “blanc”, “rimage” and “rosé” with indication of the vintage.	Documentary check and on-site check.

The check of compliance with the present specification is carried out by a third-party body offering guarantees of competence, impartiality and independence, under the authority of the INAO, on the basis of an approved inspection plan.

The inspection plan sets out the self-checks carried out by the operators on their own activity and the internal checks carried out under the responsibility of the defence and management body. It indicates the external checks carried out by the third-party body as well as the analytical and organoleptic examinations. The whole of the checks is carried out by sampling. Non-packaged wines intended for a dispatch outside the national territory are the subject of a systematic analytical and organoleptic check.
